DEPARTMENT OF FINANCE,
OTTAWA,
October, 1926.

Honourable J. A. ROBB,
Minister of Finance.

SIR,—I have the honour to submit to you the Public Accounts of Canada for the fiscal year ended March 31, 1926.

## ORDINARY RECEIPTS AND PAYMENTS

The receipts for the year on account of Consolidated Fund amounted to $380,745,505.58 and the expenditure on the same account to $320,660,479.14, showing a surplus of ordinary receipts over ordinary expenditures of $60,085,026.44.

## SPECIAL RECEIPTS AND EXPENDITURES

In addition to the ordinary receipts and payments there were special receipts and credits of $2,275,321.00 and special expenditures of $6,649,302.40, leaving an excess of $4,373,981.40 of expenditures over the receipts as a charge to Consolidated Fund:—

| | | |
|---|---|---|
| Special Receipts:— | | |
| War and Demobilization Receipts—Refund of Previous Years' Expenditure | $ 127,817 52 | |
| Payments received on account of German Reparation Recovery Act | 1,593,503 48 | |
| Vancouver Harbour Commission Bonds received on account of Canadian Government Elevator at Vancouver transferred to the Commission | 550,000 00 | |
| Dominion Stock - McGee annuity amount written off | 4,000 00 | |
| | | $ 2,275,321 00 |
| Special Expenditures:— | | |
| Adjustment of War Claims | $ 319,210 31 | |
| Cost of Loan Flotations, including discount | 3,523,925 13 | |
| Home Bank Depositors' Relief Act | 2,521,082 63 | |
| Miscellaneous Charges | 285,084 33 | |
| | | $ 6,649,302 40 |
| Excess of Special Expenditures over Special Receipts | | $ 4,373,981 40 |

## CAPITAL ACCOUNT

The following outlays were made during the year and charged to Capital:—

| | | |
|---|---|---|
| CANALS (Schedule H H)— | | |
| St. Anne's Lock | $ 50,000 00 | |
| Trent Canal | 17,514 85 | |

| | | 171,680 06 |
| | | $ 268,841 30 |
| Net Charge to Capital Account | | $16,798,548 92 |

## SAVINGS BANKS

At the close of the fiscal year, the balance at the credit of depositors in the Post Office and Government Savings Banks was $32,830,544.24, a decrease of $780,589.16 under the balance held on March 31, 1925. The withdrawals for the year exceeded the deposits by $1,743,334.70 while $962,745.54 were added for interest accrued.

## INVESTMENTS

### Sinking Funds

Investments on account of Sinking Funds of the various loans were made during the year to the amount of $3,584,840.56. War Loan Bonds held in the Sinking Funds to the extent of $776,000 on account of the 5% 1915-25 War Loan were, on the maturity of the loan on the 1st December, 1925, taken over from the Sinking Fund Account and cancelled. The total of the investments at the credit of the Sinking Funds, which stood at $39,076,218.95 on March 31, 1925, were therefore increased to $41,885,059.51 on March 31, 1926.

### Advances to Harbour Commissioners

Advances were made under statute to the following Harbour Commissioners:—

| | |
|---|---|
| Montreal Harbour Commissioners | $ 6,245,000 00 |
| Quebec Harbour Commissioners | 511,000 00 |
| Vancouver Harbour Commissioners | 3,277,000 00 |
| | $10,033,000 00 |

### Loans to Banks

Under authority of 13-14 Geo. V, Chapter 48, "Finance Act, 1923," advances during the year to an aggregate amount of $189,100,000 were made by way of issues of Dominion Notes to various banks. On April 1, 1925, the outstanding balance on this account was $14,700,000. During the year repayments were received to the amount of $193,800,000, leaving a balance of $10,000,000 outstanding at the close of the year.

### Loans to Railways

Loans to the Canadian National Railway Company to the amount of $10,000,000 were made under authority of the Appropriation Act of 1925.

### Loans to Merchant Marine

Loans to the Canadian Government Merchant Marine, Limited, of $668,000 were made under authority of the Appropriation Act of 1925.

### Soldier Land Settlement Board

The Loans outstanding to Soldiers settling on the land and for General Land Settlement decreased during the year by $213,852.81, leaving a balance outstanding at the close of the year of $87,536,094.10.

## DEBT

The net debt of the Dominion at the close of the fiscal year was $2,389,731,099.42 or a decrease of $27,706,586.17 under the debt as it stood on March 31, 1925.

The decrease is accounted for as follows:—

| | | |
|---|---|---|
| Excess of Ordinary Revenue over Ordinary Expenditure | $60,085,026 44 | |
| Special receipts credited to Consolidated Fund | 2,147,503 48 | |
| | | $62,232,529 92 |
| DEDUCT— | | |
| Adjustment of War Claims (Net) | $ 191,392 79 | |
| Discount and expenses of Loan Flotations | 3,523,925 13 | |
| Home Bank Depositors' Relief Act | 2,521,082 63 | |
| Miscellaneous Charges | 285,084 33 | |
| Expenditures on Capital Account (Net) | 16,798,548 92 | |
| Canadian Pacific Railway, Original Construction | 1,339 44 | |
| Loans to Canadian National Railways | 10,000,000 00 | |
| Loans to Canadian Government Merchant Marine, Limited | 668,000 00 | |
| Loans to Quebec Harbour Commissioners | 511,000 00 | |
| Payment on account of Toronto Barracks site, which amount was previously set off against Military Property and Stores, Capital Account | 494 48 | |
| Canada Land and Irrigation Co., Advances to provide for operation and maintenance | 25,076 03 | |
| | | 34,525,943 75 |
| | | $27,706,586 17 |

## LOANS

The Loans which matured during the fiscal year amounted to $164,347,833.33. They were as follows:

Six months 4 per cent Treasury Bills, £5,000,000 or $24,333,333.33 matured in London, August 1, 1925.

One year 4 per cent notes, $90,000,000 matured in New York, Sept. 15, 1925.

One year 4 per cent Treasury Notes, $8,000,000 matured in Canada, November 15, 1925.

War Loan 1915-25, 5 per cent bonds $42,014,500, matured in Canada. December 1, 1925.

These maturing obligations were met by issuing refunding loans of $145,000,000; the balance being provided from cash resources.

The refunding loans issued were:

One year 4 per cent notes, $70,000,000, dated September 1st, 1925, were sold to Chase Securities Corporation and Blair & Co., Inc., of New York at a net price to the Government of 99.67. The Government reserved the right to redeem this issue on notice after March 1st, 1926.

Fifteen year 4½ per cent bonds, $75,000,000, dated September 1, 1925, were sold to a Canadian Syndicate at a price to the Government of 95.80 flat, payment being made in three instalments,—one-third on September 30th, one-third on October 31st and one-third on November 30th.

The ten year 5 per cent bonds of the Public Service Loan, New York, amounting to $25,000,000 matured on April 1, 1926, and the $70,000,000 of one year 4 per cent notes due in New York, September 1, 1926, were, under the option held by the Government, called for redemption on April 1, 1926. These obligations were met by issuing the following refunding loans:

Ten year 4½ per cent bonds, $40,000,000, dated February 1, 1926, were sold to Chase Securities Corporation and Blair & Co., Inc., of New York, at a price of 97·354 flat.

Four year 4½ per cent bonds, $20,000,000, and twenty year 4½ per cent bonds, $45,000,000, dated February 1, 1926, were sold to a Canadian Syndicate at an average price of 96·735 flat.

Two year 4 per cent notes amounting to $43,000,000 matured during the present fiscal year, $35,000,000 falling due October 1, and $8,000,000 November 15th. These notes were redeemed in cash accumulated from surplus revenues.

## DOMINION NOTES

The circulation of Dominion Notes stood at $182,583,404.22 on March 31, 1926, being a decrease of $24,128,684.24 as compared with the circulation at the close of last year. Gold held as security amounted to $95,135,582.49. Of the total amount of Notes outstanding $50,435,000 were against approved securities held by the Department under the Finance Act, 1923 and the Dominion Notes Act, of 1915.

## SUPERANNUATION AND RETIREMENT ACTS

The statement showing the number and total salaries of officials coming under Superannuation Acts and Retirement Act has been continued to March 31, 1926.

Respectfully submitted,

J. C. SAUNDERS,
*Deputy Minister of Finance.*

PRINTER TO THE KING'S MOST EXCELLENT MAJESTY
1926

*To His Excellency the Right Honourable Viscount Willingdon, G.C.S.I., G.C.M.G., etc., etc., Governor General and Commander in Chief of the Dominion of Canada.*

MAY IT PLEASE YOUR EXCELLENCY:

The undersigned has the honour to present to Your Excellency the Annual Report of the Department of Customs and Excise, containing Tables and Statements relative to the Imports, Exports, Customs and Excise of the Dominion of Canada, for the fiscal year ended March 31, 1926, as compiled from official returns.

All of which is respectfully submitted,

W. D. EULER.

*Minister of Customs and Excise.*

OTTAWA, October 4, 1926.

## PREFACE

The Customs Act contains the following provisions respecting the Annual Report of the Department of Customs:—

> "305. The Minister shall annually make to the Governor General, to be laid before Parliament within fifteen days after the meeting thereof, a report and statement of the transactions and affairs of the department during the year then next preceding."

The Inland Revenue Act also contains provisions respecting the Annual Report of the Inland Revenue Service as follows:—

> "14. The Minister shall annually make to the Governor General a report and statement of the transactions and affairs of the Department during the year then next preceding, which shall be laid before Parliament within fifteen days after the next meeting thereof."

The unrevised monthly statements of imports and exports, prepared and published under the direction of the Department of Customs from July 1, 1900, ceased to be published by this department since March, 1918.

Detailed statements, however, showing the quantity, value, and origin of imports and the quantity, value, and destination of exports, continue to be prepared and furnished monthly by the Department of Customs from April 1, 1918, for publication by the Dominion Bureau of Statistics.

Trade statistics classified by countries, with other details compiled from Customs returns, are now published by the Dominion Bureau of Statistics.

Part I of this annual report contains tables and statements relative to the Customs.

Part II of this report contains tables and statements relative to Excise.

# INDEX TO CUSTOMS TABLES AND STATEMENTS

| No. of Statement | Subject | Description | Page |
|---|---|---|---|
| | | COMPARATIVE TABLES | |
| 1 | Imports and Exports | Total Exports and Imports entered for Home Consumption and duty collected from 1868 to 1926 | 9 |
| 2 | Aggregate Trade | Total Trade entered for Home Consumption and Exported by Countries, 1873 to 1926 | 10 |
| 3 | Exports | Total Exports by Countries, 1873 to 1926 | 12 |
| 4 | Imports | Total Value of Goods entered for Home Consumption by Countries, 1873 to 1926 | 14 |
| 5 | Revenue | Total Duty Collected by Countries, 1873 to 1926 | 16 |
| 6 | " percentage | Percentage of Duty on Imports entered for Home Consumption, percentage expense of collection, 1868 to 1926 | 19 |
| 7 | Imports and Exports | Comparative Statement of Imports entered for Home Consumption and Exports, showing percentage excess of Imports entered for Home Consumption over Exports, etc., 1868 to 1926 | 20 |
| 8 | Imports and Exports | Comparative Statement by Ports: Exports and Imports entered for Home Consumption, 3 years | 22 |
| | | TABLES AND STATEMENTS FOR FISCAL YEAR, 1926 | |

# REPORT

OF THE

# COMMISSIONER OF CUSTOMS AND EXCISE

---

To the Hon. W. D. Euler,

Minister of Customs and Excise.

Sir,—Herewith I have the honour to submit statements of the Excise Revenues collected by this department during the fiscal year ended March 31, 1926, with statistics respecting the sources whence these revenues were derived. The following summary comparison shows the accrued revenues for the fiscal years ended March 31, 1922, 1923, 1924, 1925, and 1926.

| — | 1922 | 1923 | 1924 | 1925 | 1926 |
|---|---|---|---|---|---|
| | $ | $ | $ | $ | $ |
| Excise Duty | 36,909,889 | 36,259,654 | 38,616,038 | 39,005,343 | 43,370,231 |
| Excise Tax | 73,902,614 | 107,989,893 | 123,668,847 | 89,330,838 | 99,228,334 |
| Totals | 110,812,503 | 144,249,547 | 162,284,885 | 128,336,181 | 142,598,565 |

DETAILS of Excise Revenue accrued during the undermentioned fiscal years:

| — | 1922 | 1923 | 1924 | 1925 | 1926 |
|---|---|---|---|---|---|
| | $ | $ | $ | $ | $ |
| Spirits | 6,224,061 | 7,985,808 | 9,371,063 | 9,393,661 | 10,932,578 |
| Malt-Liquor | 61,531 | 60,331 | 93,072 | 107,734 | 113,933 |
| Malt | 2,628,995 | 2,549,601 | 3,280,057 | 3,540,621 | 3,840,774 |
| Tobacco | 26,876,807 | 25,013,128 | 25,236,296 | 25,421,602 | 27,919,051 |
| Cigars | 1,095,170 | 622,035 | 608,685 | 516,606 | 539,300 |
| Acetic acid | 100 | 100 | 100 | 100 | 100 |
| Manufacturers in bond | 16,525 | 18,225 | 18,725 | 17,675 | 17,250 |
| Other receipts | 6,700 | 10,426 | 8,040 | 7,344 | 7,245 |
| Totals | 36,909,889 | 36,259,654 | 38,616,038 | 39,005,343 | 43,370,231 |

The quantity of spirits produced during the fiscal year was 5,434,329 proof gallons, as compared with 7,287,691 proof gallons produced in the previous fiscal year. The raw materials taken for use in the production of spirits, during the fiscal year were as follows:—

| | Lb. |
|---|---|
| Malt | 6,109,455 |
| Indian corn | 37,496,955 |
| Rye | 12,506,822 |
| Oats | 380,385 |
| Wheat | 46,800 |
| Molasses | 45,051,831 |

The transactions of the several distilleries will be found stated in detail in Statement No. 6.

| | Proof gal. |
|---|---|
| There was, on April 1, 1925, in process of manufacture | 614,236 |
| Manufactured during the fiscal year | 5,434,329 |
| Returned to distilleries for redistillation—In bond | 1,756,259 |
| Received into distilleries from other sources—Duty paid | 139,781 |
| Total | 7,944,605 |

This was disposed of as follows:—

| | Proof gal. |
|---|---|
| Placed in warehouse | 7,328,232 |
| Fusel oil and spirits written off | 29,754 |
| Deficiency arising from rectification | 6,036 |
| maining in process of manufacture, March 31, 1926, by actual stock taking | 580,583 |
| Total | 7,944,605 |

*Spirits.*—The following statement shows the warehousing transactions in Spirits during the fiscal year ended March 31, 1926, and the four preceding fiscal years:—

| Fiscal Years | In Warehouse at beginning of year, including transits | Warehoused during the year Ex-distillery | Otherwise warehoused | Entered for consumption | Exported | Used in bonded factories | Otherwise accounted for | For redistillation | In Warehouse at end of year, including transits |

OTTAWA
F. A. ACLAND
PRINTER TO THE KING'S MOST EXCELLENT MAJESTY
1927

*To His Excellency the Right Honourable Viscount Willingdon, G.C.S.I., G.C.M.G., etc., etc., Governor General and Commander-in-Chief of the Dominion of Canada.*

MAY IT PLEASE YOUR EXCELLENCY:

The undersigned has the honour to present to Your Excellency the Annual Report of the Department of Customs and Excise, containing Statements of Navigation and Shipping of the Dominion of Canada for the Fiscal Year ended March 31, 1926, as compiled from official returns.

All of which is respectfully submitted.

W. D. EULER,
*Minister of Customs and Excise.*

OTTAWA, November 30, 1926.

*A Son Excellence le Très Honorable vicomte Willingdon, G.C.S.I., G.C.M.G., etc., etc., Gouverneur général et Commandant en chef du Dominion du Canada.*

Qu'il Plaise à Votre Excellence:

Le soussigné a l'honneur de présenter à Votre Excellence le rapport annuel du ministère des Douanes et de l'Accise, comprenant les tableaux de la navigation et du commerce du Dominion du Canada pour l'exercice se terminant le 31 mars 1926, tel que compilé des rapports officiels.

Le tout respectueusement soumis.

W. D. EULER,
*Ministre des Douanes et de l'Accise.*

Ottawa, le 30 novembre 1926.

DEPARTMENT OF TRADE AND COMMERCE
OTTAWA, CANADA

ACTING MINISTER
Hon. JAMES A. ROBB

DEPUTY MINISTER
F. C. T. O'HARA

# THIRTY-FOURTH ANNUAL REPORT

OF THE

# DEPARTMENT OF TRADE AND COMMERCE

FOR THE

## FISCAL YEAR ENDING MARCH 31, 1926

OTTAWA
F. A. ACLAND
PRINTER TO THE KING'S MOST EXCELLENT MAJESTY
1926

Applications for copies of this Publication should be addressed to the King's Printer, Ottawa

*Price, cents.*

*To General His Excellency the Right Honourable Lord Byng of Vimy, G.C.B., G.C.M.G., M.V.O., Governor General and Commander-in-Chief of the Dominion of Canada.*

MAY IT PLEASE YOUR EXCELLENCY:

The undersigned has the honour to present to Your Excellency the Report of the Department of Trade and Commerce for the fiscal year ended March 31, 1926.

All of which is respectfully submitted.

JAMES A. ROBB,
*Acting Minister of Trade and Commerce.*

DEPARTMENT OF TRADE AND COMMERCE,
OTTAWA.

24738—1½

# Report of the Deputy Minister

OTTAWA, June 18, 1926.

The Hon. J. A. ROBB, M.P.,
Acting Minister of Trade and Commerce,
Ottawa.

SIR,—I have the honour to present herewith the Thirty-fourth Annual Report of the Department of Trade and Commerce, that is to say, for the fiscal year ended March 31, 1926.

FOREIGN TRADE OF CANADA, 1925-26.

The trade of Canada for the fiscal year 1926, both import and export, but especially export, was much greater than in 1925, indicating that the economic conditions of the Dominion in 1926 were much improved over those prevailing in the previous year. Probably the outstanding feature of Canada's foreign trade in 1926 was the continuation of that steady growth in both value and volume of exports, which has resulted in an improvement in the Dominion's visible trade balance, compared with that of last year, of $116,705,299. The Dominion's favourable trade balances for the past five fiscal years were:—

| | |
|---|---|
| 1922 | $ 6,122,677 |
| 1923 | 142,716,593 |
| 1924 | 165,396,430 |
| 1925 | 284,429,106 |
| 1926 | 401,134,405 |

On the 31st of March, 1926, the Dominion's visible trade balance was greater than that for the United States, the favourable balance for the Dominion amounting to $401,134,000, and that for the United States to $352,364,000.

An analysis of Canada's foreign trade will show that the physical volume of both imports and exports in 1926 were greater than during any other year in her history. The effect of price changes on the value of Canada's imports and exports cannot be exactly determined, but it is certain that if the same prices had prevailed in 1926, as ruled in any other previous year, the total value of the Dominion's foreign trade for that year would have been the greatest on record.

*Trade with All Countries*

The imports as well as exports in 1926 show an improvement over the years 1924 and 1925, the increase in exports being much greater than in imports. Canada's import trade in 1926 was valued at $927,402,732, in 1925 at $796,-932,537, and in 1924 at $893,366,867, the increase in 1926 over 1925 amounting to $130,470,195 or 16.4 per cent, and over 1924 to $34,035,865 or 3.8 per cent; while the Dominion's total exports in 1926 totalled $1,328,537,137, compared with $1,081,361,643 in 1925 and $1,058,763,297 in 1924, the increase over 1925 amounting to $247,175,494 or 22.9 per cent, and over 1924 to $269,773,840 or 25.5 per cent. The exports of domestic produce were: 1926, $1,315,192,791; 1925, $1,069,067,353; and 1924, $1,045,351,056; the increase over 1925 being $246,125,438 or 23.0 per cent and over 1924, $269,841,735 or 25.8 per cent.

Only on one other occasion was Canada's export trade greater than in 1926, viz., 1918, when it was valued at $1,586,169,792. In 1926 the total trade of Canada was valued at $2,255,939,869, in 1925 at $1,878,294,180, and in 1924 at $1,952,130,164; the increase over 1925 amounting to $377,645,689 or 20.1 per cent, and over the year 1924 to $303,809,705 or 15.5 per cent. The imports in 1926, compared with 1925, accounted for 34.5 per cent of the increase in the Dominion's foreign trade, and exports for 65.5 per cent, but compared with 1924 the imports accounted for only 11.2 per cent of the increase, and exports for 88.8 per cent.

*Imports by Main Groups, 1926.*—During 1926 the imports under the main group of agricultural and vegetable products amounted to $203,417,431, compared with a similar trade in 1925 of $173,585,839. The following commodities were responsible for the increase of $29,831,592, viz: raw rubber increased from $9,793,138 to $31,982,571 or $22,189,433; alcoholic beverages from $19,123,629 to $25,254,073 or $6,130,444; fresh fruits from $17,927,772 to $19,703,278 or $1,775,506; and vegetable oils from $8,081,585, to $9,535,575 or $1,453,990; while raw sugar decreased from $35,805,791 to $32,121,839 or $3,683,952. Animals and products during the same years increased from $41,491,969 to $49,-259,558 or $7,767,589 (principally butter from $74,289, to $2,649,108 or $2,574,-819; furs from $8,333,571 to $10,660,508 or $2,326,937; and raw hides from $8,279,873 to $9,329,543 or $1,049,670); fibres and textiles increased from $165,-440,757 to $184,761,831 or $19,321,074 (chiefly silk from $19,875,266 to $25,-541,363 or $5,666,097; raw cotton from $24,938,251 to $28,858,520 or $3,920,269; binder twine from $3,227,847 to $6,710,477 or $3,482,630; flax, hemp and jute from $13,892,860 to $16,887,193 or $2,994,333; and manila and sisal grass from $2,183,277 to $4,347,116 or $2,163,839); wood and paper from $38,185,383 to $40,403,096 or $2,217,713; iron and its products from $134,684,441 to $181,-196,800 or $46,512,359 (made up largely of automobile parts from $14,188,715 to $23,111,109 or $8,922,394; farm implements from $6,494,986 to $13,336,650 or $6,841,664; machinery from $25,822,215 to $32,031,669 or $6,209,454; rolling mill products from $34,656,558 to $40,581,492 or $5,924,934; automobiles from $10,091,378 to $15,795,228 or $5,703,850; and engines and boilers (principally auto engines) from $7,341,341 to $12,861,592 or $5,520,251); non-ferrous metals from $41,111,550 to $47,692,985 or $6,581,435 (mainly electric apparatus from $14,288,871 to $16,016,003 or $1,727,132; copper from $5,963,289 to $7,415,072 or $1,451,783; brass from $3,534,915 to $4,375,875 or $840,960; and silver bullion from $741,097 to $1,080,846 or $339,749); non-metallic minerals from $131,013,294 to $139,033,940 or $8,020,646 (crude petroleum increased from $24,396,876 to $30,132,936 or $5,736,060; coke from $3,506,717 to $6,505,072 or $2,998,355; and refined petroleum from $12,899,153 to $14,983,290 or $2,084,137; while coal decreased from $62,710,473 to $56,109,793 or $6,600,680); chemical products from $24,760,237 to $28,404,276 or $3,644,039; and miscellaneous commodities from $46,659,067 to $53,232,815 or $6,573,748.

*Exports by Main Groups, 1926.*—The exports of Canadian produce from 1925 to 1926 increased from $1,069,067,353 to $1,315,192,791 or $246,125,438. Every main group, except fibres and textiles, shows an increase. The main group, agricultural and vegetable products, increased from $443,298,877 to $605,895,672 or $162,596,795 (principally wheat from $251,665,844 to $364,-201,388 or $112,535,544; refined sugar from $7,939,504 to $19,980,927 or $12,041,-423; rubber goods from $11,358,456 to $20,726,859 or $9,368,403; oats from $16,044,436 to $24,237,693 or $8,193,257; potatoes from $2,922,290 to $9,327,274 or $6,404,984; seeds from $10,211,497 to $16,792,105 or $6,580,608; barley from $18,120,571 to $23,182,111 or $5,061,540; and alcoholic beverages from $16,225,533 to $21,207,777 or $4,982,244; while a few items show decreases.

viz: rye from $6,979,414 to $4,971,794 or $2,007,620; wheat flour from $70,638,692 to $69,687,598 or $951,094; and bran, shorts and middlings from $4,507,254 to $3,988,506 or $518,748); animals and products from $163,031,415 to $190,975,417 or $27,944,002 (chiefly cheese from $24,112,475 to $33,718,587 or $9,606,112; meats from $29,032,978 to $37,111,933 or $8,078,955; cattle from $13,372,861 to $18,081,479 or $4,708,618; and fish from $33,237,745 to $36,531,000 or $3,293,255); wood and paper from $253,610,024 to $278,674,960 or $25,064,936 (largely paper from $99,941,910 to $110,104,929 or $10,163,019; wood pulp from $41,565,241 to $49,909,870 or $8,344,629; and planks and boards from $61,356,009 to $66,824,346 or $5,468,337); iron and its products from $57,405,940 to $74,735,077 or $17,329,137 (mainly automobiles from $26,030,389 to $35,717,438 or $9,687,049; farm implements from $11,342,712 to $13,628,341 or $2,285,629; pigs, blooms and ingots from $1,318,358 to $2,167,172 or $848,814; and machinery from $5,043,587 to $5,669,914 or $626,327); non-ferrous metals from $90,370,788 to $97,476,270 or $7,105,482 (principally lead from $10,368,130 to $13,928,572 or $3,560,442; nickel from $10,174,245 to $12,829,244 or $2,654,999; copper from $12,722,677 to $14,943,053 or $2,220,376; and aluminium from $5,910,547 to $6,677,340 or $766,793; while raw gold decreased from $28,793,333 to $25,968,094 or $2,825,239); non-metallic minerals from $20,728,986 to $24,-568,845 or $3,839,859 (under this group raw asbestos increased from $7,742,739 to $9,920,900 or $2,178,161; and cement from $200,859 to $1,498,353 or $1,297,-494); chemical products from $16,209,820 to $17,498,128 or $1,288,308; and miscellaneous commodities from $14,699,783 to $16,428,376 or $1,728,593. From 1925 to 1926 exports of fibres and textiles decreased from $9,711,720 to $8,940,046 or $771,674.

### *Trade with the United Kingdom*

Canada's imports from the United Kingdom in 1926 were valued at $163,-710,431 and in 1925 at $151,083,946, the increase amounting to $12,626,485 or 8.3 per cent, while the exports were valued at $509,278,159, compared with an export trade in 1925 valued at $397,168,048, the increase from 1925 to 1926 amounting to $112,110,111 or 28.3 per cent. The exports of domestic produce in 1926 amounted to $508,249,576 and in 1925 to $395,843,433. The total trade of Canada with the United Kingdom for the fiscal year 1926, was valued at $672,-988,590, compared with $548,251,994 in 1925, indicating an increase during the year of $124,736,596 or 22.8 per cent. The increase in imports accounted for 10.2 per cent of the improvement of the total trade and exports for 89.8 per cent. Compared with 1921, the total trade with the United Kingdom shows an increase of $144,786,357. The increase was wholly in exports, as the imports show a decrease, the increase in exports amounting to $195,049,488, and the decrease in imports amounting to $50,263,131.

*Trade by Main Groups, 1926.*—The imports into Canada from the United Kingdom, from 1925 to 1926, by main groups, show an increase for each group except the fibres and textiles group. From 1925 to 1926 the agricultural and vegetable group increased from $28,265,980 to $34,603,501 or $6,337,521 (chiefly alcoholic beverages from $15,770,807 to $21,349,817 or $5,579,010); animals and products from $4,653,919 to $5,960,932 or $1,307,013 (butter, cheese and furs were chiefly responsible for this increase); wood and paper from $3,438,101 to $3,473,664; iron and its products from $17,794,428 to $17,905,166; non-ferrous metals from $4,010,443 to $5,303,872 or $1,293,429 (the increase being due to increased imports of electric apparatus and tin in blocks, pigs and ingots); non-metallic minerals from $9,648,724 to $14,226,799 or $4,578,075 (principally coal from $2,752,149 to $6,366,754 or $3,614,605); chemical products from $4,146,061 to $4,282,489; and miscellaneous commodities from $6,999,798 to $7,800,530.

The imports of fibres and textiles decreased from $72,126,492 to $70,153,478 or $1,973,014, the falling off in imports of cottons and raw wool being mainly responsible for this decrease.

The exports of Canadian produce to the United Kingdom from 1925 to 1926 increased from $395,843,433 to $508,249,576 or $112,406,143. Only four of the main groups of exports show increases out of a total of nine, viz: agricultural and vegetable products, animals and products, wood and paper, and iron and its products. Agricultural and vegetable products increased from $264,629,910 to $356,888,044 or $92,258,134 (chiefly wheat from $189,126,826 to $270,659,763 or $81,532,937; refined sugar from $6,584,561 to $16,257,487 or $9,672,926; and barley from $16,636,960 to $19,052,771 or $2,415,811); animals and products from $80,402,251 to $98,784,204 or $18,381,953 (under this group cheese increased from $22,658,418 to $31,115,093 or $8,456,675; meats from $24,613,041 to $30,660,807 or $6,047,766; and cattle from $9,125,667 to $12,432,954 or $3,307,287); wood and paper from $16,359,997 to $19,131,234 or $2,771,237 (this increase occurred in wood pulp and newsprint paper, the former increased from $1,290,877 to $2,997,888 or $1,707,011 and the latter from $540,709 to $1,195,915 or $655,206); and iron and its products from $6,689,169 to $8,307,441 or $1,618,272 (mainly automobiles), while the fibres and textiles group decreased from $2,145,762 to $1,244,060; non-ferrous metals from $16,868,927 to $15,885,946; non-metallic minerals from $1,276,405 to $1,220,494; chemical products from $3,805,628 to $3,318,614; and miscellaneous commodities from $3,665,384 to $3,469,539.

### *Trade with the United States*

In 1926 the imports from the United States were valued at $609,825,350 and in 1925 at $509,780,009, the increase from 1925 to 1926 amounting to $100,045,341 or 19.6 per cent, while the total exports to the United States in 1926 amounted to $485,854,896 and in 1925 to $427,184,643, the increase during the year being $58,670,253 or 13.7 per cent. The exports of Canadian produce were: 1926, $474,890,028 and 1925, $417,417,144. The total trade with the United States in 1926 totalled $1,095,680,246, compared with a similar trade in 1925 of $936,964,652, the increase amounting to $158,715,594 or 16.9 per cent. Imports accounted for 63 per cent of the total increase in the total trade and exports for 37 per cent. Compared with the year 1921, the total trade shows a decrease of $321,198,510, imports accounting for $246,351,470 of this decrease and exports for $74,847,040.

*Trade by Main Groups, 1926.*—The increase in the imports from the United States from 1925 to 1926, amounting to $100,045,341, occurred in eight of the nine main groups, but chiefly in the main groups, iron and its products, agricultural and vegetable products, and fibres and textiles. The imports under agricultural and vegetable products increased from $76,561,849 to $98,530,605 or $21,968,756 (under this group raw rubber increased from $7,508,145 to $25,885,990 or $18,377,845; and fresh fruits from $17,089,028 to $18,683,864 or $1,594,836); animals and products from $28,588,214 to $32,996,830 or $4,408,616 (principally raw hides from $5,069,914 to $6,839,246 or $1,769,332; furs from $6,579,312 to $8,216,543 or $1,637,231; and meats from $3,886,742 to $4,542,025 or $655,283); fibres and textiles from $64,002,595 to $79,115,464 or $15,112,869 (made up chiefly of raw cotton from $24,903,707 to $28,824,721 or $3,921,014; silk from $5,100,616 to $8,025,223 or $2,924,607; binder twine from $2,901,827 to $5,448,706 or $2,546,879; cotton goods from $10,951,046 to $12,791,963 or $1,840,917; manila and sisal grass from $1,841,427 to $3,505,346 or $1,663,919; and flax ,hemp and jute from $3,784,630 to $5,085,959 or $1,301,329); wood and paper from $32,653,591 to $34,715,231 or $2,061,640; iron and its products from $113,541,924

to $158,029,982 or $44,488,058 (mainly automobile parts from $14,114,959 to $23,010,491 or $8,895,532; farm implements from $6,270,141 to $13,051,503 or $6,781,362; rolling mill products from $25,454,164 to $31,384,417 or $5,930,253; automobiles from $9,879,766 to $15,543,180 or $5,663,414; engines and boilers from $6,608,912 to $12,108,770 or $5,499,858; and machinery from $22,211,345 to $27,177,066 or $4,965,721); non-ferrous metals from $33,297,222 to $38,911,-300 or $5,614,078 (largely copper from $5,789,936 to $7,206,837 or $1,416,901; electric apparatus from $12,528,021 to $13,744,765 or $1,216,744; manganese oxide from $290,751 to $1,170,760 or $880,009; and brass from $2,923,380 to $3,579,461 or $656,081); chemical products from $16,366,165 to $18,754,942 or $2,388,777, and miscellaneous commodities from $32,797,543 to $38,084,735 or $5,287,192. The imports of non-metallic minerals, however, decreased from $111,970,906 to $110,686,261 or $1,284,645. A falling off in the imports of coal was largely responsible for this decrease. Coal imports decreased from $59,945,986 to $49,449,136 or $10,496,850; while imports of coke increased from $3,494,804 to $6,421,886 or $2,927,082; crude petroleum from $20,625,509 to $23,173,062 or $2,547,553 and refined petroleum from $12,877,741 to $14,898,793 or $2,021,052.

The exports of domestic produce from Canada to the United States from 1925 to 1926 increased from $417,417,144 to $474,890,028 or $57,472,884. This increase occurred in eight out of the nine main groups, the fibres and textiles group only showing a decrease. Agricultural and vegetable products increased from $42,587,129 to $65,964,214 or $23,377,085 (chief increases occurred in the following commodities—seeds, from $9,390,028 to $16,340,565 or $6,950,537; alcoholic beverages from $11,610,169 to $17,995,758 or $6,385,589; wheat from $6,395,847 to $12,510,257 or $6,114,410; and potatoes from $260,662 to $5,161,253 or $4,900,591); animals and products from $57,833,090 to $63,559,623 or $5,726,533 (principally fresh milk and cream from $6,079,168 to $7,843,920 or $1,764,752; meats from $2,801,467 to $4,429,024 or $1,627,557; and cattle from $3,757,292 to $5,338,737 or $1,581,445); wood and paper from $220,056,988 to $237,898,369 or $17,841,381 (mainly newsprint paper from $89,121,407 to $96,072,497 or $6,951,090, planks and boards from $48,140,607 to $53,457,655 or $5,317,048; and wood pulp from $37,528,245 to $42,854,431 or $5,326,186); iron and its products from $5,063,148 to $7,582,833 or $2,519,685 (under this group farm implements increased from $1,259,184 to $2,122,749 and pigs, ingots and blooms from $1,259,184, to $2,122,749); non-metallic minerals from $12,943,-809 to $17,244,986 or $4,301,177 (asbestos, raw, increased from $5,073,720 to $6,819,255 or $1,745,535; and cement from $84,361 to $1,180,841 or $1,096,480; and coal from $1,565,651 to $2,136,975 or $571,324); chemical products from $7,826,076 to $9,204,155 or $1,378,079; and miscellaneous commodities from $8,878,087 to $10,258,431 or $1,380,344. The exports of fibres and textiles decreased from $4,894,415 to $4,621,774.

The statistics in the following table indicate the trend of Canadian trade from 1914 to 1926, (a) with all countries; (b) with the United Kingdom; and (c) with the United States.

## SUMMARY OF TREND OF CANADIAN TRADE, 1914 TO 1926

(Values in Millions of Dollars)

| Years ended March 31 | Imports into Canada | | | | Exports from Canada | | | Excess of Imports (i) Exports (e) | Percentage relation of Exports to Imports |
|---|---|---|---|---|---|---|---|---|---|
| | Dutiable Goods | Free Goods | Total Imports | Per Cent Free | Canadian Produce | Foreign Produce | Total Exports | | |

GEOGRAPHICAL DISTRIBUTION OF CANADA'S TRADE

It will be noted from the following table showing the "Trade of Canada by Continents, 1925 and 1926" that the continents of Europe and North America furnished Canada with 93.6 per cent of her imports in 1926, and took 88.5 per cent of her exports. The proportion received from Europe was 24.1 per cent and from North America 69.5 per cent, while the proportion sent to Europe was 49.3 per cent and to North America 39.2 per cent. The United Kingdom in 1926 took 38.6 per cent of Canada's exports, compared with 37.0 per cent in 1925, and the United States 36.1 per cent in 1926, as against 39.1 per cent in 1925. With reference to imports, the United Kingdom furnished Canada with 17.6 per cent of her imports in 1926 and the United States with 65.7 per cent, while in 1925 the proportions were: United Kingdom 19.0 per cent; United States 64.0 per cent.

TRADE OF CANADA, BY CONTINENTS, 1925 AND 1926

Since 1882 the United States has occupied first place in the Dominion's import trade, the United Kingdom being in second place. In 1926 the imports from the United States were valued at $609,825,350 or 65.7 per cent of the total imports. Next in order of importance were: United Kingdom, $163,710,431 or 17.6 per cent; France, $19,162,420 or 2.0¾ per cent; Cuba, $11,063,284 or 1.2 per cent; Germany, $9,981,019 or 1.0¾ per cent; Japan, $9,564,074 or 1.0½ per cent; British India, $9,477,453 or 1.0¼ per cent; Switzerland, $7,459,809 or 0.8 per cent; Belgium, $6,957,668 or 0.7¾ per cent; Netherlands, $6,854,219 or 0.7½ per cent; San Domingo, $6,791,339 or 0.7½ per cent; Peru, $5,700,109 or 0.6 per cent; Straits Settlements, $4,674,388 or 0.5 per cent; British Guiana, $4,501,912 or 0.5 per cent; Barbados, $4,130,822 or 0.4½ per cent; Jamaica, $3,783,481 or 0.4 per cent; Mexico, $3,684,460 or 0.4 per cent; Argentina, $3,411,748 or 0.3¾ per cent; Australia, $3,042,054 or 0.3¼ per cent; Ceylon, $2,747,442 or 0.3 per cent; New Zealand, $2,725,235 or 0.3 per cent; and Italy, $2,596,469 or 0.2¾ per cent.

In the export field the United Kingdom has once more moved up to first place. In 1925 and also in 1924 the United States occupied first place in Canada's export trade. The exports of Canadian produce to the United Kingdom in 1926 were valued at $508,249,576 or 38.6 per cent of the Dominion's total domestic exports. Next in order of importance were: United States, $474,890,028 or 36.1 per cent; Japan, $34,694,862 or 2.6½ per cent; Germany, $30,744,210 or 2.3½ per cent; China, $24,473,446 or 1.8½ per cent; Netherlands, $23,476,607 or 1.8¼ per cent; Belgium, $22,706,945 or 1.7¼ per cent; New Zealand, $16,561,344 or 1.2¾ per cent; Australia, $15,436,025 or 1.1¾ per cent; France, $13,952,262 or 1.0½ per cent; Italy, $12,788,653 or 0.9¾ per cent; Argentina, $12,639,706 or 0.9½ per cent; Newfoundland, $11,277,182 or 0.8½ per cent; British South Africa, $9,078,462 or 0.6¾ per cent; Cuba, $8,524,713 or 0.6½ per cent; British India, $7,420,708 or 0.5¾ per cent; Norway, $6,767,887 or 0.5¼ per cent; Denmark, $6,215,226 or 0.4¾ per cent; Brazil, $4,832,391 or 0.3¾ per cent; Irish Free State, $4,708,689 or 0.3½ per cent; Jamaica, $3,976,210 or 0.3 per cent; and Dutch East Indies, $3,881,792 or 0.3 per cent. Probably the most notable feature in the distribution of Canada's export trade was the movement of China from fifteenth position to fifth position. Japan occupies third position, moving up from fourth position, and Germany down to fourth.

### *Expansion of Canada's Export Trade*

Within the past few years the production of wheat in Canada has reached such proportions that Canada has definitely established her position as one of

the great wheat exporting countries of the world. The production of wheat in 1925 was so great that the value of Canada's wheat exports in 1926 ($364,201,-388) was larger than the value of the total exports of Canadian produce in the year 1913 ($355,754,600). Canada has made great strides in recent years in the production and export of many other commodities, as the following table re "Principal Canadian Commodities Exported, 1926, with Portions shipped to the United Kingdom and the United States" indicates. It will also be observed from this table that the principal exports to the United Kingdom consisted of wheat, cheese, meats, barley, wheat flour, refined sugar, cattle and oats, while the principal exports to the United States consisted of paper, planks and boards, wood pulp, raw gold, fish, flaxseed, copper, whiskey, wheat, raw furs and laths.

PRINCIPAL CANADIAN COMMODITIES EXPORTED

With Portions Shipped to the United Kingdom and the United States

NOTE.—Commodities arranged in order of importance of total Exports.

| Rank | Commodity | Total Exports (Canadian) | Exports to United Kingdom | Exports to United States |
|---|---|---|---|---|
| | | $ | $ | $ |
| 1 | Wheat | 364,201,388 | 270,659,763 | 12,510,257 |

*Trade of Canada with Overseas Countries via the United States*

In recent years Canada's imports from overseas countries, and especially from the United Kingdom, via the United States, have steadily declined, while the exports have increased materially. In 1914 the total imports from overseas countries via the United States amounted to $22,798,268 and in 1924 to $14,219,285, while the exports via the United States in 1914 totalled $114,994,166 and in 1926 to $329,951,986, the imports showing a decrease of $8,578,983 and the exports an increase of $214,957,820. The statistics in the following table showing "Imports into Canada via the United States" indicate that there was a slight increase in the imports via the United States in 1926 compared with 1925, which occurred principally in the imports from the Empire, the increase from the United Kingdom amounting to $1,298,534 and from other parts of the Empire to $2,480,828.

IMPORTS INTO CANADA VIA THE UNITED STATES

| Imports from | Years ended March 31 | | | |
|---|---|---|---|---|
| | 1923 | 1924 | 1925 | 1926 |
| | $ | $ | $ | $ |
| United Kingdom, via United States | 2,914,881 | 932,224 | 554,532 | 1,853,066 |
| Per cent of total imports from United Kingdom | 2·1 | 0·6 | 0·4 | 1·1 |
| Other British Empire via United States | 4,524,595 | 4,925,615 | 3,779,361 | 6,260,189 |
| Per cent of total imports from other British Empire | 11·8 | 11·8 | 8·6 | 14·2 |
| Foreign countries via United States | 5,419,297 | 8,032,644 | 7,281,781 | 6,106,030 |
| Per cent of total imports from foreign countries | 6·6 | 8·3 | 7·9 | 5·5 |
| Total imports via United States | 12,858,773 | 13,890,483 | 11,615,674 | 14,219,285 |
| Per cent of total imports from overseas countries | 4·9 | 4·7 | 4·2 | 4·5 |

The exports to overseas countries via the United States represent on the average about 40 per cent of the total exports to overseas countries. The figures in the table below showing "Exports from Canada via the United States" indicate that the proportion shipped to overseas countries via the United States in 1923 was 41.1 per cent and in 1926, 39.2 per cent. From 1924 to 1926 the exports to the United Kingdom via the United States show an increase of $85,051,150, to other parts of the Empire $1,341,554, and to foreign countries $19,880,892.

EXPORTS FROM CANADA VIA THE UNITED STATES

| Exports to | Years ended March 31 | | | |
|---|---|---|---|---|
| | 1923 | 1924 | 1925 | 1926 |
| | $ | $ | $ | $ |
| United Kingdom via United States | 178,966,431 | 152,276,836 | 173,556,264 | 237,327,986 |
| Per cent of total exports to United Kingdom | 47·1 | 42·1 | 43·7 | 46·6 |
| Other British Empire via United States | 13,983,246 | 20,815,847 | 18,350,573 | 22,157,401 |
| Per cent of total exports to other British Empire | 22·9 | 26·9 | 23·1 | 24·3 |
| Foreign countries via United States | 39,369,092 | 50,585,707 | 65,452,730 | 70,466,599 |
| Per cent of total exports to foreign countries | 31·8 | 28·3 | 36·9 | 29·1 |
| Total exports via United States | 232,318,769 | 223,678,390 | 257,359,567 | 329,951,986 |
| Per cent of total exports to overseas countries | 41·1 | 36·2 | 39·3 | 39·2 |

It will be noted from the statistics in the following table showing "Principal Canadian Commodities Exported from Canada to the United Kingdom with Portions Shipped via the United States" that from 1925 to 1926 the exports via the United States increased from $173,556,264 to $237,327,986, proportions being 43.7 and 46.6 per cent respectively. The volume of the exports in 1926 was greater than in 1925. The principal exports to the United Kingdom via the United States consist of wheat, barley, bacon and hams, oats, wheat flour, refined sugar, and rye.

## PRINCIPAL CANADIAN COMMODITIES EXPORTED FROM CANADA TO THE UNITED KINGDOM

(Years ended March 31, 1925 and 1926)

NOTE:—Commodities arranged in order of importance of Exports, 1926.

| Commodities | | Total Exports to United Kingdom | | Exports to United Kingdom via United States | | Percentage of Total via United States | |
|---|---|---|---|---|---|---|---|
| | | 1925 | 1926 | 1925 | 1926 | 1925 | 1926 |

### *Canada's Position in International Trade*

Canada has materially improved her position in international trade since 1913. In 1913 Canada occupied eighth position among the principal importing countries of the world and in 1925 she was still in eighth position, being exceeded by the United Kingdom, the United States, Germany, France, Italy, Japan, and the Netherlands. The figures follow:—

| Calendar Year, 1913 | | Calendar Year, 1925 | |
|---|---|---|---|
| Countries | $ | Countries | $ |
| United Kingdom | 3,207,951,000 | United Kingdom | 5,641,099,000 |
| Germany | 2,563,331,000 | United States | 4,136,870,000 |
| United States | 1,756,863,000 | Germany | 2,957,899,000 |
| France | 1,625,317,000 | France | 2,097,670,000 |
| Netherlands | 1,575,036,000 | Italy | 1,042,353,000 |
| Belgium | 894,865,000 | Japan | 1,037,681,000 |
| Italy | 703,608,000 | Netherlands | 986,514,000 |
| Canada | 659,064,000 | Canada | 878,155,000 |

On the other hand, among the leading export countries of the world, Canada stood in tenth place in 1913, but in 1925 she had advanced to sixth place, being surpassed by the United States, the United Kingdom, France, Germany, and British India. The figures follow:—

| Calendar Year, 1913 | | Calendar Year, 1925 | |
|---|---|---|---|
| Countries | $ | Countries | $ |
| United Kingdom | 2,556,234,000 | United States | 4,818,271,000 |
| United States | 2,448,284,000 | United Kingdom | 3,732,351,000 |
| Germany | 2,402,967,000 | France | 2,166,227,000 |
| France | 1,327,882,000 | Germany | 2,094,024,000 |
| Netherlands | 1,230,368,000 | British India | 1,456,661,000 |
| British India | 781,947,000 | Canada | 1,270,987,000 |
| Belgium | 701,475,000 | Japan | 894,693,000 |
| Italy | 484,746,000 | Argentina | 837,552,000 |
| Argentina | 465,582,000 | Australia | 739,500,000 |
| Canada | 436,218,000 | Italy | 728,244,000 |

In export trade per capita, Canada stood second in 1925 among the leading exporting countries, as compared with seventh in 1913. In 1925 the Dominion was surpassed by only New Zealand. The figures follow:—

| Calendar Year, 1913 | | Calendar Year, 1925 | |
|---|---|---|---|
| Countries | $ cts. | Countries | $ cts. |
| Netherlands | 201 71 | New Zealand | 188 32 |
| New Zealand | 97 01 | Canada | 135 73 |
| Belgium | 92 55 | Australia | 124 74 |
| Australia | 74 78 | Denmark | 113 42 |
| Switzerland | 70 25 | Switzerland | 100 63 |
| Denmark | 61 55 | Netherlands | 98 71 |
| Canada | 57 35 | Belgium | 89 57 |

## Summaries of the Trade of Canada

The following tables, supplied by Mr. W. A. Warne, Chief, External Trade Statistics Branch, give summaries of the trade of Canada, and comparison of the trade of the principal countries of the world:—

1. Trade of Canada by Main Groups, fiscal years 1914, 1921, 1924, 1925 and 1926.
2. Trade of Canada with the United Kingdom by Main Groups, fiscal years 1914, 1921, 1924, 1925 and 1926.
3. Trade of Canada with the United States by Main Groups, fiscal years 1914, 1921, 1924, 1925 and 1926.
4. Trade of Canada by Principal Countries, fiscal years 1914, 1921, 1924, 1925 and 1926.
5. Canadian Exports to Principal Countries, fiscal years 1880, 1890, 1900, 1910, 1914, 1921, 1924, 1925 and 1926.
6. Comparison of the Trade of the Principal Countries of the World, calendar years 1913 and 1925.

## 1. TRADE OF CANADA BY MAIN GROUPS

| Main Groups | Years ended March 31 | | | | |
|---|---|---|---|---|---|
| | 1914 | 1921 | 1924 | 1925 | 1926 |
| *Imports for Consumption* | $ | $ | $ | $ | $ |
| Agricultural and vegetable products | 97,617,642 | 259,431,110 | 186,468,685 | 173,585,839 | 203,417,431 |
| Animals and animal products | 41,092,915 | 61,722,390 | 45,026,734 | 41,491,969 | 49,259,558 |
| Fibres, textiles and textile products | 109,153,861 | 243,608,342 | 173,795,660 | 165,440,757 | 184,761,831 |
| Wood, wood products and paper | 37,397,394 | 57,449,384 | 40,976,833 | 38,185,383 | 40,403,096 |
| Iron and its products | 143,864,735 | 245,625,703 | 173,473,503 | 134,684,441 | 181,196,800 |
| Non-ferrous metal products | 35,574,404 | 55,651,319 | 43,432,617 | 41,111,550 | 47,692,985 |
| Non-metallic mineral products | 85,288,957 | 206,095,113 | 155,899,393 | 131,013,294 | 139,033,940 |
| Chemicals and allied products | 17,072,924 | 37,887,449 | 26,088,041 | 24,760,237 | 28,404,276 |
| Miscellaneous commodities | 52,131,166 | 72,688,072 | 48,205,401 | 46,659,067 | 53,232,815 |
| Total imports | 619,193,998 | 1,240,158,882 | 893,366,867 | 796,932,537 | 927,402,732 |
| Dutiable imports | 410,258,744 | 847,561,406 | 591,299,094 | 516,014,455 | 583,051,670 |
| Free imports | 208,935,254 | 392,597,476 | 302,067,773 | 280,918,082 | 344,351,062 |
| Duty collected on imports | 107,180,578 | 174,775,787 | 135,122,345 | 120,222,454 | 143,933,111 |
| *Exports (Canadian)* | | | | | |
| Agricultural and vegetable products | 201,189,775 | 482,140,444 | 430,932,150 | 443,298,877 | 605,895,672 |

## The Commercial Intelligence Service

The Commercial Intelligence Service is that branch of the Department of Trade and Commerce which is designed and maintained to assist Canadian exporters in finding and developing markets abroad. It is essentially a *service* department of the Canadian Government. Its primary purpose is to bring together the domestic seller and the foreign buyer for the sale of Canadian products and to co-operate with the commercial community to build up the volume of Canada's foreign trade.

One of the principal requirements of the exporter is a constant supply of reliable information regarding the quality and the extent of those outside markets in which he is interested. Local conditions and tendencies in distant markets; foreign production figures; import and export statistics; the means of approach and the ways of distribution; statutes relating to tariffs, currency movements, corporation laws, patent and trade mark legislation; regulations affecting commercial travellers and those affecting the labelling and packing of foodstuffs; the status of embargoes; sales and stamp taxes; transportation and freight rates; on these and related subjects no Canadian firm—or for that matter no group of firms—is in a position to provide such a service of specialized fact-finding on the one hand and of active co-operation on the other as is necessary to enable them to take full advantage of openings as they arise for the extension of their trade in foreign fields. And it was for this purpose that the Commercial Intelligence Service was organized.

### *Present Service*

At the present time twenty-three Trade Commissioner offices are maintained, located at various strategic centres, and covering all the more important markets of the world. Each office is in charge of a Trade Commissioner who is well versed in business methods as well as being an economist, who is thoroughly familiar with Canadian resources and industries as well as with market conditions in the territory in which he is stationed. He is thus in a position to give Canadian exporters the benefit of his advice on the absorptive capacity of the market so far as it relates to Canadian goods.

In addition to the assistance which is rendered by the Canadian Trade Commissioners there is a special arrangement which was arrived at in 1912, through the Secretary of State for the Colonies, whereby the services of the British commercial diplomatic officers, as well as those of British Consuls are available for Canadian firms seeking overseas trade openings in countries where Canada is not represented by a Trade Commissioner.

Through the wide ramifications of the department's connections two major functions are served. One is a worldwide system of commercial intelligence. The other is the distribution of this intelligence where it can be capitalized to the best advantage of the Canadian exporter.

Any bona fide firm or individual in Canada engaged in the export of Canadian products can make use of the Commercial Intelligence Service at all times free of charge. Its aim is to assist the Canadian manufacturer or exporter with specific information on foreign markets without interfering in the actual business of any exporter, which is naturally his own affair.

### *Foreign Service*

The outside service is made up of three classes of officers. These are Junior Trade Commissioners, Assistant Trade Commissioners, and Trade Commissioners. The Junior Trade Commissioners are the cadets of the service and they retain this rank during their period of probation and training in Canada, which is ordinarily for a period of one year or two years. They are recruited through the

Civil Service Commission by means of competitive examination. They must be university graduates; have a general familiarity with the resources and industries of the Dominion; the necessary personality and ability; have preferably three years of business experience; and be thoroughly imbued with the patriotic ambition singlemindedly to serve Canada. Their duties are to engage in a course of instruction in foreign trade under the Director, Commercial Intelligence Service, for the purpose of becoming qualified to fill the position of Assistant Trade Commissioners. This course consists of dealing with correspondence and other related matters at the department in Ottawa; in familiarizing themselves with Canadian industries and particularly with those products which are saleable in foreign markets; in making statistical and other reports on the trade of foreign countries and on Canadian trade and industries; and in making personal calls on Canadian manufacturers and exporters.

Junior Trade Commissioners after a satisfactory period of service in that capacity are promoted to overseas offices as assistants where they serve a further apprenticeship under a Trade Commissioner. In due course, as vacancies occur, they are promoted to the full rank of Trade Commissioner in charge of an office abroad, in which the Commissioner is placed as a trade missionary for the extension of the Dominion's export trade.

In order that they may be kept abreast of conditions in the Dominion, Trade Commissioners return to Canada at stated intervals when they make a tour of the country, refamiliarizing themselves with industry and calling on manufacturers and exporters in the interests of Canadian trade with the country where they are stationed.

### *The Trade Commissioner's Limitations*

Trade Commissioners, it need hardly be stated, cannot take the place of individual representatives of private firms, nor can they bring negotiations to a conclusion. The Trade Commissioner is an official, and must not involve his Government in commercial transactions which are beyond its functions. He exists to encourage trade—not to trade. As a Trade Commissioner he has no definite proposal or bargain to offer; he cannot himself create trade; but he can point out the manner in which it may be created.

### *The Twenty-Three Offices*

The Commercial Intelligence Service maintains twenty-three permanent Trade Commissioner offices in the important commercial countries of the world. The following are the regional divisions and countries, with the cities, in which offices have been placed:—

*Great Britain, The Dominions, Colonies and Dependencies*

United Kingdom, London: (covering Home counties, Southeastern counties and East Anglia).
Liverpool (covering North of England, Lincolnshire, North Midlands, and North Wales).
Bristol (covering West of England, South Wales and South Midlands).
Glasgow (covering Scotland and Northern Ireland).
Irish Free State (Dublin).
Australia (Melbourne).
New Zealand (Auckland).
South Africa (Cape Town).
British West Indies—Port-of-Spain, Trinidad (covering Barbados, Windward and Leeward Islands, British Guiana, Porto Rico and Venezuela).
Jamaica (covering Bermuda and the Bahamas, Cuba, Hayti, San Domingo, Central American States, and Colombia).
India and Ceylon (Calcutta).

*The Americas*

United States (New York).
Mexico (Mexico City).
Argentina (Buenos Aires).
Brazil (Rio de Janeiro).

*Europe*

France (Paris).
Belgium (Brussels).
Germany (Hamburg: covering Russia, the countries on the eastern shore of the Baltic, Poland and Czecho-Slovakia).
Holland (Rotterdam).
Italy (Milan: covering all the Mediterranean countries with the exception of France).

*Asia*

China (Shanghai).
Japan (Kobe).
Netherlands East Indies—Batavia, Java: covering Straits Settlements, Federated Malay States, Indo-China, and Siam.

While it will be seen that in many cases the Trade Commissioners have wide fields to cover, their location in many cases greatly facilitates this. Take Hamburg as an example. This free city with its unrivalled port facilities is an entrée port for the whole of Central Europe, with the buying offices of many of the largest German, Austrian, Czecho-Slovakian, and even Balkan firms located there. Thus the office at this point is particularly well situated with regard to all these countries. Similarly Trinidad in the British West Indies is particularly well situated as a distribution point for the eastern group of islands and the adjacent coast of South America.

Each Trade Commissioner makes a tour of his territory periodically, with the definite object of obtaining connections for Canadian firms; of investigating the possibilities of marketing Canadian products; and of establishing liasion with the officers of the British Commercial Diplomatic Service and the British consular officers in the different centres.

### *Organization at Ottawa*

Besides the overseas organization of the Commercial Intelligence Service, there is the headquarters staff at Ottawa. This is presided over by the Director, who is the head of the Service and administers and unifies the work assigned to the various Trade Commissioners. In addition there is the Inspector of Trade Commissioner Offices; and the following divisions: Secretarial; Trade Inquiries; Editorial; Foreign Tariffs; and the division handling the Directory of Canadian Exporters and Foreign Importers.

### *Director and Inspector*

The post of Director of the Commercial Intelligence Service, which has been vacant since April 1, 1924, was filled on October 3, 1925, by the appointment of Mr. W. McL. Clarke, formerly Trade Commissioner at Milan.

Mr. A. E. Bryan, formerly Trade Commissioner at Kobe, Japan, was promoted to the post of Inspector of the Canadian Trade Commissioner Service, on September 9, 1925, to fill the post which had been formerly occupied by Mr. W. J. Egan, now the Deputy Minister of the Department of Immigration and Colonization.

### *Promotions*

Mr. C. M. Croft, Assistant Trade Commissioner at Auckland, New Zealand, and who had been in charge of the office after the retirement of Mr. W. A. Beddoe on March 31, 1924, was promoted to Trade Commissioner on September 1, 1925.

Mr. Yves Lamontagne, Assistant Trade Commissioner, was promoted to be Trade Commissioner at Brussels, November 16, 1925, vice Mr. A. S. Bleakney, transferred to Rio de Janeiro.

Mr. J. A. Langley, Assistant Trade Commissioner, was promoted to be Trade Commissioner at Kobe, November 16, 1925, vice Mr. A. E. Bryan, appointed Inspector, Trade Commissioner Service.

Mr. R. S. O'Meara, Assistant Trade Commissioner at Cape Town, was promoted to be Trade Commissioner at Batavia, Java, January 20, 1926.

*Transfers*

Mr. H. R. Poussette, Trade Commissioner at Port of Spain, Trinidad, is being transferred to Calcutta, and is proceeding to India via Canada for the purpose of meeting Canadian firms interested in trade with the West Indies and India itself.

Mr. A. S. Bleakney, Trade Commissioner at Brussels, was moved to Rio de Janeiro, December 26, 1925.

Mr. A. B. Muddiman, Trade Commissioner at Singapore, Straits Settlements, is being transferred to Rotterdam, and was brought back to Canada before taking up the work of his new office.

Mr. F. H. Palmer, Trade Commissioner at Rotterdam, is being transferred to Milan, and will proceed to Italy after Mr. Muddiman's arrival in Holland.

Mr. P. W. Cook, Trade Commissioner at Rio de Janeiro, was moved to Kingston, Jamaica, February 2, 1926.

Mr. James Cormack, Trade Commissioner at Kingston, was transferred to Port of Spain, February 26, 1926.

*Appointments of Junior Commissioners*

During the year Messrs. F. W. Fraser, J. C. Macgillivray, C. S. Bissett, Richard Grew, and H. C. Suydam were selected by the Civil Service Commission for duty as Junior Trade Commissioners.

*Retirements*

Mr. H. A. Chisholm, Trade Commissioner at Calcutta, India, resigned from the service on October 1, 1925, to enter the Foreign Department of the Sun Life Assurance Company of Canada.

*New Offices*

The Singapore office was opened in November, 1921, and the Trade Commissioner in charge was given supervision over the Straits Settlements, British Borneo, the Netherlands East Indies, and Siam. As Batavia is no less accessible from Canada than Singapore, and in line with the policies of such other governments as Great Britain, the United States, Australia, Japan, and France, which have moved their trade offices for the Middle East from Singapore to Batavia, it was decided this past year to close the Singapore office and open another at Batavia. Java serves a territory with a population of over 35,000,000, in comparison with three and a half millions in the Straits Settlements, and the same territory can be worked as advantageously from Java as from the other centre.

Mr. A. B. Muddiman, who succeeded Mr. Ward (the first Trade Commissioner at Singapore) in February, 1923, is to be transferred to Rotterdam, and has been replaced by Mr. R. S. O'Meara, formerly Assistant Trade Commissioner at Cape Town.

*Official Visits of Trade Commissioners to Canada*

Mr. L. D. Wilgress, Trade Commissioner at Hamburg, arrived in Canada on April 26, 1925, and after an official tour returned to Germany on August 5.

Lt.-Col. Hercule Barré, Trade Commissioner at Paris, made an official visit to Canada from May 8 to July 6, 1925, when he returned to France.

Mr. H. A. Chisholm, Trade Commissioner at Calcutta, made a tour of Canada from June 15 to September 1, 1925.

Mr. A. B. Muddiman, formerly Trade Commissioner at Singapore, arrived at Vancouver, February 24, 1926, and made an official visit throughout Canada before taking up his new duties as Trade Commissioner at Rotterdam.

Mr. H. R. Poussette, formerly Trade Commissioner at Port of Spain, arrived at St. John, March 24, 1926, and has been visiting various centres in Eastern, Central, and Western Canada before proceeding to Calcutta from Vancouver.

Mr. D. H. Ross, Trade Commissioner at Melbourne, after the completion of an official visit to Canada in 1924, was sent on a special mission to the British West Indies and returned to Australia on May 13, 1925.

*Special Tours of Trade Commissioners*

Mr. James Cormack, Trade Commissioner at Kingston, visited the Bahamas and British Honduras from August 17 to September 7, 1925.

Mr. A. B. Muddiman, Trade Commissioner at Singapore, visited Penang (Straits Settlements), Bangkok (Siam), and French Indo-China from August 15 to September 30, 1925.

Mr. L. D. Wilgress, Trade Commissioner at Hamburg, undertook a special trade mission to Denmark during part of February and March, 1926.

Mr. E. L. McColl, Trade Commissioner at Buenos Aires, left his post February 14, 1926, in order to make a special inquiry into Canadian trade opportunities in Peru, which mission occupied the month of March, 1926.

Mr. H. R. Poussette, formerly Trade Commissioner at Port of Spain, Trinidad, visited Barbados, British Guiana, the Windward and Leeward Islands, and the French West Indies between October, 1925, and the end of February, 1926.

*Special Negotiations*

Mr. W. McL. Clarke, formerly Trade Commissioner at Milan, and now Director, Commercial Intelligence Service, was in Madrid during April and May, 1925, in connection with the negotiation of a commercial agreement between Canada and Spain, and after protracted negotiations there was signed, on April 11, 1925, a *modus vivendi* whereby the Canadian Intermediate Tariff was exchanged for the second column of the Spanish Tariff. Canadian exports to Spain have increased from $178,096 in the twelve months ending March, 1925, to $832,547 during the present fiscal year (1926).

Mr. Clarke was later sent to Athens, viz., in June, 1925, to endeavour to persuade the Greek Government to cancel the chemical restrictions imposed on imported flour which were seriously interfering with Canadian flour exports to Greece. The Greek Government in August, 1925, removed the restrictions on patent grades, and during January, 1926, the restrictions on other grades of flour were removed entirely.

*Special Duties*

Mr. J. Forsyth Smith, Trade Commissioner at Liverpool, was one of the two Canadian delegates on the Imperial Economic Committee. This committee has held regular sessions in London every week throughout the past year.

Mr. D. H. Ross, Trade Commissioner at Melbourne, acted on behalf of the Department of Immigration and Colonization as the Canadian Government Exhibition Commissioner at the New Zealand and South Seas International Exhibition.

Mr. Yves Lamontagne, Assistant Trade Commissioner at Brussels, was assigned to special duties in connection with the British Empire Exhibition at Wembley, having charge of what was known as the Information Bureau. All visitors to the Canadian Pavilion who expressed an interest in the purchase of Canadian goods were dealt with by Mr. Lamontagne. The trade inquiries resulting were referred to Trade Commissioners in the countries concerned for the completion of negotiations. This method had the double advantage of assuring the foreign importer of the assistance of the department based upon its knowledge of Canadian manufacturers and shippers, and also enabling the Trade Commissioner concerned to investigate the status of the inquiring firm before referring it to Canada.

The routine inquiries covered a wide range of questions, including customs duties; transportation facilities; port conditions; factory practice; raw materials; partly manufactured products; taxation; Dominion Government Acts; business procedure; banking; packing, etc. A wide use of data available through the department was also made by trade associations and similar organizations in the United Kingdom.

Mr. C. M. Croft, Trade Commissioner at Auckland, was instructed to open a temporary office at Dunedin during the progress of the New Zealand and South Seas Exhibition. His work was similar to that of Mr. Lamontagne at Wembley.

Mr. Palmer represented the Canadian Government at the Conference of the International Union for the Protection of Industrial Property at the Hague in October, 1925.

Mr. Frederic Hudd, Trade Commissioner at New York city, represented Canada at the Pan-American Commercial Congress in New York from December 14 to 17, 1925.

Mr. J. J. Guay, Acting Trade Commissioner at Milan, represented the Department of Trade and Commerce at the International Conference of Statistics held at Rome during the month of October, 1925.

Mr. A. E. Fortington, Chief of the Trade Inquiries Division of the Commercial Intelligence Service, Ottawa, was sent to Cuba in September, 1925, on a special mission to investigate the conditions surrounding the marketing of Canadian potatoes. He returned to Ottawa on February 10, 1926.

### *Work Accomplished by the Commercial Intelligence Service*

The Commercial Intelligence Service has prepared and transmitted for publication in the *Commercial Intelligence Journal* over 500 special and detailed commodity and economic reports and has despatched over 600 comprehensive and authoritative reports direct to Canadian manufacturers. The Canadian Trade Commissioners have canvassed, during 1925, in the interests of Canadian exporters, about 1,600 foreign firms, and have brought to the attention of Canadian producers and manufacturers this number of definite business opportunities abroad, supporting each trade opening by status information on the firm wishing to do business with Canada; and have been the means of establishing throughout the world for Canadian exporters during that year about 700 business connections. The Canadian Trade Commissioners have had approximately 30,000 interviews in most of the principal languages of the world with foreign business men; and together with head office the service has dictated well over 100,000 business letters last year in various languages and all in the interests of our export trade.

One of the Canadian Trade Commissioners in the United Kingdom was successful in placing orders for various Canadian firms to the extent of over $600,000; another to the extent of $420,000; another Trade Commissioner elsewhere to the extent of $200,000; another to the extent of $100,000, and so on throughout the service. In this calculation there is no allowance for the repeat

orders which have resulted from connections established by Canadian Trade Commissioners in preceding years. In one particular instance an initial order obtained by one of the Trade Commissioners for $18,000 worth of a certain Canadian product in 1925 resulted in repeat orders to the extent of $300,000 last year.

*What Exporters Think of the Service*

Every day it is becoming increasingly evident that there is a better understanding among Canadian business men of export methods, of credits and agencies abroad, and all the manifold matters which enter into export trade. More intelligent and comprehensive inquiries are addressed to the Department and an increasing interest is being displayed in the opportunities that open up for Canadian exporters. This is especially true of many of the smaller firms, who have hitherto shown little desire to go beyond the confines of the domestic field.

The *Commercial Intelligence Journal*, with its full and comprehensive reports on trade possibilities in every foreign market of any importance, is keeping the Canadian business man supplied with practical trade information from all over the world and his reaction to this service is ample evidence of its value.

While it is more often impossible to estimate actually the results obtained by the Commercial Intelligence Service on a basis of dollars and cents, it is clear that the Trade Commissioner Service is appreciated by a larger number of exporters from the increasing number of letters of appreciation which they have written this last year to the department. A few extracts from these unsolicited testimonials will be illuminating.

One Trade Commissioner was responsible for placing an order amounting to $84,875 for chemicals with a Canadian firm, which wrote as follows:—

"This order reached us when we were urgently in need for business, and we feel greatly indebted to you for the manner in which the transaction was handled. You will be interested in knowing that this inquiry was in the hands of at least three manufacturers and as many more brokers in another country. In the face of this we were indeed fortunate in having secured the business and we recognize the fact that we have you alone to thank."

A large firm of tire and rubber goods manufacturers which the department had assisted in making foreign connections wrote:—

"We would like at this point to express our sincere appreciation of the most excellent co-operation received from you in getting our lines placed and the great care you have exercised in safeguarding our interests. We do not feel that, had we our own representative on the spot, more care would have been or could have been taken in the selection of an outlet for us."

An official of a Canadian manufacturing company recently made the following statement when addressing a meeting on matters pertaining to export trade:—

"Our Trade Commissioners are all first-class salesmen and thoroughly trained to find and interest the best outlets for every Canadian product. Our own experience has been in many cases that these Trade Commissioners have been able to effect far better connections for us than we could have done ourselves, to say nothing of the saving to us of time and expense. The result of this policy in our case has been continued production at our plant, day and night, during the past three years. More than 30 per cent of our output is sold outside of Canada, and we have never seen one of our present foreign representatives or customers."

The department received the following letter from the executive head of a large Ontario corporation after his return from a business trip abroad:—

"The writer has returned from a five-months' trip abroad and wishes to take this opportunity of expressing to you his appreciation of the way in which he has been received by the Trade Commissioners in the various countries which he has visited. The writer is of the opinion that Canadians are not taking full advantage of the services your department is able to give."

A manufacturer of foodstuffs writes:—

"The untiring efforts of your Trade Commissioner in getting us in touch with the right people has been of immense value to us."

A manufacturer of confectionery writes:—

"We are shipping our goods to practically all the British colonies and many foreign countries besides. What the Canadian Trade Commissioners in the field have already accomplished for us is greatly appreciated and has made our export business possible."

A packing and provision company writes as follows:—

"We wish to state here that we appreciate very much the services rendered us by your department and that if it were not for these services we could not obtain any export business as our business is not financially capable of going after it."

An exporter of apples writes:—

"I wish to tender to you my grateful thanks for the various 'Trade Inquiries for Canadian Apples' which you have sent to me from time to time. I have answered all of them, and they have been the means of my selling the whole of my apple crop this year of 3,000 barrels, also in addition 5,000 barrels from other orchards. I am steadily building up a good export business and shall be further indebted to you if you will continue to send me any inquiries for apples, fresh or dried; also Canadian cheese and eggs."

A manufacturer of concentrated cider writes:—

"*Re* sale of concentrated cider, we certainly appreciate the work done by your Trade Commissioner. This has been the means of placing about 100,000 gallons of cider as it comes from the press—that is to say when it is concentrated it will take all of our surplus this year, whereas in years past we have had to sell our hard cider really at a loss. This sale out of our concentrated will give us a nice profit out of our cider this season, and we will thank you to write to your Trade Commissioner and express our appreciation for the work he has done in assisting us in placing these goods."

### *Modern Export Practice*

In the deepening of the channels of Canadian foreign commerce, and in the extension of the Dominion's export trade to new areas, it is to be recommended that Canadian exporters follow along the lines of modern export practice, conscious that the markets of the world are being contested oftentimes by nearer purveyors and that the accommodation given by Canadian exporters will in a large measure determine any impact Canada will make. One courts failure in the export fields if, *inter alia*, English is always written where it is not understood; if there is inattention to foreign correspondence; if quotations, for countries where the metric system is the standard of measurement, are in yards, feet and inches, or if f.o.b. Oshawa, Sherbrooke, or other inland points are quoted; if cash is always demanded with order; if there is a falling down on contracted deliveries; if reasonable co-operation with the carefully selected agent abroad is refused, or if an intermittent exportation is carried on. There are three cardinal and determining factors in the export world—price, quality, and service—and not the least of these is service.

## Tariffs and Trade Agreements

The volume of new tariff legislation enacted throughout the world during the last fiscal year was heavy. Foreign customs duties in some countries, notably in Europe, were modified also to a large extent by commercial treaties. Countries in this way establish duties on particular kinds of goods, lower than their general tariffs. Such treaties on account of the operation of most favoured nation clauses often have a far-reaching effect on statutory tariffs thus altering the level of duties actually applied to imports.

Among the countries which adopted completely revised tariffs during the period under review may be mentioned: Union of South Africa, new tariff introduced and made effective April 8, 1925, and finally adopted July 30; Newfoundland, new tariff introduced and made effective April 9, 1925, and finally passed May 7; Jugo-Slavia, new tariff came into force June 20, 1925; Netherlands, new tariff came into force July 1, 1925; and Greece, tariff law of December 22, 1923, brought into force on January 1, 1926.

Partial revisions of tariffs are sometimes so extensive that it is scarcely practicable to make a distinction between the revision and a new tariff. An Australian tariff amendment was introduced September 2, 1925, and made effective, next day, in the case of proposed new duties which were higher than those previously in operation. The amendment changed the rates on about 75 main items, some of which are much sub-divided. Approximately 400 items of the German tariff were affected by a revision which became operative, with a few exceptions, as from October 1, 1925. A Bill was presented to the Chamber of Deputies in France on February 23, 1926,* providing for an increase of 30 per cent on specific duties. In Japan a schedule of new import duties went into force on March 29, 1926, which substantially altered the basic tariff of that country.

The South African tariff law, above mentioned, was of special importance to Canada as it involved a new system for granting preferences. Formerly the tariff consisted of a single schedule of duties. There was provision for a preferential rebate on nearly all items. In the case of goods subject to ad valorem duty, the rebate was 3 per cent ad valorem. Canada enjoyed the benefit of all preferences. The revised tariff consists of two columns, one being a list of maximum, and the other, a list of minimum duties. Under the new system, the preference accorded to Canada is the minimum rate on a selected list of commodities involving thirteen tariff items. The former concessions on merchandise in general terminated on July 30, 1925, when the new tariff law was fully enforced.

In the United States a few changes in duty were made under the so-called "flexible provision" of the Tariff Act of 1922. Of most interest to Canada was the increase in the duty on butter from 8 cents per pound to 12 cents, announced by proclamation of March 6, 1926, to become effective thirty days afterwards.

The "McKenna duties" in the United Kingdom, which had been allowed to expire on August 2, 1924, became operative again on July 1, 1925. These consist of a levy of 33⅓ per cent ad valorem on motor cars, motor cycles, musical instruments, watches and clocks, and parts of these articles, as well as specific duties on cinematograph films. There is a tariff preference of one-third of the full rate on these articles when of Empire origin. The 1925 United Kingdom budget also established new duties with a preference of one-third on lace and embroidery, and new duties with a preference of one-sixth on silk and artificial silk, and manufactures thereof. Under the Safeguarding of Industries (Customs Duties) Act which came into force on December 22, 1925, a 33⅓ per cent duty was imposed on certain cutlery and gloves, while mantles for incandescent lighting were made subject to specific duties. An Empire preference of one-third was also given on these articles.

### *New Zealand makes change in Preference Conditions*

Revised regulations governing the application of the British preferential tariff in New Zealand were gazetted there on November 26, 1925, to become effective from April 1, 1926. The new regulations involve an increase from 25 per cent to 50 per cent in the minimum proportion of British labour or material, or both combined (i.e., factory or works cost), ordinarily required in manufactured goods, so as to meet preference conditions. Owing to the fact that the entire British preferential schedule of the New Zealand tariff is applicable to Canada, the altered regulations are of interest to Canadian manufacturers exporting to that market. The 50 per cent requirement is not applicable to absolutely all products. Goods wholly manufactured from *unmanufactured raw*

*Finally passed April 6, 1926.

*materials* and goods wholly manufactured from certain *specified partly manufactured raw materials*, are also accorded preference when the other necessary conditions are observed.

There is only one other instance in the Empire where a British content higher than 25 per cent is laid down as a condition for granting the British preference. This is in Australia, where manufactured goods, unless covered by special provisions, must qualify for preference on the basis of being, at least, 75 per cent of British origin as defined for the purposes of the tariff.

### *Trade Agreement between Canada and Australia*

A reciprocal tariff arrangement between Canada and Australia became operative as from October 1, 1925. Although Canada had been granting to Australian products as low a rate of duty as that applied to any non-British country, there had previously been no special commercial arrangement between the two countries. Canadian goods entering Australia therefore were subjected to general tariff rates.

The Australian tariff, like the Canadian, consists of three schedules of duties, namely, general, intermediate, and British preferential. Under the new agreement, Canada secures the British preferential tariff in Australia on certain items, including mainly, fish (canned, preserved, dried, etc.), newsprint and some other kinds of paper, textile gloves, cash registers, typewriters, and certain other machines. Canada is given the Australian intermediate tariff on corsets, goloshes and some other rubber footwear, iron or steel tubes as defined, motor chassis, and certain other vehicle parts. In return, Canada grants specified rates of duty on Australian products included under twenty tariff headings. One of the most important of these to Australia is a preference of 3 cents per pound on raisins and currants. Other goods on which Australia is given a tariff advantage in Canada are certain meat and meat products, butter, eggs, cheese, sugar, canned vegetables, and dried or evaporated fruits, as set forth in the tariff items involved.

The tariff reductions accorded to Australia were also made applicable to New Zealand.

### *Arrangement with British West Indies for Increased Preferences*

A new trade agreement was signed at Ottawa on July 6, 1925, between representatives of the Canadian Government and delegates from the British West Indies, Bermuda, British Guiana, and British Honduras. In this agreement, Canada is to accord the colonies increased tariff preferences on products of special importance to them and, in return, obtains additional concessions on many Canadian goods.

Some of the increased preferences to be exchanged in consequence of the new reciprocity pact may be mentioned. Barbados, Trinidad, British Guiana, Jamaica, the Bahamas, and British Honduras are to give a preference of two shillings per barrel (196 pounds) on Canadian flour, instead of one shilling, provided for in the 1920 agreement. Three of these colonies, namely, Barbados, Trinidad, and British Guiana, where the 1920 preference was a 50 per cent reduction from the respective general tariffs, will make the reduction 66⅔ per cent in the case of apples, fish (preserved, dried, etc.), beef and pork (salted or pickled), lard, condensed milk, butter, cheese, prepared cocoa, confectionery, boots and shoes, cordage, cement, lumber as defined, including shingles and lath. With regard to most of these commodities, there is an alternative specific amount of preference based on a unit of quantity which will be applied if more favourable than preference on the percentage basis. The Leeward and Windward Islands are to endeavour to grant these preferences also.

The Bahamas, Jamaica, and British Honduras, whose preference obligations under the 1920 reciprocity arrangement were respectively 10 per cent, 25 per cent, and 33⅓ per cent reductions from general tariffs, agree to give a 50 per cent reduction in the case of butter, cheese, lard, condensed milk, meat of all kinds, fish (preserved, dried, etc.), apples, and potatoes. On goods not scheduled for special treatment, the colonial preferences are 50 per cent in Barbados, British Guiana, and Trinidad; 33⅓ per cent in the Leeward and Windward Islands and British Honduras; 25 per cent in Jamaica and the Bahamas, the latter to endeavour to make the percentage 50; Bermuda to remove its 10 per cent surtax of duty in the existing general tariff.

The enlarged reciprocal concessions from Canada include a preference of $1 per 100 pounds on sugar of 96 degrees polarization (other degrees in proportion), as compared with 83.7 cents in the 1920 agreement; an entirely new preference of 50 cents per bunch on bananas; and an increase of $1.50 to $2 in the preference on cocoa beans as compared with the general tariff. There are special Canadian preferences also on lime-juice, limes, arrowroot, cocoanuts, grapefruit, rum, onions, cocoa butter, coffee, ginger, nutmegs, pineapples in cans, angostura bitters, and sponges. On goods not dealt with in a special category, Canada is to continue applying to West Indian products a rate not more than one-half of the general tariff.

The new Convention was made subject to ratification by the various legislative bodies concerned. By the end of the 1925-6 fiscal year it had been ratified in Bermuda, British Honduras, British Guiana, Trinidad, Jamaica, Leeward Islands and Windward Islands. On March 23, 1926, a Canadian Act was given first reading* in the House of Commons providing for the necessary sanction to the agreement on the part of the Dominion. Upon approval being given by all parties concerned, the agreement is to be brought into force on a date which will be announced by proclamation.

### *Canada Secures Benefits of Anglo-Finnish Treaty*

An Act was passed at the 1925 session of the Canadian Parliament relating to the treaty of December 14, 1923, between the United Kingdom and Finland. This treaty, among other things, provides for exchange between the contracting states of most-favoured-nation treatment of each other's goods in the matter of customs duties, with certain exceptions in regard to possible Finnish preferences to imports from Esthonia, Latvia, or Lithuania. Under Article 23 of the treaty, British Dominions may secure the tariff advantages which Finland accords the United Kingdom, in return for most-favoured-nation treatment of Finnish goods. The Canadian Act mentioned was an acceptance of the offer in Article 23 of the treaty. The Act was brought into force by proclamation as from August 1, 1925, from which date the Canadian-Finnish reciprocity arrangement became operative. It happens that the tariff concessions which Canada and Finland exchange in consequence of this most-favoured-nation relationship are notably those arising out of previous commercial conventions which the respective countries had entered into with France, namely, the Franco-Finnish commercial convention of 1921 and convention of commerce between Canada and France of 1922.

### *Convention with Netherlands in Force*

The Convention of Commerce between Canada and the Netherlands entered into on July 11, 1924, was approved on behalf of Canada by an Act of Parliament assented to on June 12, 1925. Ratifications of the Convention were exchanged with the Netherlands and it was brought into force as from October

*Act was finally passed by the Canadian Parliament on June 15, 1926.

28, 1925. The Netherlands, wherever used in the Convention, is held to include also the Netherlands Indies, Surinam, and Curacao. This commercial agreement provides for a reciprocal exchange of most-favoured-nation treatment in tariff matters between the contracting parties.

### *Furnishing Tariff Information to Exporters*

Tariffs and customs regulations are matters of much importance to the export trade. The inquiries pertaining to these subjects which were received during the period dealt with in this report showed a considerable increase over the previous year's record. The department has supplied to exporters and others concerned in international commerce a great deal of advice and information on the tariffs and related import regulations of those British and foreign countries where Canadian goods are sold, or are likely to be sold.

### *International Customs Tariff Bureau*

On March 31, 1926, the International Customs Tariffs Bureau at Brussels, Belgium, completed thirty-five years of existence—that is to say, its fifth septennial period. This Bureau was founded as the result of an International Convention signed at Brussels on July 5, 1890. It began to operate in 1891. Its purpose is to translate, publish, and distribute to the various contracting states the customs tariffs of the world with amendments thereto which may be enacted from time to time. The original agreement was to last for seven years, and when that time elapsed, was to continue in operation for successive seven-year terms until denounced. As the Convention has not been terminated, the Brussels Bureau enters on its sixth septennial period, functioning in the usual way.

The Bureau issues tariffs in five languages, namely, English, French, Spanish, Italian, and German. In order to make an equitable assessment to cover the cost of the service, the countries maintaining it were classified according to their respective volumes of trade. On this basis proportionate amounts are levied on each adhering state. A quota of tariffs is sent to a country corresponding to the amount of its contribution. Any country whose language is not used in the Bureau's publications is allowed a reduction of two-fifths from the tax otherwise leviable.

Thirty-nine countries signed the original Convention and at present, it is understood, this Convention or Union comprises about fifty countries.

Canada has been a member of the Union since it was organized. The Canadian contribution for 1925-26 was $659.40. The quota of tariffs supplied annually to Canada is 207 copies. The many extra copies enable the Department of Trade and Commerce to furnish custom houses, chambers of commerce, boards of trade, etc., throughout Canada with tariff records (in French or English), which may be consulted by interested manufacturers or exporters at various centres. One of the conditions for supplying any of these institutions with the publications of the Brussels Customs Bureau is that the documents will be filed regularly and made available for convenient reference by interested parties in the surrounding district. The distribution is also restricted to places where there is a demand for information on the world's tariffs, and where records of the kind in question are likely to be of real value.

Early in the present year (1926) the mailing list for Brussels tariffs was completely revised. It was found upon investigation that in certain places there was not sufficient interest in foreign tariffs to warrant a continuance of the service at these particular points, and the material was retained for distribution elsewhere. There are available from the quota of tariffs received by Canada copies for more chambers of commerce, boards of trade, or similar associations concerned in international commerce than are already on the mailing list. Such

bodies would do well to apply to the Department of Trade and Commerce at Ottawa to be furnished regularly with tariffs and supplements to tariffs as they are issued at Brussels. There is no charge for the service to these organizations.

### FOREIGN BRANCHES OF CANADIAN BANKS

Attention has been called in previous reports to the very great aid to Canadian export trade by reason of the many branches maintained abroad by Canadian banks. Those interested will be gratified to know that the number of Canadian branch banks in British and foreign countries is constantly increasing, thus adding greatly to the facilities of doing business overseas.

The foreign branches of Canadian banks have been of considerable assistance to Canadian exporters, and must be regarded as having contributed to the development of Canadian trade with the countries where these branches are located. Their value does not lie so much in the ordinary collection service that they perform, inasmuch as similar service could be performed by foreign correspondents, but in the personal interest they have in assisting Canadian business. The fact of their being controlled by a head office in Canada makes it possible for the Canadian exporter to be in personal touch with the organization which is handling his business abroad, and this has been found advantageous when difficulties have cropped up. In such cases, Canadian banks can be relied on to pay special attention to the troubles of Canadian exporters.

The head offices of the banks which have branches abroad are in a good position to supply the best available credit information on parties in countries where they are located, and from their experience of those markets to give the exporters advice when requested.

Working through their branch managers, the head offices of Canadian banks have in many cases been able to place the Canadian seller in touch with prospective foreign buyers, and from these contacts there is no doubt that a considerable volume of business has resulted.

The following compilation of foreign branches of Canadian banks has been recently made, and should be of interest to Canadian exporters:—

*Newfoundland*

*Bank of Montreal—*

Corner Brook,
Curling,
Grand Falls,
St. George's,
St. John's.

*The Bank of Nova Scotia—*

Bay Roberts,
Bell Island,
Bonavista,
Burin,
Carbonear,
Catalina,
Channel,
Fogo,
Grand Bank,
Harbour Grace,
St. John's,
Twillingate.

*The Canadian Bank of Commerce—*

Belleoran,
Burin,
St. John's.

*The Royal Bank of Canada—*

Heart's Content,
Placentia,
St. John's,
St. John's, West End,
Trinity.

*Great Britain*

*Bank of Montreal—*

London, England—47 Threadneedle street, E.C. 2, and 9 Waterloo place, S.W. 1.

*The Bank of Nova Scotia—*

London, England—108 Old Broad street, E.C. 2.

*The Canadian Bank of Commerce—*

London, England—2 Lombard street, E.C. 3.

*The Royal Bank of Canada—*

London, England—Bank Bldgs., Princes street, E.C. 2.

*The Dominion Bank—*

London, England—3 King William street, E.C. 4.

*France*

*Bank of Montreal (France)—*

Paris—6 Place Vendome.

*The Royal Bank of Canada (France)—*

Paris—28 rue du Quatre-Septembre.

*Banque Canadienne Nationale (France)—*

Paris—14 rue Auber.

*United States*

*Bank of Montreal—*

New York Agency—64 Wall street.
Chicago—27 South Lasalle street.
San Francisco Auxil.—British American Bank, 264 California street.

*The Bank of Nova Scotia—*

New York Agency—49 Wall street.
Boston.
Chicago.

*The Canadian Bank of Commerce—*

New York Agency—16 Exchange place.
Portland, Ore.
San Francisco, Cal.—450 California street.
Seattle.

*The Royal Bank of Canada—*

New York Agency—68 William street.

*The Dominion Bank—*

New York Agency—49 Wall street.

*Mexico*

*Bank of Montreal—*

Mexico City—Avenida Isabel la Catolica No. 40.
Guadalajara—Esquina Lopez Cotilla y Colon.
Monterrey—Doctor Mier 116.
Puebla, Pue.—Avenida Reforma No. 106.
Veracruz—Avenida Independencia No. 23.
Tampico.

*The Canadian Bank of Commerce—*
Mexico City—Calle de Capuchnias 46, Apartado 102 bis.

*St. Pierre and Miquelon*

*The Canadian Bank of Commerce—*
St. Pierre.

*West Indies*

*Bank of Montreal—*
Barclays Bank (Dominion, Colonial and Overseas), formerly The Colonial Bank (in which an interest is owned by the Bank of Montreal).

*The Bank of Nova Scotia—*
Cuba—
Cienfuegos,
Havana,
Avenida de Italia, Havana,
Oficios St., Havana,
Padre Varela, Havana.
Manzanillo,
Santiago de Cuba.

Porto Rico—
Fajardo,
San Juan.

Dominican Republic—
Santo Domingo,
San Pedro de Macoris,
Santiago de los Caballeros.

Jamaica—
Black River,
Kingston,
Mandeville,
Montego Bay,
Morant Bay,
Port Antonio,
Port Maria,
St. Ann's Bay,
Savanna-la-Mar,
Spanish Town.

*The Canadian Bank of Commerce—*
Cuba—Havana.

Trinidad—
Port of Spain,
San Fernando.

Jamaica—Kingston.

Barbados—Bridgetown.

*The Royal Bank of Canada—*
Cuba—
Antilla,
Artemisa,
Banes,
Bayamo,
Cabaiguan,
Caibarien,
Camaguey,
" Avellaneda,
Camajuani,

Uruguay—Montevideo.

Venezuela—

Caracas,
Ciudad Bolivar,
Maracaibo,
Valencia.

*Spain*

*The Royal Bank of Canada*—

Barcelona, Plaza de Cataluna 6.

## Dominion Bureau of Statistics

A brief summary of the work of the Dominion Bureau of Statistics during 1925-26 is as follows:—

*Demography.*—In this branch volumes II (ages, birthplace, nationality, etc.) and V (agriculture) of the census were issued, and volumes III (families, wage-earners, etc.) and IV (occupations) were advanced in preparation to their final stages. Arrangements were completed for the taking of the quinquennial census of the Prairie Provinces, as of date June 1, 1926, the general scope and method being decided during the summer and autumn months, whilst most of the arrangements for the field work had been completed by the end of the fiscal year. In the section on vital statistics the outstanding event was the addition of the province of Quebec to the registration area, which now covers the whole of Canada and enables these important statistics to be issued on a Dominion-wide basis. The Bureau is now also compiling the monthly statistics of immigration,

from punched cards supplied by the Immigration Department in accordance with a scheme of co-ordination as between these statistics and the cognate statistics of the census and of births, deaths, and marriages.

*Agriculture.*—The Monthly Bulletin of Agricultural Statistics was issued as in previous years, the usual schedule of crop reports being maintained. The crop-reporting staff in the Prairie Provinces was enlarged by the inclusion of bank and railway officers. A special report of the year dealt with the cost of grain production and haulage, whilst a quinquennial summary report gave general statistics by counties and crop districts for the whole of Canada. The fruit statistics of the Bureau were improved in co-operation with the Fruit Branch of the Department of Agriculture.

*Fisheries, Furs, etc.*—These statistics and the statistics of manufactures based on animal products in general were maintained as in 1924.

*Forestry, Saw-mills, Pulp and Paper, etc.*—This branch covers the production of primary forest products, the lumber, pulp and paper industries, and the various manufactures that use lumber, pulp and paper as their chief raw material.

*Mining, Metallurgical and Chemical Industries.*—Arrangements for the co-operative collection and co-ordination of mining statistics were completed with the Bureau of Mines of Quebec during the year, and partial arrangements of the same kind were inaugurated with the Department of Mines of British Columbia; there is now all but complete co-ordination between the Bureau and provincial mines departments throughout Canada. In the work of this section in connection with the industries based on mining, or using minerals as their chief raw materials, the chief improvements of the year were in automobile statistics and the addition of coke production figures to the monthly bulletin on coal.

*General Manufactures.*—The schedule of reports adopted in previous years was maintained. The report on General Manufactures for 1924 will contain some valuable additional analyses and information that it is hoped will add to the value of these statistics, more particularly for purposes of economic discussion.

*External Trade Statistics.*—The Condensed Preliminary Report of the Trade of Canada issued in June was enlarged by the segregation of the leading trade items for some twenty-seven countries. The regular Annual Report on the Trade of Canada contained some additional analyses that will increase its usefulness. A feature of the work of the year in this branch was the special report on Canadian trade with British West Indies which was brought out in connection with the Canada-British West Indies Trade Conference held in June, 1925.

*Internal Trade.*—The annual reports on the grain trade and on the trade in live stock and animal products were improved in detail. The cold storage monthly report was extended to include totals for all Canada on the tenth of each month; the second statement issued on the fifteenth of each month shows provincial totals for all provinces. As an essay in the study of interprovincial trade relations, a special bulletin on the Economic Position of the Prairie Provinces was issued during the year.

*Prices.*—A monthly index number covering retail prices and the costs of certain services, weighted according to their economic importance, was begun from January 1, 1926; also a weekly statement showing index numbers of prices, sales and the value of transactions in the twenty-five leading Canadian stocks.

*Transportation and Public Utilities.*—The usual annual and monthly reports were issued on the statistics of steam and electric railways, canals, telephones, telegraphs, express, registration of motor vehicles and central electric stations. New tables on locomotive and car mileages and railway taxes were added to the

railway report, some additional analyses of freight and vessels were added to the canal report, and an index number of electric light rates to the central electric stations report.

*Public Finance.*—The annual report on Provincial Finance introduced some further details as to taxation receipts and provincial bonded debt and expenditures. In municipal statistics, bulletins were issued on the assessed valuations of cities, towns, villages and rural municipalities and on the bonded indebtedness of the same. Statistics of the Civil Service of Canada were prepared for 1925 in accordance with the system of records established in 1924.

*Judicial Statistics.*—In addition to the annual report on Criminal Statistics, a special bulletin on homicides, murders, etc., was issued; the aspect of juvenile delinquency was also given special attention, with a view to increasing the completeness of the returns.

*General.*—The 1925 edition of the Canada Year Book was completed and in the press at the close of the year, embodying some important improvements in detail. From January 1, 1926, a Review of Canadian Business Statistics in accordance with approved methods of indicating the general economic trend was begun on a monthly basis; the statistics in question had been previously assembled at intervals to enable the Bureau to answer inquiries of a general nature, but their publication has met a widely felt need by the business community.

*Library.*—The libary of the Bureau, which is confined to statistical publications and works on statistical methodology, was made increasingly useful; it now contains some 30,000 publications, representing the most important current statistics of the various countries of the world.

## Board of Grain Commissioners for Canada

Under and by virtue of the proclamation of the Governor in Council—P.C. 1185, July 29, 1925—the Canada Grain Act, 1925, became effective August 1, 1925, superseding that of 1912. Concurrently the rules and regulations governing sample market trading and special binning in public terminal elevators, not provided for in the new act, were rescinded as from August 1, 1925, by proclamation of the Governor in Council—P.C. 1428. The new act includes provision for the licensing, by the board, of private elevators, wherein the mixing of grain is permitted; the licensing of elevators operated by grain pools for the benefit of members of such pools; the maintenance of a grain research laboratory for the purpose of assisting the chief Grain Inspector and the Grain Standards Board in determining the grades and the milling value of grain; and the establishment of Boards of Grain Appeal where such may be deemed expedient.

### *Complaints*

During the year approximately 250 complaints were investigated; 37 sessions were held; one default case—that of McMillan Grain Company Limited, Winnipeg—was dealt with; and approximately 61,802 miles were travelled by the board in its administration of the Canada Grain Act.

### *Licenses Issued*

The total number of licenses issued for the crop year 1925-26 follows:—

| | |
|---|---|
| Public terminal elevators | 18 |
| Public elevators | 16 |
| Private elevators | 63 |
| Manufacturing elevators | 10 |
| Country elevators | 4,233 |
| Special bin space | 3 |
| Commission merchants | 94 |
| Track buyers | 95 |
| Primary grain dealers | 3 |
| Total | 4,535 |

### *Grain Crops*

Very bountiful grain crops were reaped in the Prairie Provinces in 1925, that of barley far exceeding all previous years and wheat proving to be the fourth largest ever grown in the West. The weather during the first few weeks of the harvest season was most favourable and grain threshed at that time was of the highest grade. Later a spell of wet, cold weather set in, with heavy snowstorms in some parts of the country followed by severe frost, so that further outdoor operations were almost entirely suspended. For several weeks it was feared much of the crops lying out in the open would be entirely spoiled, but early in November fine, mild weather succeeded and threshing was resumed with such expedition practically the whole of the crops were garnered.

The bad weather was, however, directly responsible for two important facts. Firstly, it came at a time when reports of European and Argentina crops were so favourable that importers were holding off and Canada's surplus was beginning to press heavily on the market so that prices were falling. Secondly, the soaking the grain received in the fields lowered the grading somewhat, and much had to be dried to prevent further deterioration. Later when it became known that European and Argentine crops were not nearly so large as anticipated, the effect of the weather in preventing the heaviest movement of the Canadian surplus at a time when it would undoubtedly have sold at considerably lower prices, was regarded as favourable to the producer rather than otherwise.

### *Drying of Grain*

Large as the drying facilities at the various terminal points were, much grain was taken into storage during the winter which was considered liable to go out of condition and endanger the elevators. Accordingly the Board applied for an Order in Council so that all such grain could be ordered dried immediately. Under this Order—P.C. 289, February 26, 1926, effective March 1—all public and private elevators in the Western Grain Inspection Division (except at Vancouver) were ordered to dry tough grain of certain grades then in store. This order was not made applicable to Vancouver as from the previous November the quantities of tough and damp grain moved over that route were strictly limited, the Canadian Government elevators at Calgary and Edmonton taking care of the balance. Arrangements were also made with the railways and elevators whereby cars in transit or at terminal points awaiting unloading, containing grain which, in the opinion of the inspectors, was liable to go out of condition, were unloaded, the grain dried and reloaded into the cars.

The necessity for this action can be seen from the following figures, representing the total inspections of grain grading "No grade" for excess moisture, and the amounts actually dried at public terminal elevators, during the first seven months of the Crop Year 1925-26—or prior to the issuance of the Board's order to dry grain.

| — | Graded "No Grade" | Dried at Public Elevators |
|---|---|---|
| Wheat | 60,890 cars, or 82,201,500 bush. | 17,724,020 bush. |
| Oats | 8,678 " " 17,486,170 " | 801,123 " |
| Barley | 8,330 " " 11,786,950 " | 578,582 " |
| Flaxseed | 1,723 " " 1,738,500 " | 1,198,910 " |
| Rye | 975 " " 1,169,000 " | 83,665 " |
| Total | 80,596 cars, or 114,382,120 bush. | 20,386,300 bush. |

### *Movement of Grain*

The lateness of the peak of the movement of the western crops and the immense volume to be moved, in relation to the rather moderate demand from European importers, meant that a very large proportion of the crop had to be held over in store at terminal and country points, in addition to what was shipped via Vancouver. The elevators at Fort William-Port Arthur filled rapidly, necessitating embargoes on shipments thereto by both railways. Every precaution was taken, however, to guard against grain going out of condition and large quantities were handled at the interior terminals.

### *Grain Handled*

Handlings at principal points during the eight months ended March 31, 1926, were as follows:—

| | Wheat | Other grains | Total |
|---|---|---|---|
| | Net bush. | Net bush. | Net bush. |
| Fort William-Port Arthur | 222,795,104 | 61,405,556 | 284,200,660 |
| Vancouver | 48,076,520 | 143,180 | 48,219,700 |
| Transcona (North and South) | 2,467,953 | 776,039 | 3,243,992 |
| Canadian Government Interior Terminal Elevators— | | | |
| Calgary | 3,319,409 | 1,046,726 | 4,366,135 |
| Edmonton | 4,099,569 | 342,067 | 4,441,636 |
| Moose Jaw | 1,395,328 | 360,122 | 1,755,450 |
| Saskatoon | 2,703,876 | 788,901 | 3,492,777 |

## Canadian Government Motion Picture Bureau

Throughout the last fiscal year, the Canadian Government Motion Picture Bureau has had the most successful year since its establishment in 1917. A keener realization has developed in federal governmental circles concerning the potentialities of propaganda through the medium of the film, with the result that the Canadian Government Motion Picture Bureau is securing splendid co-operation and encouragement, which has reflected itself in the activities of the Bureau for the past fiscal year.

As in former years, close attention has been paid to the revenue producing possibilities of the Bureau, with the result that the Bureau can now safely be said to be on a more or less self-supporting basis. The revenue for the fiscal year under review amounted to $20,807.31.

The Department of Trade and Commerce, through its Motion Picture Bureau, has been in a position, through its past experience with the use of motion picture films, to realize the great advantages and benefits to be gained by "publicizing" Canada through the medium of the film. To-day official Canadian Government films, which are being produced by the Government's own Motion Picture Bureau, are having a world-wide distribution and are doing an international work of far-reaching importance to the Dominion.

### *National Value of the Film*

The national value of the film as a propaganda force has been strikingly exemplified by the United States of America. Practically 98 per cent of all films produced for exhibition throughout the world are of United States origin. It has been truly said that the American motion picture has proven to be the greatest sample room in the world for the American nation, and because of this fact there would seem to be a great element of truth in the modern slogan that "Trade follows the film".

### *Potent Weapon of Commerce*

There is no doubt that the motion picture film is of great commercial value. An internationally known motion picture director speaking before the Canadian Club in Toronto recently concerning the efforts to revive British Empire produced films declared:—

"The motion picture is the universal language which needs no translation. It is as important to any nation as the steel or cotton industry and it behoves every nation to own and endow the motion picture for its own use."

### *"Seeing Canada" Films Being Regularly Produced and Distributed*

Ever since its establishment, the Bureau has made a specialty of a one-reel informative film dealing with Canada, entitled the "SEEING CANADA" series. The distribution of the "SEEING CANADA" series has been placed on a strictly commercial basis and a satisfactory revenue has been produced, and at the same time these official Canadian films have had an immense distribution throughout the world.

### *Films Help to Develop Canada's Fourth Industry*

It is estimated that the tourist trade in Canada to-day has been developed into an industry, which can be classed as Canada's fourth industry. The broad distribution of the Government films, with special reference to their distribution in the United States, is unquestionably the greatest and most powerful aid in the development of Canada's tourist trade. Canada's scenery is conceded unrivalled, and no more potent lure could influence the prospective tourist than the motion picture camera's portrayal on the screens of the countless out-door attractions that are offered to the tourist. The Canadian National Railways are making wide use of the film material of the Canadian Government in connection with fostering and encouraging the development of the tourist trade along its transportation lines, while the Canadian Pacific Railway is utilizing the potentialities of the motion picture most aggressively along similar methods.

To perhaps no other country in the world is advertising of such prime importance as to Canada at the present time, and motion picture advertising has been proven to be unquestionably the strongest medium devised by which to advertise a nation.

### *Co-operative Work*

As in past years, the Bureau has continued the work of co-operation with other departments of the Government in the production of motion pictures, still photographs, bromide enlargements, lantern slides and transparencies. During the last fiscal year this work for other departments has increased greatly. Another important feature of the co-operative work is the fact that it has all been done for various departments of the Government at a great saving.

### *Work Performed for Federal Departments*

The following Federal Government departments have had photographic and film work of various forms performed for them during the past fiscal year:—

Immigration and Colonization Department.

Department of Agriculture—

(*a*) Experimental Farm.
(*b*) Fruit Branch.
(*c*) Health of Animals.
(*d*) Live Stock Branch.
(*e*) Publications Branch.
(*f*) Dairy and Cold Storage.
(*g*) Entomological Branch.

Department of Insurance.
Post Office Department.
Department of Mines.
Department of the Interior—
(a) Canadian National Parks Branch.
(b) Northwest Territories Branch.
(c) Natural Resources Intelligence Service.
(d) Water Power Branch.
(e) Geological Survey.
Department of Militia and Defence.

*Film Production Activities*

The following "SEEING CANADA" film subjects were produced during the last fiscal year:—

In the Maritime Provinces.
Fighting Forest Fires.
Harvesting the Deep.
The City of Stately Elms.
A Seaside Summerland.
City of Loyalists.
Weslemkoon Frolics.
The Garden of the Gulf.
Canada's Cosy Corner.
Just What the Doctor Ordered.
Lumbering in British Columbia.
The Cradle of Confederation.
In Quest of the Bronze Back.
Fishing Gamely for Game Fish.
In and Around Moncton.
Down by the Sea.
Birds of Bonaventure.

In addition to these "SEEING CANADA" one-reel pictures, the Bureau had charge of the motion picture work in connection with the last Canadian Government Arctic Expedition and made a motion picture record of the entire trip for the Northwest Territories Branch, Department of the Interior.

A number of technical films were also produced for the Canadian National Parks Branch, Department of the Interior, and for various Branches of the Department of Agriculture and the Department of Mines. A number of special films were also produced for the Canadian National Railways for the use of their official lecturer in the United States and Canada.

*Distribution in the United States*

The average weekly attendance at motion pictures in the United States is now estimated at 130,000,000 persons. The Bureau has realized that the United States offers the greatest field for the exploitation and distribution of the Canadian Government films. It is from the United States that Canada secures by far the greatest volume of its tourist trade, and for this reason during the last fiscal year the Bureau has paid particular attention to the distribution of its motion pictures in the United States.

At the present time the Bureau has made distribution arrangements with two prominent American distributors of short subject material. One of the distributors advises that their films are exhibited at approximately 4,000 theatres in the United States. Thus a great deal of Canadian film material is reaching the eyes of millions of people in the United States in a comparatively short time.

The other distributor has a very considerable circulation and has taken five of our negatives for theatrical distribution in the United States. One of our film subjects was recently shown in the world's largest motion picture theatre, in New York city. Plans are now under way to greatly increase the theatrical distribution in that territory.

*Non-Theatrical Distribution in United States*

The non-theatrical field in the United States offers a splendid opportunity for the Canadian Government films. Special attention was paid during the last fiscal year to this type of film distribution, with the result that the following state universities were supplied with groups of our films for distribution in the various states: University of Arizona, University of California, University of Colorado, University of Iowa, University of Kansas, University of Minnesota, University of Missouri, University of Oregon, University of Texas, University of Utah, University of Wisconsin, University of Indiana, University of Nebraska.

*Co-operative Work with American Film Producers*

Canada has much to offer the American film producer in the way of outstanding scenic locations, and the Bureau is closely in touch with the leading American film producers and is encouraging them to make use of Canadian locations. It is hoped that Canadian stories which will portray Canada correctly, will be filmed from time to time. It is understood that plans are already being prepared by one of the large American film producers to produce a Canadian story, perhaps in Quebec province, this summer. It is understood that this film will cost in the neighbourhood of $500,000.

## Weights and Measures

The Weights and Measures Service has again closed the year with a surplus of revenue over expenditure. The year 1923-24 was the first year since Confederation that this service met working expenses out of the revenue collected from inspection fees, the surplus being $1,075.89. For the year under review, the surplus has been increased to $22,647.49, chiefly due to the limitation of the personnel to actual inspection needs and to the remarkable increase in the number of gasolene dispensing devices. The surplus, however, is qualified by the fact that the expenses do not include the salaries of the administrative staff in the department, neither does it include office rentals, which are paid by the Public Works Department.

Expenses totalled $293,193.65, as against $293,030.75 for 1924-25, an increase of only $162.90, in spite of statutory increases and the absorption of the cost of living bonus into the salary charge, which represent an increase on this account of $5,802.27 over the year preceding.

The revenue totalled $315,841.14, as against $294,106.64 for 1924-25, showing an increase of $21,734.50, and a surplus over expenditure of $22,647.49.

The great improvement shown in this service during the past eight years is disclosed by the following figures:—

| | Number of inspectors | Expenses | Revenue | Deficit |
|---|---|---|---|---|
| | | $ cts. | $ cts. | $ cts. |
| 1918–19 | 116 | 229,885 89 | 136,497 80 | 93,388 09 |
| 1925–26 | 111 | 293,193 65 | 315,841 41 | Surplus 22,647 49 |

The Weights and Measures service is a protective service rather than a revenue service. In connection with the fee system in force, it should be borne in mind that the obligation to use nothing but correct and duly stamped appliances rests entirely upon the trader and that the latter is rendered an emphatic service by having the inspector call, with the necessary equipment, at his business premises. In performing this duty, weights and measures inspectors travelled last year, by rail and motor car, some 245,981 miles, exclusive of the many miles traversed in the course of city inspections.

### *Inspection Data*

Following is a statistical statement of the various appliances and trade articles inspected during the year:—

| — | Submitted | Verified | Rejected | Per cent of Rejection |
|---|---|---|---|---|
| Weights | 89,828 | 89,459 | 369 | 0·41 |
| Weights metric | 1,648 | 1,634 | 14 | 0·85 |
| Measures of capacity | 104,432 | 104,285 | 147 | 0·14 |
| Measures of length | 12,209 | 12,181 | 28 | 0·23 |
| Milk cans | 72,178 | 72,166 | 12 | 0·02 |
| Ice cream containers | 27,476 | 27,473 | 3 | 0·01 |
| Glassware, babcock (pipettes, etc.) | 51,789 | 51,164 | 625 | 1·2 |
| Measuring devices (gasolene) | 29,167 | 27,944 | 1,223 | 4·2 |
| Weighing machines | 170,374 | 162,258 | 8,116 | 4·7 |
| Weighing machines, metric | 571 | 554 | 17 | 2·9 |
| | 559,672 | 549,118 | 10,554 | |

### *Seizures and Prosecutions*

During the year one hundred and seven (107) weighing machines and thirty measures were seized as being either illegal or false and unjust.

In nine cases, proceedings were instituted, resulting in seven convictions with penalties amounting to $158. One case was settled out of court and one case is still pending.

### *Other Activities*

The tare weighing of freight cars used in the West for the shipment of coal was again taken up early in 1926 with results but little more satisfactory than last year. Serious inaccuracies as between the stencilled weight and the actual weight of cars continue to exist. The data was referred to the Railway Commission and by them to the railways concerned. The latter have made some concessions to the fuel dealers, but inasmuch as climatic conditions, such as snow and rain, cannot be eliminated, the only satisfactory solution would seem to be the net weighing of the coal into the cars at the mines, as is now done with grain. This, however, is a large subject and is still under consideration.

### *The Metric System*

Interest for Canada in the Metric System this year has centred in Washington, D.C., where hearings have been held before a Committee of Congress, on a Metric Bill, H.R.-10, introduced by Mr. Britten.

The object of the Bill is " that from and after the 1st day of January, 1935, metric weights and measures, except as herein provided, shall be used for the following purposes " which, briefly stated, are, merchandising, transportation charges, postal, excise and customs charges; but the Bill expressly states its provisions shall not apply to manufacture, surveys, etc.

The latter exemptions are of special interest and testify to the recognized difficulty of changing the units of measure in established and more or less standarized production. And yet, it is here that the Metric System is most needed to place manufactured products on an interchangeable international basis. Conversely, there is not much to be gained by changing the national units of trade, which has no bearing on international commerce. In other words, very little is to be gained by compelling dry goods to sell by the metre, whilst industry manufactures by the inch. As the Bill has met with considerable opposition, the conjecture is that it will not be passed.

## Electricity and Gas Inspection Services

The amount of work done in this branch of the department was the greatest in its history. The following table gives a comparison for the last two years:—

| | 1924–25 | 1925–26 |
|---|---|---|
| Electricity meters tested | 221,450 | 260,960 |
| Gas meters tested | 105,399 | 115,814 |
| Totals | 326,849 | 376,774 |
| Revenue— | | |
| Electricity | $ 142,232 90 | $ 167,156 70 |
| Gas | 73,707 60 | 80,069 40 |
| Totals | $ 215,940,50 | $ 247,226 10 |
| Expenditure— | | |
| Electricity | $ 116,831 43 | $ 118,190 16 |
| Gas | 49,597 85 | 48,574 97 |
| Totals | $ 166,429 28 | $ 166,765 13 |

From the above statement it will be seen that the increase in the number of metres tested during the last year was 49,925. It may also be seen that the increase in revenue was $31,285.60, whereas the increase in expenditure was only $335.85. The total surplus shown is $80,460.97. It may be observed, however, that no expenditure is included for administrative staff salaries and certain office rentals which are paid by the Department of Public Works.

### *Electricity Inspection*

According to the Electricity Inspection Act, every contractor supplying electricity to a customer shall obtain from the department a Certificate of Registration for his plant, on or before March 31 of each year. In this connection the number of electric meters in use on March 31, 1926, according to these applications, was 1,240,753, and the number tested, namely, 260,960, represents 21 per cent of the total metres in use. There were 39,510 more electric metres tested last year than in the year previous.

### *Gas Inspection*

There are thirty-two companies manufacturing gas and the total number of gas metres in use by these companies measuring this gas is 433,067.

There were 14,427,246,017 cubic feet of gas sold during the year composed of straight coal gas, carburetted water gas and coke oven gas. The increase in the amount of gas made over last year is 1,346,984,668 cubic feet, which gives evidence that the gas companies are not on the decline.

The total number of tests made on the above gas in respect of its calorific power was 3,393. These tests are made to determine whether the gas is kept

up to the standard calorific value of 450 B.T.U's per cubic foot required by our regulations. Sixteen tests showed the gas to be below this standard and of these sixteen, thirteen were registered against one company, leaving only three to be registered against all the other companies combined, which is a pretty good showing and gives evidence that they are living up to the regulations.

The amount of natural gas supplied to the various consumers in the natural gas districts throughout Canada was 12,730,228,776, and this was registered by 79,523 metres.

There are seven acetylene gas companies and they supplied 1,210,894 cubic feet of acetylene gas through 425 metres.

### *Laboratory*

The work in the laboratory consists chiefly in maintaining the accuracy of the various instruments used in checking electric and gas metres, etc., in the various offices throughout the country. In addition to that we have checked a number of metres for other departments of the government and also for outside firms. There were 120 instruments checked for our own uses and 44 for outside firms. The total amount of laboratory fees amounted to $100.30.

Another very important work in connection with the laboratory is the testing of new instruments that have been sent to the department for approval in order that they may be offered for sale in Canada. During the last year considerable activity was evidenced in this regard, as no less than fourteen new types of watthour metres were submitted for approval. Of these fourteen types, nine were recommended for approval and five were either rejected or held over pending further information and investigation. Considerable time is required for examining and testing the meter before this is finally approved, a great many tests being necessary to determine whether it meets the requirements laid down in our regulations governing the approval of meters.

In addition to the above tests there were also conducted in the laboratory, tests on a batch of dry batteries and tests on a batch of incandescent lamps.

### *Exportation of Electricity*

Section 10 of the Electricity and Fluid Exportation Act, chapter 16, dated April 27, 1907, gives the Governor in Council power to impose an export duty on all electrical energy exported from Canada. An Order in Council was passed accordingly imposing an export duty of three one-hundredths of one cent per kilowatt hour upon electrical energy exported from Canada on, from and after the 1st day of April, 1925. Export duty collected, $288,392.41. License fees, $625.50. Total, $289,017.91. Expenses, $263.11. Net balance, $288,754.88.

From the above it may be noted that the cost of collecting the export duty was less than one-tenth of one cent. The kilowatt hours produced for use in Canada were 3,575,289,701, and the kilowatt hours produced for export were 1,359,343,753.

## Bank Clearings

| Clearing House Centre | For twelve months ended March 31, 1924 | For twelve months ended March 31, 1925 | Increase (+) or Decrease (−) 1925 as compared with 1924 | Percentages of 1925 to 1924 |
|---|---|---|---|---|
| | $ | $ | $ | $ |

## Bounties

During the year 1925-26 this department has had charge of the administration of an Act respecting the payment of bounties on Petroleum, 13-14 George V, chapter 63. (Assented to June 30, 1923.) Also an Act respecting the payment of Bounties on Copper Bars and Rods, 13-14 George V, chapter 40. (Assented to on June 30, 1923.)

### *Petroleum Bounty Act*

The Bounty Rate—

On crude petroleum produced on or before the 30th June, 1924, was 1½ cent per imperial gallon.

On crude petroleum produced on or after the first of July, 1924, and not later than June 30, 1925, was ¾ of a cent per imperial gallon.

On crude petroleum produced after the first of July, 1925, no bounty was paid.

The bounty was, however, paid on crude petroleum produced prior to July 1, 1925, for several months after that date, as follows:—

CRUDE PETROLEUM PRODUCED IN ONTARIO

| Month | Number of Barrels | Bounty paid |
|---|---|---|
| | | $ |
| April | 10,801 4/5 | 2,841 84 |
| May | 10,277 23/35 | 2,702 56 |
| June | 11,842 6/35 | 3,112 08 |
| July | 20,762 13/35 | 5,534 65 |
| August | 3,511 17/35 | 957 14 |
| September | 126 1/7 | 33 11 |
| | 57,321 22/35 | 15,181 38 |

CRUDE PETROLEUM PRODUCED IN NEW BRUNSWICK

| | | |
|---|---|---|
| — | 5,370 2/7 | 1,779 77 |

*Copper Bounties Act*

Bounty rates on copper bars and rods manufactured in Canada and sold for consumption therein, from copper produced in Canada from ore mined in Canada during the periods, are as follows:—

From the twelfth day of May, 1923, to the thirtieth day of June, 1924, both inclusive, one and one-half cents per pound;

From the first day of July, 1924, to the thirtieth day of June, 1925, both inclusive, one and one-fourth cents per pound;

From the first day of July, 1925, to the thirtieth day of June, 1926, both inclusive, one cent per pound;

From the first day of July, 1926, to the thirtieth day of June, 1927, both inclusive, three-fourths of one cent per pound;

From the first day of July, 1927, to the thirtieth day of June, 1928, both inclusive, one-half of one cent per pound.

The total bounty payable is not to exceed two hundred thousand dollars in any one of the said periods.

The bounty is not to be paid on copper bars or rods exported from Canada, nor on copper rods made from copper bars on which a bounty has already been paid.

Rules and regulations were drawn up and were authorized by Order in Council of September 12, 1923, but no bounty under this Act was claimed until August 16, 1924.

During the fiscal year ending March 31, 1926, bounty was paid on 1,482,267 pounds of copper bars to the amount of $14,822.67. No claims have as yet been made on copper rods.

*Hemp Bounty Act*

An Act respecting the payment of bounties on certain manufactures of hemp, 13-14 George V, chapter 50, authorizing the payment on hemp grown in Canada and used in the manufacture of yarn or twine, or in the manufacture of hemp further advanced than yarn or twine, manufactured in Canada and sold for consumption therein, during the periods and at the rates following, was assented to on June 30, 1923, but does not come into effect until the calendar year, 1926.

During the calendar year—

1926, one and one-eighth cents per pound;
1927, one and three-eighths cents per pound;
1928, one one one-fourth cents per pound;
1929, one and one-eighths cents per pound;
1930, one cent per pound;
1931, seven-eighths of one-cent per pound;
1932, three-fourths of one cent per pound;
1933, one-half of one cent per pound.

The bounty is to be paid on the weight of carded hemp used in manufacture, and the weight of the carded hemp is to be computed on the absolutely dry weight thereof plus a moisture regain of not more than twelve per cent, and exclusive of lubricating or other extraneous material.

The bounty payable is not to exceed one hundred and twenty-five thousand dollars in any one of the said periods, nor is the bounty to be paid on hemp yarn or twine, or manufactures of hemp further advanced than yarn or twine, exported from Canada.

The Minister of Trade and Commerce is charged with the administration of the provisions of this Act.

### Subsidized Steamship Services

During the year ended March 31, 1926, a total of $1,078,038.10 was paid by the department in mail subsidies and steamship subventions.

Of this amount $518,948.44 was paid for ocean services on the Atlantic and Pacific, and $559,089.66 was paid to local coasting services in Quebec, the Maritime Provinces and on the British Columbia coast; the local services also including one route in Ontario between Pelee Island and the mainland.

During the calendar year 1925 these subsidized services made 5,312 trips, carrying a total of 193,023 passengers, 483,516 tons of freight, 6,381 live stock, and 189,860 bags of mail. All subsidized lines are obliged, under their contracts, to carry mails whenever required by the Post Office Department and that department of the Government is thus relieved of a very considerable expense.

Subsidies paid to ocean lines assist materially in the development of Canadian export trade; while the assistance granted in this way to coasting vessels enables services to be supplied to localities which are in many cases far from any railway or other regular means of communication, and whose populations are often dependent entirely upon subsidized boats for their connections with the rest of the country.

### Gold and Silver Marking Act

There has been a marked improvement in the observance of the Gold and Silver Marking Act since its enactment, this being attributed chiefly to the trade having become more familiar with its requirements.

There have been only four prosecutions and convictions during the past fiscal year, and in every case the prosecution affected foreign made goods only. The four prosecutions were under section 11 of the Act governing the marking of silverplated ware. The goods offered and displayed for sale were made of a brass base and so marked as to mislead and deceive the public. A great deal of such goods are still being imported, but are immune from the Act if they contain no marks thereon.

Some complaint has arisen by reason of goods being sold as platinum which consist only of white silver. The hope has been expressed that when the Act is amended a clause governing the marking of this precious metal will be included.

The inspector of the Gold and Silver Marking Act reports that small dealers in the trade who handle the cheap lines of jewellery take advantage of section

10 of the Act, which permits them to put the mark "Gold-filled" on articles, regardless of quality. An amendment to the Act in this respect will also be given consideration.

### The Staff

As regards the personnel of the department, there is a marked improvement in attendance and steadiness, the excessive separations commonly referred to as personal turnover experienced in the past few years, due to old age, superannuation, deaths, branches transferred from other depatrments and the after effects of the war, together with reclassification and the employment of temporary assistants for special work, has been reduced to minimum, with the exception of extra temporary staffs required for the administration of the Canadian Grain Act, a matter controlled by the size of the grain crop, which was exceptionally large, as well as the additional requirements of the amended Canada Grain Act, 1925, which called for the establishment of a Board of Grain Appeal, etc.

This accounts for an increase of one hundred and eleven employees, leaving an increase for all other services of twenty-one over the previous year. Of this number five are Junior Trade Commissioners in training who have been taken on during the year, and assistance required to fill some of the more important vacancies caused by deaths, resignations, those placed on pension and other retirements.

It might also be stated that the substantial increase in revenue of the department which is $684,121.43 over 1924-25 also required our filling some of the outstanding vacancies to assist in producing it.

The many changes which took place in recent years were regarded as a barometer of dissatisfaction, and excessive turnover as expensive and wholly undesirable, but unavoidable on account of the unstable conditions which have existed during the restless period following the war.

The past year would indicate that there is little room for improvement in the matter of attendance, efficiency of organization and the general functioning of the several branches, due primarily to the return of more stable conditions with a minimum staff required to carry on the necessary business of the department.

Of the more important officials of the permanent staff the following changes were effected during the fiscal year 1925-26:—

Mr. W. McLeod Clarke, Trade Commissioner at Milan, Italy, was promoted to Director of Commercial Intelligence Service, Ottawa.

Mr. A. E. Bryan, Trade Commissioner at Kobe, Japan, was promoted to Travelling Inspector of Trade Commissioners' Offices, with headquarters at Ottawa.

Mr. George Serls, Chief Grain Inspector, Winnipeg, was appointed Chairman Board of Grain Appeal, Winnipeg.

Mr. J. D. Fraser, Assistant Chief Grain Inspector, Winnipeg, was promoted to Chief Grain Inspector.

Mr. George Hill, Grain Inspector, Calgary, Alberta, was appointed Chairman Board of Grain Appeal, Calgary.

Mr. J. L. Stiver, Eastern Divisional Superintendent of Electricity and Gas Inspection Service, was promoted to the Directorship of the Electricity and Gas Inspection Service, Ottawa.

### Revenue and Expenditure

Appended will be found summaries of the revenue and expenditure of the Department of Trade and Commerce for a number of years past.

Respectfully submitted,

F. C. T. O'HARA,

Deputy Minister.

## REVENUE

SUMMARY of the Revenue of the Department for the Services indicated during a period of thirteen years, i.e., April 1, 1913, to March 31, 1926

DEPARTMENT OF TRADE AND COMMERCE

OTTAWA, CANADA

HON. JAMES A. ROBB, Acting Minister F. C. T. O'HARA, Deputy Minister

# ANNUAL REPORT

OF THE

# WEIGHTS AND MEASURES, ELECTRICITY AND GAS INSPECTION SERVICES

FOR THE FISCAL YEAR ENDING MARCH 31

1926

OTTAWA
F. A. ACLAND
PRINTER TO THE KING'S MOST EXCELLENT MAJESTY
1926

REPORT

OF THE

# INSPECTION OF WEIGHTS AND MEASURES, ELECTRICITY AND GAS

OTTAWA, June 19, 1926.

To the Honourable
The Minister of Trade and Commerce.

SIR,—I have the honour to submit the annual report on the Inspection of Weights and Measures, Electricity and Gas; also statements in connection therewith for the fiscal year ended March 31, 1926.

F. C. T. O'HARA,
*Deputy Minister.*

## WEIGHTS AND MEASURES INSPECTION SERVICE

Mr. E. O. Way, Director of Weights and Measures, reports as follows:—

The Weights and Measures Service, I am pleased to say, has again completed a year of successful activities. The satisfactory position of March, 1925, when the year closed for the first time with a surplus of revenue over expenditure of $1,075.89, has not only been maintained, but improved, the surplus being increased to $22,647.49. The main object of all our efforts for many years, the development of a self-supporting, efficient and effective inspection service, has at last been accomplished, and, given the same limitations of personnel to inspection requirements, together with normal expansion in the business of the country, the service should continue to function free from all charge upon the treasury, or undue burden upon the trading community. There is of course a good deal of inspection work, in relation to short weight and measure, for which there are no fees and as the cities grow, this work is bound to increase, but as trading equipment will increase in direct ratio to expanding cities and trade, the present proportion of remunerative and unremunerative work is likely to continue.

The figures for the year 1925-26 in comparison with the year preceding are:—

| | 1924-25 | 1925-26 |
|---|---|---|
| Revenue | $294,106 64 | $315,841 14 |
| Expenditure | 293,030 75 | 293,193 65 |
| Surplus | $ 1,075 89 | $ 22,647 49 |

That is, whilst expenditure only increased by $162.90 the revenue increased by $21,734.50—and the surplus from $1,075.89 to $22,647.49. Against this surplus, however, should be charged the sum of $19,709.89, covering the salaries of the director's office in the department, which are paid from the civil vote and not from Weights and Measures contingencies.

A comparative reference to schedule "A" shows that actual service expenses increased over last year by $10,483.96, made up chiefly of $5,802.47 advance in salaries and $4,199.58 in travelling, freight and transportation. This was offset by the elimination of $7,989.29 on account of cost of living bonus and $2,331.77 in general contingencies, including a reduction of $1,910.48 for printing—hence the small net increase in expenses of $162.90.

The increase in Revenue is due to a straight expansion in Weights and Measures work, notably in the inspection of equipment for the sale of gasolene. Increased work inseparably involves increased expenditure, but it is a point worth recording that whereas in 1920, the year inspection fees were increased and inspection made annual, it cost $1.15 to collect one dollar, last year the cost was only 93 cents.

## The Fee System

In some quarters there is a disposition to protest the Fee System of weights and measures inspection. The retail merchants in particular protest every year that weights and measures inspection should be a charge upon the treasury and free to the trader, because, they claim, such inspection is for the protection of the public. This is true, but only in part, for the merchant also enjoys protection, as vital, if not more vital to him than to the public. The truth of this is illustrated and substantiated by early weights and measures legislation, of which the following is a characteristic example, and quoted from a statute passed in 1354, in the reign of Edward III:—

"As we have been given to understand that certain merchants buy goods of avoirdupois, wools, and other merchandise by one weight and sell by another; and also that they act deceitfully in the matter of weighing; and also that they use false measures and yards, so as grievously to deceive us and all the people and the honest merchants; we will and ordain that one weight, one measure, and one yard be used throughout all the land, as well without the staple as within it, and that wool and all goods of avoirdupois shall be weighed by the balance."

Here weights and measures legislation and inspection is clearly cited as necessary for the protection of "all the people" and the "honest merchant," and the same holds good to-day. Inspection does not exist because merchants and traders are generally dishonest or deceitful, but to deprive the few that are so inclined of the opportunity of practising dishonesty, to the grievous harm of the public and honest trader alike.

The merchant and trader are not in business for amusement, nor yet as philanthropists. They certainly render a service to the public, but the primary incentive is profit and the keystone of their business, the meter of their profits, is their weighing and measuring equipment. Weighing and measuring is done with as much accuracy and refinement as possible, just as much to protect the merchant against loss as to see that the public get what they pay for. In this the merchant has the greater interest. Wear and tear in weighing machines is always against the merchant. It takes a pound and a fraction to register one pound. The fraction does not benefit individual customers, but the loss to the trader is cumulative and serious. It is in fact to protect the merchant against this loss that has given rise to the wonderful refinements in modern weighing machines and why the old and simple even arm balance has gone out of existence, in the use of which the trader always had to put enough "extra" in the goods pan to make the scale "bump." To-day he splits a line and in doing so, gives just one standard pound, neither more nor less.

But more important still is the fact that the responsibility rests upon the trader to see that he uses nothing but approved, correct, and legally stamped equipment. In most countries, the Government sends its Inspectors from centre to centre, and in each the traders are notified to produce and bring in all their trade equipment for verification and stamping. This is an irksome, inconvenient and costly procedure to the merchant, involving much loss of time. In Canada, the inspector, with his standards, travels right up to the merchants' premises and verifies his equipment in his own place of business. As a quid

pro quo, the fee system is fair and just and a convenience and economy to the merchants, whilst added to this, inspectors render the valuable service of adjusting such machines as are found incorrect and capable of adjustment without machine work.

Then, of course, there are the larger machines that can only be inspected "in situ." After the trader in Europe has brought in his portable equipment for inspection, the inspector has still to go out to inspect the dormant machines at considerable cost—but under the Canadian system, the inspector inspects shop and dormant equipment at the same single visit, and thus proportionately reduces the cost to trader and Government alike.

Yet still another advantage attaches to this system, by the fact that the inspector drops in without notice and so examines equipment in the actual condition in which it is being used by the trader, which increases the inspector's chances of detecting deceitful practices and improper manipulation. The inspection fee then, paid by the merchant, merely amounts to a small insurance premium against unfair competition and against the inconvenience, expense, and loss of time and business in periodically carting his equipment to some Government stamping centre, a system that is wasteful to both Government and trading community alike.

## Staff

Few changes have taken place in the staff during the year. One officer, Mr. N. Merrigold, died in Hamilton, February, 1926, and will not be replaced, whilst Senior Inspector R. J. Wright, of Toronto, retired as from January 1, 1926. Mr. Wright was 76 years of age and had 45 years of intelligent and competent service to his credit. The work in Toronto is such that he must be replaced. One new appointment has been made in Edmonton to meet the increasing work in the northern half of Alberta, but as we are dropping one position in Hamilton, as mentioned above, the personnel stands at the same figure, viz., 111.

## Inspection Details

The following table gives a summary of the various appliances inspected during the year, detailed statistics being given in appendices B, etc.

### Summary

| — | Submitted | Verified | Rejected | Per cent of Rejection |
|---|---|---|---|---|
| Weights | 89,828 | 89,459 | 369 | 0·41 |
| Weights, metric | 1,648 | 1,634 | 14 | 0·85 |
| Measures of capacity | 104,432 | 104,285 | 147 | 0·14 |
| Measures of length | 12,209 | 12,181 | 28 | 0·23 |
| Milk cans | 72,178 | 72,166 | 12 | 0·02 |
| Ice cream containers | 27,476 | 27,473 | 3 | 0·01 |
| Glassware, babcock (pipettes, etc.) | 51,789 | 51,164 | 625 | 1·20 |
| Measuring devices (gasolene) | 29,167 | 27,944 | 1,223 | 4·20 |
| Weighing machines | 170,374 | 162,258 | 8,116 | 4·70 |
| Weighing machines, metric | 571 | 554 | 17 | 2·90 |
| | 559,672 | 549,118 | 10,554 | |

The development in package goods, as a phase of modern centralized production, is reflected in weights and measures statistics in the slow rate of increase in the number of weighing machines inspected—which in the past five years only amounts to some 16 per cent. In the same period, however, the inspection of gasolene measuring devices has increased from 15,363 to 29,167, i.e., over 80 per cent. The latter instruments have usurped first place in importance and

intricacy in all weights and measures work. The measurement of a liquid in a graduated visible glass bowl looks to be the simplest of all propositions, whereas, on the contrary, elaborate regulations and extreme watchfulness are required to ensure reasonable accuracy and protection against the improper diversion and trapping of the measured liquid.

### Babcock Glassware

Some 51,789 pieces of this metric glassware were received for verification, showing a falling-off of 15,983 pieces compared with 1924-25.

The fees, of course, dropped in proportion, amounting to $2,558.20, compared with $3,357.35 for the year preceding.

### Other Duties

The tare weight of freight cars used in the West for the shipment of coal was again taken up early in 1926, with results but little better than last year. Serious inaccuracies as between the actual weight and the stencilled weights of cars continue to exist. The data was again referred to the Railway Commission, as Weights and Measures has no jurisdiction over freight cars. The Railways have met the Western Fuel Dealers and made some concessions and promised closer attention to the tare weighing of cars, but with the price of coal and freight rates what they are to-day, it is becoming obvious that the old, easy, and approximate methods of handling coal shipments no longer meet the situation and that the only satisfactory and ultimate solution would seem to be the net weighing of the coal into freight cars, as is now done with wheat.

### Seizures and Prosecutions

During the year, one hundred and seven (107) weighing machines and thirty measures were seized as being either illegal or false and unjust.

In nine cases proceedings were instituted, resulting in seven convictions, with penalties amounting to $158. One case was settled out of court, and one case is still pending.

### The Metric System

Interest for Canada in the Metric System last year centred in Washington D.C., where hearings have been held before a Committee of Congress, on a Metric Bill, H.R.-10, introduced by Mr. Britten.

The object of the Bill is "that from and after the 1st day of January, 1935, metric weights and measures, except as herein provided, shall be used for the following purposes," which, briefly stated, are merchandizing, transportation charges, postal, excise and customs charges; but the Bill expressly states its provisions shall not apply to manufacture, surveys, etc.

The latter exemptions are of special interest and testify to the recognized difficulty of changing the units of measure in established and more or less standardized production. And yet it is here that the Metric System is most needed to place manufactured products on an interchangeable international basis. Conversely, there is not much to be gained by changing the units of national commerce. In other words, very little is to be gained by compelling dry good merchants to sell by the metre, whilst industry manufactures by the inch. As the Bill has met with considerable opposition, the conjecture is that it will not be reported. (The latest advice is that the Committee has declined to report the Bill to Congress.)

In the evidence that was taken, one gentleman, admittedly an opponent of the Metric System, submitted some scales or rules of length that he bought in Liege, Belgium, in 1921. These rules were of four different denominations: metric, the old Paris inch, the Belgium inch and the English inch. Belgium adopted the metric system in 1820, yet with metric countries all around her,

we find measures of old denominations in use (for sale must denote demand and use) after over 100 years of compulsory metric legislation. The customs and habits of a people die slowly and the advocates of change cannot airily dismiss such national traits and public psychology as of no effect. The biggest obstacle in placing the English currency on a decimal basis, whilst retaining the gold pound and nearly all its present subdivisions, is due to the effect upon the masses in changing the value of the penny from twelve to ten to the shilling—the 20th of the pound.

If the Metric System has any special merit, it is in its peculiar adaptability for scientific and laboratory use, but even this superiority over other systems is not without its defects, chiefly due to the standardization of metric units at 4°C. instead of at the normal temperature of 62° F. in the English system.

What this means is well illustrated by a recent experience in the Weights and Measures laboratory last year. It has been the custom of this service in testing Babcock pipettes to verify, we will say, an 18 c.c. pipette by weighing its contents of distilled water against an 18 gram weight, on a fine laboratory balance. On one occasion, 90 pipettes out of 144 were rejected, whereupon, after inquiring of our methods, the manufacturer wrote us as follows:—

"We are still somewhat in doubt whether you mean the pipette to contain 17·6 grams at 62° F. or to contain 17·6 ml. at 62°F. You realize of course, that the volume of 17·6 grams of water at 62° F. is approximately 0·05 ml. greater than 17·6 ml. We find that the apparent weight in air of 1,000 ml. of water at 62°F. (16·7°C.) is 997·79 grams. One thousand grams would exceed this by 2·21 ml. Therefore, 17·6 grams would exceed 17·6 ml. by 0·0389 ml. or 17·6 ml. at 62°F. will weigh 0·0389 grams less than 17·6 grams, that is 17·5611 grams."

The above illustrates the fact that the interchangeability of the units of the Metric System, is only theoretical, and that the practical use of this property occasioned much trouble in testing commercial glassware. It means that 17·6 c.c. does not weigh 17·6 grams—except at one fixed temperature, 4°C., which is never met with in industrial and commercial conditions. Of course, 17·6 c.c. is 17·6 ml. at any temperature, but as soon as the temperature deviates from the standard temperature of 4°C., the identity between 17·6 c.c. or 17·6 ml. and 17·6 grams ceases to exist.

# APPENDIX A

## STATEMENT of Weights and Measures—Expenditure and Revenue for Fiscal Year ended March 31, 1926

| Districts | District Inspectors | Salaries | Special Assistance | Rent | Travel | Sundries | Total | Revenue |
|---|---|---|---|---|---|---|---|---|
| | | $ cts. | $ cts. | $ cts. | $ cts. | $ cts. | $ cts. | $ cts. |
| ONTARIO— | | | | | | | | |

## ELECTRICITY AND GAS INSPECTION SERVICES

The following report concerning the successful activities of the Electricity and Gas Inspection Services during the past year is most gratifying:—

| | 1924-25 | 1925-26 |
|---|---|---|
| Electricity meters tested | 221,450 | 260,960 |
| Gas meters tested | 105,399 | 115,814 |
| Totals | 326,849 | 376,774 |
| REVENUE:— | | |
| Electricity | $ 142,232 90 | $ 167,051 70 |
| Gas | 73,707 60 | 80,069 40 |
| Totals | $ 215,940 50 | $ 247,121 10 |
| EXPENDITURE:— | | |
| Electricity | $ 116,831 43 | $ 118,190 16 |
| Gas | 49,597 85 | 48,574 97 |
| Totals | $ 166,429 28 | $ 166,765 13 |

The above figures show a great increase in the number of meters tested over the preceding year, namely 49,925, and the increase in revenue was $31,180.60. The increase in expenditure, however, was only $335.85.

The excess of revenue over expenditure is apparently $80,355.97. This figure, however, does not include the salaries of the staff at the Laboratory in Ottawa amounting to approximately $16,000, nor does it include the rentals for our various offices throughout the Dominion which would amount to about $25,000. Then there is the cost of the furniture for these offices, the interest on the money invested and depreciation on the testing equipment. If all these items were taken into consideration the surplus above mentioned would be greatly depreciated if not made to disappear entirely.

### ELECTRICITY INSPECTION

The total number of electric meters in use throughout Canada as given on returns sent in to the Department is approximately 1,241,000. There were 260,960 meters tested during the year of which 90,263 were new. The number tested was about 21 per cent of the number in use. There were very nearly 1,400 certificates issued to electric light companies, commissions, etc. in compliance with section 10 of the Electricity Inspection Act, chapter 16, 1907.

Considerable discussion has taken place regarding the checking and testing of instrument transformers. In large installations where large blocks of power are measured, instrument transformers are an integral part of the metering equipment. The meter may, in itself, be absolutely correct but if it is connected to the service by means of inaccurate transformers, the registration of the meter is also inaccurate.

Up to the present not much attention has been paid to the testing of transformers but the time has arrived when it will command our very careful consideration.

### GAS INSPECTION

Two kinds of gas are sold in Canada, namely, natural and manufactured. Included in the latter are, straight coal gas, carburetted water gas, coke oven gas and acetylene.

Natural gas is found mainly in Ontario and Alberta but is also present in quite large quantities near Moncton, New Brunswick. During the past year over 13,000,000,000 cubic feet of this gas were sold through 85,752 meters.

Manufactured gas consisting of coal, carburetted water and coke oven is sold in 32 different places enumerated in appendix F. There were 14,427,246,017 cubic feet supplied during the past year through 443,067 meters which on an average represents 2,712 cubic feet per meter per month.

This gas is also subject to a calorific test which test is made to determine the heating value of a cubic foot of gas.

The standard for the calorific power of manufactured gas supplied by a contractor is 450 British Thermal Units per cubic foot of saturated gas when burned in saturated air. There were 3,395 such tests made and in only 16 cases was the gas found to be below the standard.

Acetylene gas is manufactured principally in Manitoba and only on a small scale. During the last year 1,210,894 cubic feet were made and sold through 425 meters.

## Laboratories

The main laboratory is maintained at Ottawa with branches at Winnipeg and Vancouver.

The chief work in the laboratories consists in maintaining the accuracy of the secondary standards supplied to the outside offices for testing purposes. During the year there were tested for our own purposes 207 instruments and for outside companies 48 instruments.

The laboratory at Vancouver has been moved recently from its old location at 716 Pender street West to 326 Howe street. It may be understood then that there was a considerable period in which no testing was done due to this change.

One very important feature of the work carried on at the Ottawa laboratory is the testing of new meters that are sent to the department for approval. The Electricity Inspection Act states that "no electric meter shall be admitted to verification in Canada until it has received the approval of the department." From this it is evident that a decided responsibility is placed on officers in the laboratory in having to determine what meters may be sold in Canada. During the past year fourteen new types of watthour meters or alterations to old types were submitted for approval, of which nine were recommended for approval and five were either rejected or held pending further information and investigation. Considerable time is required for examining and testing each meter before it is approved. A great number of tests are necessary to determine if it meets the requirements outlined in the Regulations governing the approval of electric meters.

In addition to the above, tests were conducted on a number of dry batteries and also on a number of incandescent lamps.

### *Checking of Laboratory Sub-Standards and Inspectors' Working Standards*

In view of the fact that no mention had been previously made regarding the method of checking our inspection standards, it might be well to show the links connecting these inspection standards with the primary standards maintained at the laboratory. The following is a brief outline of the procedure:—

There are two methods of checking instruments, either by applying a known load to the instrument and checking the reading of the instrument under test at that load, or by loading the instrument to any required reading and measuring the true load applied.

By the former method the accuracy of calibration depends (unless the instrument is absolutely correct) upon the accuracy with which the instrument under test can be read between marked positions; by the latter method, on the accuracy with which the testing standards can be read.

The primary current standards for Canada are a series of specially constructed Kelvin ampere balances graduated in steps from one-fifth to one hundred and twenty-five amperes, but not capable of giving intermediate readings. The voltage standards are a group of Weston cells certified by the National Physical Laboratory of London, England, and checked by the Bureau of Standards at Washington.

The laboratory potentiometer, in conjunction with a specially sensitive galvanometer, will show a difference between two standard cells of five parts in one million, and it has been calibrated to read at any point to an accuracy within one part in one thousand of a standard cell.

A special standard resistance of 0·01 ohm capable of carrying 150 amperes continuously has been constructed for use in the laboratory and has been certified by the National Physical Laboratory of London, England. The accuracy of this standard is checked by means of the primary standards mentioned above and can be relied upon for an accuracy of 0·01 per cent. By using this standard resistance as a shunt in conjunction with the above mentioned potentiometer, electrical quantities can be measured to an accuracy of 0·01 per cent.

The laboratory standards used are of the Weston type and consist of a D.C. ammeter and voltmeter. They are checked by the second method mentioned above using the potentiometer and special resistance and volt box. These Weston instruments have scales over 12 inches long divided into 750 parts, each of which may be again divided into two so that they are capable of being calibrated to one part in 1,500 of full scale reading. These Weston instruments are used in turn for the calibration of a special series of A.C. D.C. wattmeters, and by using these wattmeters to control the load and a special timing device evolved at the laboratory the inspectors' rotating standards can be calibrated to be accurate to one-tenth of one per cent.

The accuracy of conversion of these A.C. D.C. wattmeters is checked by means of a Kelvin watt balance, by a Drysdale A.C. potentiometer, and also by a special Drysdale non-inductive A.C. D.C. double standard wattmeter, in which instrument an A.C. load can be applied to one element and a D.C. load to the other element and the two loads accurately compared.

May I repeat what I said in my report of last year, which was that the laboratory is well equipped for calibrating and standardizing electrical instruments. We invite outside concerns to send their instruments to us for calibration purposes. We are not, of course, in a position to replace parts, but we are prepared to thoroughly clean and adjust and put the instruments into first class condition. Our charges are very reasonable and we pride ourselves in giving quick and efficient service.

## Exportation of Electricity

Section 10 of the Electricity and Fluid Exportation Act, chapter 16, 1907, gives the Governor in Council power to impose an export duty on all electrical energy exported from Canada. An order in council was passed accordingly which imposed an export duty of three one-hundredths of one cent per kilowatt hour upon all electrical energy exported from Canada on, from and after the first day of April, 1925. The particulars regarding same are:—

| | |
|---|---|
| Export duty collected | $288,392 41 |
| License fees | 600 00 |
| Total | $288,992 41 |
| Expenses | 263 11 |
| Balance | $288,729 30 |

Cost of collecting duty less than one-tenth of 1 per cent.

The kilowatt hours produced for use in Canada were 3,575,289,701, as compared with 3,127,395,093 for the preceding year. The kilowatt hours produced for export were 1,359,343,735, as compared with 1,239,071,297 for the preceding year.

### International Electrotechnical Commission

Within the past two years the Canadian National Committee of the I.E.C. has taken on a new lease of life and has become quite active. In April, 1925, the secretary of the committee, Mr. H. A. Dupre, Assistant Director of this branch, was sent to the Hague Conference and in his report states: "The president expressed his great satisfaction that Canada had again sent a direct representative, and the delegates of all the countries represented expressed a hope that the personal contact with the Canadian National Committee now re-established might endure. The I.E.C. is now handling the international work of the various National Engineering Standards Associations, and is in consequence branching out into work which is of the greatest practical commercial importance."

This year the Annual Conference was held at New York and as a result of special efforts put forth by the Canadian Committee, the members of the International Committee visited a number of places of interest in Canada. Not the least of these was Ottawa which was visited on May 1 last. Such a visit cannot fail to do good as no doubt a number of the delegates have a different conception of Canada than they had before.

In support of the work of the International Electrotechnical Committee, the department donated the sum of £50.

### Staff

The work of the branch was carried on by practically the same staff as in the year previous, notwithstanding the large increase in the amount of work done.

I cannot speak too highly of the work performed by the various officers throughout the services. They are loyal, conscientious, painstaking, and endeavour to perform their work in a manner that will bring credit to the department. It is quite a common occurrence for our Inspectors to work overtime in order that their work be kept up to date.

# APPENDIX D

STATEMENT of Electricity Expenditure and Revenue for Fiscal Year ended March 31, 1926

| " " | Hagersville, Ont | 388 |
| Fonthill & Ridgeville Gas Co., Ltd | Fonthill and Ridgeville, Ont | 175 |
| Industrial Natural Gas Co., Ltd | Bertie, Humberstone and Crowland, Ont | 92 |
| Lake Shore Natural Gas Company, Ltd | Crescent and Eric Beach, Fort Erie, Ont | 338 |
| Midfield Natural Gas Co., Ltd | Twps. of Oneida and North Cayuga, County of Haldimand, Ont | 34 |
| Port Colborne Welland Natural Gas & Oil Co., Limited | Caledonia, Ont | 600 |
| Provincial Natural Gas & Fuel Co. of Ontario, Ltd | Bridgeburg, Ont | 1,026 |
| " " " " | Niagara Falls, Ont | 2,672 |
| " " " " | Sherkston, Ont | 1,607 |
| " " " " | Welland, Ont | 2,049 |
| Rose Hill Natural Gas Co., Ltd | Rose Hill, Twp. of Bertie, Welland County, Ont | 42 |

## APPENDIX I—Concluded

### STATEMENT of Natural Gas Companies Registered—Concluded

| District and Name | Location | Number of Meters |
|---|---|---|
| *Hamilton District*—Concluded | | |
| Sterling Gas Company, Ltd | Port Colborne, Ont | 1,612 |
| United Gas Cos., Ltd | St. Catharines, Ont | 4,691 |
| United Gas & Fuel Co., Ltd | Hamilton, Ont | |
| *London District*— | | |
| Chatham Gas Co., Ltd | Chatham, Ont | 3,626 |
| Central Pipe Line Co. of Chatham | Aylmer, Ont | 678 |
| " " " | Malahide and Bayham, Ont | 72 |
| " " " | Port Burwell, Ont | 92 |
| " " " | Vienna, Ont | 69 |
| Dominion Natural Gas Co., Ltd | Tillsonburg, Ont | 967 |
| " " " | Ingersoll, Ont | 953 |
| Leamington, Corporation of | Leamington, Ont | 1,313 |
| Petrolia Utilities Co., Ltd | Petrolia, Ont | 750 |
| Progressive Oil & Gas Company | Belmont, Ont | 70 |
| Southern Ontario Gas Co., Ltd | Aldboro Twp., Ont | 27 |
| " " | Dunwich Twp., Ont | 59 |
| " " | Oxford Twp., Ont | 63 |
| " " | Dorchester and Wallacetown, Ont | 163 |
| " " | Dutton, Ont | 256 |
| " " | Highgate, Ont | 117 |
| " " | Kingsville and and country, including old Glenwood, Ont | 258 |
| " " | Lambeth, Ont | 95 |
| " " | Raleigh and Harwich, Ont | 12 |
| " " | Leamington, Wheatley and Country, Ont | 843 |
| " " | Shedden and Fingal, Ont | 131 |
| " " | Southwold Twp., Ont | 109 |
| " " | West Lorne, Ont | 226 |
| " " | Westminster Twp., Ont | 127 |
| Union Natural Gas Co. of Canada | Blenheim, Ont | 526 |
| " " " | Dresden, Ont | 480 |
| " " " | Essex, Ont | 451 |
| " " " | Ridgetown, Ont | 631 |
| " " " | Sarnia, Ont | 4,171 |
| " " " | Tilbury, Ont | 392 |
| Wallaceburg Gas Company | Wallaceburg, Ont | 1,028 |
| Windsor Gas Company, Ltd | Ford, Ont | 427 |
| " " | Riverside, Ont | 30 |
| " " | Sandwich, Ont | 438 |
| " " | Walkerville, Ont | 1,365 |
| " " | Windsor, Ont | 6,890 |
| Dominion Natural Gas Co., Ltd | Woodstock, Ont | 1,636 |
| *St. John District*— | | |
| Moncton Tramways, Electricity & Gas Co., Ltd | Moncton, N.B | 4,623 |
| Total Number of Meters | | 85,752 |

# APPENDIX J

## ACETYLENE Gas Companies Registered, 1926

| District and Name | Location | Number of Meters |
|---|---|---|
| *Ottawa District—* | | |
| People's Gas Supply Co., Ltd | Ottawa, Ont | 1 |
| *Winnipeg District—* | | |
| Birtle, Town of | Birtle, Man | 36 |
| Canada Carbide Co | Hamiota, Man | 55 |
| Canada Carbide Co | Morris, Man | 66 |
| Deloraine Gas Co | Deloraine, Man | 78 |
| Manitou Gas Co | Manitou, Man | 69 |
| Souris Consumers Gas Co | Souris, Man | 120 |
| Total Number of Meters | | 425 |

# APPENDIX K

STATEMENT showing amount of Electrical Energy, Gas, or Fluid generated or produced for export and for consumption in Canada, under the authority of the Electricity and Fluid Exportation Act, for the year ending 31st day of March, 1926.

# APPENDIX L

LIST of Electric Light and Power Companies Registered under the Provisions of the Electricity Inspection Act, during the Fiscal Year ended March 31, 1926

| District and Company | Address | Type of Motive Power | Phases of System | Frequency of System | Generator Voltage | Service Voltages | | Number of Meters | |
|---|---|---|---|---|---|---|---|---|---|
| | | | | | | Power | Lighting | Power | Lighting |
| *Charlottetown—* | | | | | | | | | |
| Leard Electric Light and Power | Alberton | Water | 2–3 | 60 | 2,200 | 220/110 | 110 | | 102 |
| Charles Murray Electric Light Co | Bradalbane | Water | D.C. | | 110 | | 110 | | 15 |
| Cardigan Electric Company, Ltd | Cardigan | Purchased | | | | | 110 | 1 | 31 |
| Maritime Electric Company, Ltd | Charlottetown | Gas and steam | 1–3 | 60 | 2,200 | 220 | 110 | 152 | 2,332 |
| Geo. E. Leard & Son | Crapaud | Water | 1–2 | 60 | 2,200 | | 110 | | 37 |
| The Hunter River Electric Light Co., Ltd. | Hunter River | Water | 3 | 60 | 2,200 | | 110 | | 32 |
| Kinkora Electric Light Co | Kinkora | Purchased | 1–3 | 60 | 2,200 | | 110 | | 19 |
| The Montague Electric Co., Ltd | Montague | Water | 1–3 | 60 | 2,250 | 220/110 | 110 | 25 | 258 |
| Charles W. Ives | North Tryon | Water and steam | 1–3 | 60 | 2,200 | | 110 | | 57 |
| The Town of Souris | Souris | Oil | 2 | 50 | 2,200 | | 110 | 1 | 110 |
| B. W. Tanton | Summerside | Water | 2–3 | 60 | 2,200 | | 110 | | 110 |
| Town of Summerside, Light Dept | Summerside | Oil | 1–3 | 60 | 2,200 | 220 | 110 | 9 | 561 |
| *Halifax—* | | | | | | | | | |
| Canada Electric Company, Ltd | Amherst | Steam | 1–3 | 60 | 2,200 | 2,200/220 | 220/110 | 53 | 1,589 |

DOMINION OF CANADA

# REPORT

OF THE

# COMMISSIONER OF PATENTS

FOR THE

## Fiscal Year ended March 31, 1926

PRINTED BY ORDER OF PARLIAMENT

OTTAWA
F. A. ACLAND
PRINTER TO THE KING'S MOST EXCELLENT MAJESTY
1926

# ANNUAL REPORT

OF THE

# COMMISSIONER OF PATENTS

*To General His Excellency the Right Honourable Lord Byng of Vimy, G.C.B., G.C.M.G., M.V.O., Governor General and Commander-in-Chief of the Dominion of Canada.*

MAY IT PLEASE YOUR EXCELLENCY:

The undersigned has the honour to present to Your Excellency the report of the Commissioner of Patents for the fiscal year ended March 31, 1926.

All of which is respectfully submitted.

JAMES A. ROBB,
*Acting Minister of Trade and Commerce.*

OTTAWA, June 24, 1926.

# ANNUAL REPORT

OF THE

# COMMISSIONER OF PATENTS

---

The Hon. James A. Robb, M.P.,
Acting Minister of Trade and Commerce.

Sir,—In pursuance of the requirements of the 60th section of the Patent Act, chapter 23 of the Statutes of 1923, and section 5A of an Act respecting the Patent Act, the Copyright Act, the Trade Mark and Design Act, and the Timber Marking Act, chapter 64, 9 and 10 George V, I have the honour to report as follows upon the proceedings in the fiscal year ended March 31, 1926 under the provisions of these Acts.

## General Business

The volume of business transacted by the office was slightly less than last year. The total number of transactions decreased about 6 per cent. It was explained in last year's report that the number of applications filed in the fiscal year ended March 31, 1925, was exceptionally large and was due for the most part to the extension of time for filing applications under the new Patent Act of September 1, 1923. The number of applications for patents this year was 11,133. This was 3,701 fewer applications than last year. or a decrease of over 25 per cent, but is above the average for the last ten years.

There were 11,001 patents issued. This is 1,493 more than last year and represents a gain of nearly 16 per cent. Applications allowed by examiners totalled 11,818, a decrease of 240, or about 2 per cent. Reports by examiners in addition to the applications allowed were 6,328, an increase of 209, or 3 per cent. Renewal fee certificates on patents issued under former Acts amounted to 1,761. This is an increase of 276, or over 18 per cent. Though there was an increase in the number of certificates issued this year they should decrease from now on as on nearly all patents issued since 1921 the fee for the full term of eighteen years was paid when the patent was granted. Fifty of the above renewals were accepted under section 47 of the Patent Act and of this fifty there were sixteen under authority of special Acts of Parliament. The registration of assignments was less than last year but was the second largest registration of any year. The number of patents assigned by the instruments recorded was greater than ever before, as shown by the increase of fees received. The number recorded was 5,948, a decrease of 1,571, or nearly 20 per cent. Caveat applications and grants amounted to 431 and 396 respectively. This was nine applications and four grants more than last year. Orders for 5,083 certified copies of specifications and drawings were completed. This is 177 more than last year. Forty-six abandoned applications were reinstated under rule 11. Under subsection 3 of section 43 of the Patent Act, 254 forfeited applications were restored and 61 patents which had become void for non-payment of fees, failure to manufacture

and illegal importation were revived under section 47 of the Patent Act. Transactions relating to patents totalled 54,245, a decrease of 3,322 from the preceding year.

Copyright registrations numbered 2,861. This is 66 more than the preceding year and is the greatest registration of any year. Registrations of trade marks were 2,061, a decrease of 141, or over 6 per cent. One hundred and forty-two specific trade marks were renewed. There were 494, or 38 more industrial designs granted, and 31 designs were renewed. Timber mark registrations dropped from 22 last year to 12 this year. The assignments and licenses of copyrights, trade marks, designs and timber marks amount to 1,744, a decrease of 745, or nearly 30 per cent. The total transactions relating to copyrights, trade marks, designs and timber marks were 7,345. This is 774, or nearly 10 per cent less than the previous twelve months.

A statement of the transactions of the Patent and Copyright Office is given in appendix A, and comparative statements of the Patent Branch and the Copyright and Trade Mark Branch since 1872 are given in appendices B and C respectively.

### Receipts and Expenditures

The total fees received were less than last year. In the Patent Branch there was a considerable decrease for applications filed and for the revival of patents under section 47, but subscriptions to the Patent Office Record, fees for recording assignments, for certified copies, and for restoration of applications under section 43 of the Patent Act all increased. In the Copyright and Trade Mark Branch fees for registration in all departments except Timber Marks were greater. For recording assignments there was also a decrease but for certified copies there was an increase of over 60 per cent.

The net receipts amounted to $535,139.34, a decrease of $15,391.64. The Patent Branch fees were $455,211.48, or $19,402.80 less than last year, and the fees from the Copyright and Trade Mark Branch were $79,927.86, an increase of $4,011.16.

The main items of expenditure—civil government, printing the Patent Office Record and contingencies—were slightly more than last year. The total expenditure amounted to $208,966.86, an increase of $13,158.77.

The surplus of receipts over expenditure was $326,172.48.

A statement of the receipts and expenditure is given in appendix D and comparative detailed statements for the past ten years for the Patent Branch and the Trade Mark and Copyright Branch are given in appendices E and F respectively.

### Residence of Inventors

In appendix G is given the country of residence of inventors for the patents granted. Applicants residing in Canada numbered 1,292, or nearly 12 per cent of the total. This is a decrease of over 1 per cent compared with last year. Of the total issue 7,891 were applied for by residents of the United States. This is over 71 per cent of the whole issue and is a gain of 2 per cent over last year. Residents of Great Britain and the British colonies and possessions applied for 933, or over 8 per cent of the issue. This is a decrease of 1 per cent. The remaining 885 patents, or 8 per cent of the issue, came from applicants in thirty-one other countries and is the same percentage as last year.

### Patent Record and Exchange of Publications

The official journal of the office, the Canadian Patent Office Record and Register of Copyrights and Trade Marks, was issued each Tuesday. This corresponds with the date of grant of patents. The Record publishes the prin-

cipal drawing and claims of patents, notices of hearings under section 47 of the Patent Act, abridgments of trade marks and designs and list of copyrights and assignments. In addition to the sales by subscription the Record was distributed to over ninety government, university and public libraries in Canada, to over seventy in Great Britain and its Dominions, to fifty in the United States, and to twenty other foreign libraries and consular offices.

During the year the official journals and reports on patents, trade marks and designs were received from Great Britain, Australia, New Zealand, France, United States, Belgium, Japan, Switzerland, Norway, Mexico, and the Union of Socialist Soviet Republics in exchange for the Record. The office was also in receipt of the bound volumes of specifications and abridgments of British patents and the printed copies of French and United States patents. The exchange of the Patent Record for about fifty technical and scientific periodicals for the use of the staff was continued.

### Patent Office Library

The Patent Office Library in which are kept the bound volumes of British patents from 1615, the abridged specifications of British patents from 1622, the United States bound volumes of patents from 1872 and the earlier French patents as well as the British, French and United States indices and reports was open to the public during the usual office hours. The number of patent attorneys and others who used the library was considerably greater than last year. Over 400 volumes were added during the year.

### Staff

The number of officers, clerks and employees of the office averaged eighty-five during the year and was composed of seventy-six permanent and nine temporary. This is a reduction of four from the permanent staff and an increase of one to the temporary. The reduction in the permanent staff was due to retirement on superannuation.

### Letters and Correspondence

Letters and correspondence relating to patent, copyright and other office transactions received by the office totalled 62,356 and the letters, correspondence forms and publications despatched from the office totalled 139,647. The decrease in the number of letters received was 6,777 and in the number despatched there was an increase of 2,387.

### Register of Patent Attorneys

Under section 57 of the Patent Act requiring registration of patent attorneys and others entitled to present and prosecute patent applications 167 names were added to the roster. The total number on the register at the close of the year was 1,696.

### Revival of Patents

Under section 47 of the Patent Act 46 petitions were presented for the restoration and revival of 61 patents that had become void by illegal importation, non-manufacture and failure to pay renewal fees. Of the patents revived six had lapsed through failure to manufacture, illegal importation and non-payment of renewal fees, one from failure to manufacture and non-payment of fees, three from failure to manufacture, seven from illegal importation and non-manufacture and forty-four from failure to pay fees. Five hearings for which notice had been published were pending under this section at the close of the year.

## LEGISLATION

Seven special Acts were passed by Parliament for the relief of the owners of seventeen patents. Six of these Acts affecting sixteen patents provided for the acceptance of petition for revival under section 47. The other Act affecting one patent validated the acceptance of the final fee on the restoration of the application under subsection 3 of section 43 of the Patent Act.

Respectfully submitted,

GEORGE F. O'HALLORAN,

*Commissioner of Patents.*

OTTAWA, June 24, 1926.

# APPENDICES

## APPENDIX A

### Transactions of the Patent and Copyright Office from April 1, 1925 to March 31, 1926

*(a)* Transactions of the Patent Branch—

| | | |
|---|---|---|
| Applications for patents | | 11,133 |
| Patents granted— | | |
| Fees paid for 6 years at issue | 52 | |
| Fees paid for 18 years at issue | 10,906 | |
| Reissues granted— | | |
| For 18 years | 43 | |
| | | 11,001 |
| Certificates for renewal after issue | | 1,761 |
| Assignment of patents | | 5,948 |
| Applications allowed by Examiners | | 11,818 |
| Reports by examiners in addition to allowances | | 6,328 |
| Caveat applications | | 431 |
| Caveat grants | | 396 |
| Applications reinstated | | 46 |
| Applications restored under section 43 | | 254 |
| Petitions for revival of patents under section 47 | | 44 |
| Certified copies of patents | | 5,083 |
| Applications under sections 40 and 41 | | 2 |
| Total transactions | | 54,245 |

*(b)* Transactions of the Copyright and Trade Mark Branch—

| | | |
|---|---|---|
| 1. Copyrights with certificates | 2,600 | |
| Copyrights without certificates | 261 | |
| Assignments of copyrights | 1,050 | |
| Licenses of copyright registered | 2 | |
| Total | | 3,914 |
| 2. Trade marks | 2,061 | |
| Renewals of specific trade marks | 142 | |
| Assignments of trade marks | 592 | |
| Total | | 2,795 |
| 3. Industrial designs | 494 | |
| Renewals of industrial designs | 31 | |
| Assignments of industrial designs | 93 | |
| Total | | 618 |
| 4. Timber marks | 12 | |
| Assignments of timber marks | 6 | |
| Total | | 18 |
| Total registrations | | 7,345 |
| Grand total | | 61,590 |

## STANDARDS, SURVEY AND APPEAL BOARDS

---

### PART I—THE GRAIN STANDARDS BOARD

1. *Western.*—R. J. Phin, Moosomin, Sask.; D. W. McCuaig, Portage la Prairie, Man.; Hon. W. R. Motherwell, Regina, Sask.; K. Campbell, Brandon, Man.; Chairman; W. A. Matheson, Winnipeg, Man.; W. A. Black, Montreal; R. A. Thompson, Lynden, Ont.; W. H. Fairfield, Lethbridge, Alta.; C. B. Watts, Toronto, Ont.; C. S. Langille, Winnipeg, Man.; D. Horn, Winnipeg, Man.; T. A. Crerar, Winnipeg, Man.; D. D. Young, Winnipeg, Man.; Andrew Kelly, Winnipeg, Man.; Donald McRae, Regina, Sask.; W. J. Rutherford, Saskatoon, Sask.; J. Maharg, Moose Jaw, Sask.; A. E. Wilson, Indian Head, Sask.; T. O. King, Raymond, Alta.; Geo. Serls, Winnipeg, Man., and C. N. Bell, Secretary, Winnipeg, Man.

2. *Eastern.*—Toronto: John Carrick, H. H. Goode, F. W. Hay, A. O. Hogg, R. I. Braiden, H. L. Rice, C. B. Watts, M. Doherty, S. Hisey, C. W. Band, Murray Brown, T. D. Duncombe, F. D. Tolchard, Secretary.

Montreal: H. D. Dwyer, N. Wight, E. S. Jaques, A. G. Burton, A. A. Bowen, W. MacDonald; H. C. Beatty, Secretary.

### GRAIN STANDARDS BOARD

MONTREAL, QUE.

COPY OF THE MINUTES OF THE MEETING OF THE EASTERN GRAIN STANDARDS BOARD HELD APRIL 7, 1926

Present: N: Wight, chairman; A. Geo. Burton, E. S. Jaques, H. D. Dwyer and A. A. Bowen.

The board fixed the standards for the following grades of grain, samples of which were deposited with the Chief Grain Inspector:—

No. 1 Mixed Elevator Feed Oats (minimum 36 pounds).
No. 2 Mixed Elevator Feed Oats (minimum 34 pounds).

The meeting then adjourned.

36631—2

MONTREAL, QUE.

COPY OF THE MINUTES OF THE MEETING OF THE EASTERN GRAIN STANDARDS BOARD HELD JUNE 9, 1926

Present: N. Wight, chairman; E. S. Jaques, A. Geo. Burton and W. McDonald.

The board fixed the standards for the following grades of United States grain, samples of which were deposited with the Chief Grain Inspector and myself:—

No. 2 Amber Durum Wheat.
No. 2 Mixed Durum Wheat.
No. 2 Red Durum.
No. 2 White Clipped Oats.
No. 2 Rye Western.
48 pound Malting Barley.

The meeting then adjourned.

---

MONTREAL, QUE.

COPY OF THE MINUTES OF THE MEETING OF THE EASTERN GRAIN STANDARDS BOARD HELD OCTOBER 27, 1926

Present: N. Wight, Chairman; A. Geo. Burton, H. D. Dwyer and W. McDonald.

The board fixed the standards for the following grades of United States and Canadian grain, samples of which were deposited with the Chief Grain Inspector and myself:—

No. 2 Hard Winter Wheat.
No. 2 Red Winter Wheat.
No. 2 Amber Durum.
No. 2 Mixed Durum.
No. 2 Western Rye.
No. 2 Red Durum.
48 pound Malting Barley.
No. 2 Yellow Corn.

The meeting then adjourned.

(Sgd.) H. C. BEATTY,
*Secretary.*

## GRAIN STANDARDS BOARD

WINNIPEG, MAN.

COPY OF MINUTES OF THE MEETING OF THE WESTERN GRAIN STANDARDS BOARD HELD OCTOBER 26, 1926

The regular annual meeting of the Western Grain Standards Board was held in the Board Room, Grain Exchange building, this day at 10 o'clock, a.m.

Present: Messrs. K. Campbell, (chairman), D. D. Young (vice-chairman), Hon. J. A. Maharg, C. S. Langille, T. O. King, W. H. Fairfield, C. B. Watts, D. McRae, R. A. Thompson, D. Horn, W. A. Matheson, George Serls, and C. N. Bell, secretary.

Messrs. J. D. Fraser, Chief Inspector, and F. Symes, Inspector at Fort William, were in attendance.

Minutes of the last meeting held October 23, 1925, were read and approved.

Letters of regret for non-attendance were read from Hon. W. R. Motherwell, W. A. Black and A. E. Wilson.

The secretary reported the death during the past year of Mr. James Riddell and on motion he was directed to forward to Mrs. Riddell the regrets of this board.

Subsequently, during the day, the board selected Standard samples for No. 4, No. 5, and No. 6, wheat.

The following resolutions were passed by the board:—

1. That all barley not good enough to grade as No. 4 be graded as feed in the discretion of the inspector.
2. That all wheat not good enough to grade No. 6 be graded "feed" in the discretion of the inspector.
3. A committee be and is hereby appointed under the provisions of the Canada Grain Act to meet, and if it proves to be necessary on account of climatic conditions to select and establish other commercial grades of grain, the members of this committee to be the chairman and all members of this board resident in Winnipeg.

The meeting then adjourned.

(Sgd.) C. N. BELL,
*Secretary.*

## PART II—GRAIN SURVEY BOARDS

1. *Toronto.*—D. Plewes, John Carrick, D. O. Ellis, A. O. Hogg, H. H. Goode, D. A. Campbell, S. Hisey, C. B. Watts, R. I. Braiden, C. W. Band, Murray Brown; F. D. Tolchard, secretary.

2. *Montreal.*—C. B. Esdaile, A. G. Burton, E. S. Jaques, Jos. Quintal, J. M. Vittie, T. H. Reeves; and H. C. Beatty, secretary.

# CHAPTER II

## REPORT OF MR. J. D. FRASER, CHIEF GRAIN INSPECTOR

WINNIPEG, MAN., November 24, 1926.

The Secretary,
Board of Grain Commissioners,
Fort William, Ont.

DEAR SIR,—Herewith is my annual report for the crop year ending July 31, 1926.

### WESTERN INSPECTION DIVISION

The crop of the year 1925 was the third largest produced in the division, being surpassed only by the crops of 1915 and 1923. At the time of cutting, it promised a crop of high quality, but unfortunately about September 20 rain and snow put a stop to threshing for from two to six weeks. The western portion of the division was affected to the greater extent by this precipitation. Threshing was again started and completed the latter half of October and first half of November, but owing to the shorter hours of daylight and colder weather at this time of the year, the grain did not dry out in the stooks, and a very large percentage had to be threshed when it was in a tough or damp state. The grain, besides being out of condition, was badly weathered, which affected the grade and lowered the percentage of high grade grain, with the result that only 63 per cent of the wheat graded into the contract grades, instead of about 85 or 90 per cent as promised at cutting time.

The total inspections for the crop year of 1925-26 in the Western Division, amounted to 328,638 cars, as against 223,181 cars for the previous year.

The total inspections are made up as follows:—

| | Cars | | Cars |
|---|---|---|---|
| Wheat | 263,086 | Mixed Grain | 1,068 |
| Oats | 26,647 | Buckwheat | 29 |
| Barley | 27,994 | Speltz | 6 |
| Flax | 5,456 | Corn | 5 |
| Rye | 4,258 | Screenings | 89 |

The grades of wheat show as follows:—

| | |
|---|---|
| 63·15 per cent | One Hard, One, Two and Three Northern. |
| 4·15 per cent | Number Four, Five and Six. |
| 28·70 per cent | No Grade Tough or Damp. |
| 1·60 per cent | Other grades. |
| 2·00 per cent | Amber Durum Wheat. |
| 0·40 per cent | Kota Wheat. |

The grades of oats show as follows:—

| | |
|---|---|
| 22·50 per cent | Number One, Two and Three Canada Western. |
| 23·35 per cent | Number Ex One Feed, One Feed and Two Feed. |
| 52·15 per cent | No Grade Tough or Damp. |
| 2·0 | Other grades. |

The grades of barley show as follows:—

| | |
|---|---|
| 35·50 per cent | Number Three Extra, Number Three and Four Canada Western. |
| 21·0 per cent | Feed and Rejected. |
| 40·0 per cent | No Grade Tough or Damp. |
| 3·50 per cent | Other grades. |

The grades of flax seed show as follows:—

| | |
|---|---|
| 57·80 per cent | Number One Northwestern and Number Two Canada Western. |
| 0·90 per cent | Number Three Canada Western. |
| 40·80 per cent | No Grade Tough or Damp. |
| 0·50 per cent | Other grades. |

The grades of rye show as follows:—

| | |
|---|---|
| 55·30 per cent | One, Two and Three Canada Western. |
| 31·55 per cent | No Grade Tough or Damp. |
| 13·15 per cent | Other grades. |

The number of cars inspected at the various Inspection Points in the Division were as follows:—

| | | | |
|---|---|---|---|
| Winnipeg | 266,167 | Medicine Hat | 3,238 |
| Calgary | 24,836 | Superior | 2,031 |
| Edmonton | 21,885 | Vancouver | 1,013 |
| Moose Jaw | 5,446 | Prince Rupert | — |
| Saskatoon | 4,022 | | |

A reinspection was called on 36,663 cars, with results as follows:—

29,746 cars—left as graded originally.
5,488 cars—grades raised.
457 cars—grades lowered.
335 cars—dockage raised.
637 cars—dockage lowered.

An appeal was called at Winnipeg on 535 cars, with results as follows:—

454 cars—original grades confirmed.
65 cars—original grades raised.
13 cars—original grades lowered.
2 cars—dockage raised.
1 car—dockage lowered.

An appeal was called at Calgary on 1,662 cars, with results as follows:—

960 cars—original grades confirmed.
524 cars—original grades raised.
35 cars—original grades lowered.
24 cars—original dockage raised.
119 cars—original dockage lowered.

Shipments of grain from Fort William, Port Arthur and Vancouver, during the crop year ending July 31, 1926:—

| | Fort William and Port Arthur | Vancouver | Totals |
|---|---|---|---|
| | Bushels | Bushels | Bushels. |

## REPORT OF MR. W. T. TODD, DEPUTY REGISTRAR

WINNIPEG, MAN., December 3, 1926.

F. J. RATHBONE, Esq.,
Secretary, Board of Grain Commissioners,
Fort William, Ont.

DEAR SIR,—With reference to your letter file 1418 of November 29, I herewith submit a statement of the Registration Department for the crop year ended August 31, 1926.

TOTAL BUSHELS REGISTERED

| | |
|---|---|
| Wheat | 282,035,900–20 |
| Oats | 36,891,275–20 |
| Barley | 32,363,585–36 |
| Flax | 5,274,685–01 |
| Rye | 5,521,884–32 |
| Mixed grain | 3,822,450–08 |
| Corn | 42,093–02 |
| Timothy | 72–18 |
| Speltz | 846–24 |

TOTAL BUSHELS REGISTERED FOR CANCELLATION

| | |
|---|---|
| Wheat | 280,819,058–10 |
| Oats | 36,566,508–30 |
| Barley | 32,955,847–31 |
| Flax | 3,932,804–43 |
| Rye | 5,120,048–51 |
| Mixed grain | 2,383,653–12 |
| Buckwheat | 1,194–16 |
| Corn | 41,891–08 |
| Speltz | 1,299–18 |

Yours truly,

(Sgd.) W. T. TODD, *Deputy Registrar.*

# CHAPTER IV

## REPORT OF MR. J. G. WHITE, CHIEF WEIGHMASTER

The Secretary,
Board of Grain Commissioners,
Fort William, Ont.

DEAR SIR,—Herewith is my annual report for the crop year ending July 31, 1926.

### ELEVATORS

There have been thirty-three (33) elevators in constant operation at the head of the lakes during the last crop year, six (6) being operated as public terminal elevators and twenty-seven (27) operated as private and hospital elevators, which with additional storage constructed during the year gives a total storage capacity of sixty-two million, nine hundred and seventy-five thousand (62,975,000) bushels, not including Canadian Pacific elevators "A" and "C" which have been idle excepting that "A" with a capacity of about one million (1,000,000) bushels was in operation from the close of navigation 1925 up to June 1, 1926, thus furnishing work during the winter for some of the staff who would otherwise have been laid off.

In order to protect the integrity of Government weights, the handling and weighing equipment in the above elevators has been under constant observation and the upkeep has been satisfactory.

### SCALES

The elevators operating at the head of the lakes are equipped with one hundred and eighty-one (181) scales varying in capacity from six (6) to sixty (60) tons, over which has been weighed approximately six hundred and seventy-three million two hundred and twenty-six thousand six hundred and eighty (673,226,680) bushels during the last crop year, and notwithstanding this enormously heavy duty the scales, with the full time services of a scale mechanic, have been kept accurate and in good condition.

There are in the Government interior elevators at Moose Jaw, Saskatoon, Calgary, Edmonton, Prince Rupert and at Vancouver, sixty-seven (67) scales, or a total of two hundred and forty-eight (248) scales under my supervision, which have been inspected both annually and semi-annually during the last crop year. The semi-annual test is made on behalf of the board, for which there is no charge, and the regular annual inspection is carried out as provided for by the Weights and Measures Act under my authority as elevator scale inspector and for which certificates of verification were issued and fees collected and remitted to the following district inspectors of Weights and Measures:—

| | |
|---|---|
| Mr. J. B. Attridge, Winnipeg | $1,946 00 |
| Mr. E. B. Lorrimer, Regina | 79 60 |
| Mr. W. Wallace, Saskatoon | 77 60 |
| Mr. F. Cable, Calgary | 75 30 |
| Mr. J. McLeod, Edmonton | 60 00 |
| Mr. A. H. Dutton, Vancouver | 444 60 |
| | $2,683 10 |

(See detailed statement attached)

## Eastern Scale Inspection

Inspection of scales in the elevators at Goderich, Port McNicoll, Depot Harbour, Tiffin, Midland, Port Colborne, Peterborough, Montreal, Quebec, St. John and Halifax is under the jurisdiction of Mr. A. A. Bowen, Montreal, inspector for the Eastern Division, who has made the regular annual and semi-annual inspection of all scales at the above points.

## Weighing Staff

| | |
|---|---|
| Number of outside men, August 1, 1925 | 118 |
| Number of office staff, August 1, 1925 | 10 |

| | 6,711 | 3,750 | 10,461 |

| Summary— | |
|---|---|
| Via C.P.R. | 6,711 |
| Via C.N.R. | 3,750 |
| Total for both roads | 10,461 |

## Shortages—Cars

A terminal grain weighing department might be termed a "trouble department," as it comes in contact with most of the complaints regarding differences in weights or shortages on the outturn of cars loaded at country points and unloaded at terminal elevators.

Carloads shipped from country elevators are usually weighed by an employee of the company in from fifteen (15) to twenty (20) drafts with a possibility of mistake in the number of drafts, and as there are overages as well as shortages at the terminals—in the case of an overage the shipper is credited with the amount as shown by the terminal scales, where the car load is weighed in one, or at most, in two drafts either by the Government weighman or under his immediate supervision and he makes an official record of all carload weights for which Government certificates of weight are issued. The scales in the terminal elevators are inspected twice each season and are under the regular supervision of officials of the weighing staff and with constant services of a scale expert they are kept accurate. Even the hand weights are tested four times a year in order to eliminate errors in weight.

On the other hand scales in country elevators are inspected only once a year. They are of small capacity and are liable to get out of level and vary when the building settles under load and this, in my opinion, together with faulty records is the cause of many complaints that come to us.

Other causes of shortages may be accounted for by weighing over town scales that are not reliable; estimating the weight by wagon loads; or by the depth of grain in the car without knowing the weight per bushel; leaks repaired in transit; cars transferred on account of bad order and pilferage. These are some of the causes beyond the knowledge of the weighing department and in which it is practically impossible for this branch to fix responsibility, yet the terminal weighmaster is expected to substantiate not only the accuracy of his own records but also to locate errors that occur outside his jurisdiction.

That there are many shortages due to cars leaking on arrival at destination is evident from the fact that over twenty-five thousand (25,000) leak reports were sent to shippers and to the railways during the year ending July 31, 1926, and, no doubt, claims for shortage on these would be placed direct with the Railway Claims Department.

During the crop year under review, there was weighed a total of approximately three hundred and seventy-seven thousand three hundred (377,300) cars, and while every care was taken to get accurate weights, owing to the large number of cars handled at each elevator and the speed with which the work had to be carried on, including night work, it is only reasonable to expect that there would be some errors or mishaps occur without the knowledge of the weighmen or operatives. Two hundred and fifteen (215) complaints were received and from investigation it was evident that errors or mistakes in handling had occurred on forty-six (46) cars, for which adjustments amounting to three thousand eight hundred and sixty-six (3,866) bushels were secured or recommended and on the balance no grounds for a claim against the unloading elevators could be found.

## Shortages—Vessels

The reported shortages on the outturn of cargoes loaded at the head of the lakes and unloaded at Eastern Canadian ports during the crop year ending July 31, 1926, ran from eight (8) pounds over to fifty-eight (58) pounds short or an average shortage of 14.1 pounds per 1,000 bushels on wheat and on all other grains the average shortage was 41 pounds per 1,000 bushels; and on cargoes loaded at Fort William and Port Arthur and discharged at American ports, the average shortage was 24.3 pounds per 1,000 bushels on wheat and 46 pounds per 1,000 bushels on all other grains. It is to be noted that there has been a considerable improvement in the wheat outturns for the crop year of 1926 over the previous year, the shortage for Canadian ports being 14.1 pounds compared with 25.6 pounds per 1,000 bushels for the previous year; and for American ports 24.3 pounds as against 37.3 pounds per 1,000 bushels for the same period.

Some bay ports and eastern elevators continue from season to season to report outturns close to the loading weights, while others show little variation in shortages reported from one season to another but on the whole, outturns from Canadian ports are closer to the loading weights than outturns from American ports.

Serious shortages were reported on a number of cargoes in which on a recheck the loading weights were found to be correct and a thorough investigation failed to discover anything that would contribute to a shortage at any of the loading elevators.

## Annual Weigh-up

Owing to the increasing number of elevators operating as private at the head of the lakes, the number of public terminal elevators has been reduced to six (6) for the crop year, thus reducing the amount of stocks to audit. The annual audit or weigh-up of all grain in store in these elevators was carried out commencing on July 20 and finished on August 31, during which approximately thirteen million (13,000,000) bushels were weighed and transferred and itemized statements of the correct quantities of each grade in store was prepared and forwarded to the board.

The inspection of scales, and the annual weigh-up of all grain in store in the Government interior elevators at Moose Jaw, Saskatoon, Calgary, Edmonton and Harbour Commissioners elevators at Vancouver was made, commencing on July 29 and finished on August 16 and a report of the correct quantities of each grade in store was prepared and forwarded to the board.

## Organization

Under the immediate supervision of Mr. J. T. Hollinshead, Assistant Chief Weighmaster, who spends the greater part of his time at the elevators checking the work of the men and seeing that their duties are carefully performed, the organization of the weighing staff is kept up to a satisfactory state of efficiency. The men themselves are competent, loyal and attend strictly to their duties.

J. G. WHITE,
*Chief Weighmaster.*

# CHAPTER V

## (A)—REPORT OF LICENSING AND BONDING FOR THE SEASON OF 1925-26

During the license year of 1925-26, commencing September 1, 1925, and ending August 31, 1926, 257 firms and individuals applied for licenses as required by the provisions of the Canada Grain Act.

Four thousand six hundred and three applications were received, an increase of 192 over the previous season. Sixty of the applications were withdrawn for various reasons and 4,543 licenses were issued.

APPLICATIONS RECEIVED AND LICENSES ISSUED

| Kind of License | Applications | | Licenses issued |
|---|---|---|---|
| | Received | Withdrawn | |
| Track buyers | 101 | 6 | 95 |
| Commission merchants | 101 | 7 | 94 |
| Primary grain dealers | 3 | ..... | 3 |
| Public terminal elevators | 21 | ..... | 21 |
| Private elevators | 64 | ..... | 64 |
| Public elevators | 17 | ..... | 17 |
| Manufacturing elevators | 11 | 1 | 10 |
| Elevator space | 3 | ..... | 3 |
| Country elevators | 4,282 | 46 | 4,236 |
| | 4,603 | 60 | 4,543 |

At August 31, 1926, there were 4,405 elevators in the Western Inspection Division, with a total storage capacity of 239,218,560 bushels.

ELEVATOR STORAGE CAPACITY—WESTERN INSPECTION DIVISION, AS AT AUGUST 31, 1926

| Kind of Elevator | Number of Elevators | Capacity |
|---|---|---|
| | | Bushels |
| Country elevators | 4,310 | 141,897,560 |
| Public terminal elevators | 19 | 60,375,000 |
| Private elevators | 67 | 34,669,000 |
| Manufacturing elevators | 9 | 2,277,000 |
| | 4,405 | 239,218,560 |

The records of the board show that 95 of the 4,310 country elevators, with an approximate storage capacity of 2,850,000 bushels, were not in operation at any time during the season.

Of the 19 public terminal elevators, 11 are located at the head of the lakes, with total storage capacity of 41,525,000 bushels; 5 at interior points, capacity 13,000,000 bushels; and 3 at Vancouver, with storage capacity of 5,850,000 bushels.

PUBLIC TERMINAL AND PRIVATE ELEVATORS IN THE WESTERN INSPECTION DIVISION, AS AT AUGUST 31, 1926

| Location | Public Terminal Elevators | | Private Elevators | |
|---|---|---|---|---|
| | No. | Capacity | No. | Capacity |
| Fort William | 7 | 23,500,000 | 12 | 10,200,000 |
| Port Arthur | 4 | 18,025,000 | 11 | 12,975,000 |
| | 11 | 41,525,000 | 23 | 23,175,000 |
| Interior points | 5 | 13,000,000 | 34 | 9,107,000 |
| Vancouver | 3 | 5,850,000 | 9 | 1,137,000 |
| Prince Rupert | ..... | ..... | 1 | 1,250,000 |
| | 3 | 5,850,000 | 10 | 2,387,000 |
| Totals | 19 | 60,375,000 | 67 | 34,669,000 |

In the Eastern Inspection Division, the only elevators under the jurisdiction of the board are the public elevators, of which there are 25, with a total storage capacity of 41,310,000 bushels. Thirteen of these elevators are located in Ontario, 7 at Montreal and Quebec, and 5 at the Atlantic coast in the Maritime Provinces.

The appended statements show:—

"Licenses issued during the past fifteen years."

"Comparative summary of elevators, together with storage capacities, from 1911-12 to 1925-26."

"Summary of elevators in the Western and Eastern Inspection Divisions, as at August 31, 1926."

## (B)—LOADING PLATFORMS

During the season of 1925-26 the board dealt with a number of petitions for the erection and extension of grain loading platforms. Upon the recommendation of the board, a two-car platform was erected at Dulwich, Sask., on the Canadian National Railways, and extensions were made at the following points:—

Clandeboye, Man. (Canadian Pacific Railway)—extended to 5 cars.

Curtis, Man. (Canadian National Railways)—extended to 4 cars.

At March 1, 1926, there were 2,223 loading platforms in Western Canada, at which farmers could load grain, without putting such grain through country elevators, into 5,298 cars simultaneously.

SUMMARIZED STATEMENT OF GRAIN LOADING PLATFORMS IN WESTERN CANADA

| Province | Number of Platforms | Car Capacity |
|---|---|---|
| Manitoba | 638 | 1,596 |
| Saskatchewan | 992 | 2,493 |
| Alberta | 568 | 1,159 |
| British Columbia | 18 | 36 |
| Ontario | 7 | 14 |
| | 2,223 | 5,298 |

## (C)—CARS OUT OF TURN

By virtue of section 192 of the Canada Grain Act, the board is accorded certain discretionary powers in connection with the supplying of cars for the shipment of grain at country points. During the year 1925-26 the board ordered seventy-nine (79) cars to be supplied out of turn for the relief of elevators in danger of collapse, for the shipment of seed grain, for grain urgently required for feeding and milling purposes, and for grain out of condition or insufficiently housed.

## (D)—COMPLAINTS

During the year ending August 31, 1926, the board dealt with two hundred and fifty-two (252) complaints relating to inspection and weighing of grain, shipments ex country elevators, etc.

STATEMENT SHOWING THE NUMBER AND KIND OF LICENSES ISSUED DURING THE SEASONS 1911-12 TO 1925-26

| Kind | 1925-1926 | 1924-1925 | 1923-1924 | 1922-1923 | 1921-1922 | 1920-1921 | 1919-1920 | 1918-1919 | 1917-1918 | 1916-1917 | 1915-1916 | 1914-1915 | 1913-1914 | 1912-1913 | 1911-1912 |

# CHAPTER VI

## MAXIMUM TARIFF OF PUBLIC TERMINAL ELEVATOR CHARGES AT FORT WILLIAM AND PORT ARTHUR TERMINALS

For the Year ending August 31, 1927. Effective September 1, 1926

Subject to the capacity of the elevator and the nature of its equipment, shipments will be received upon the following terms and conditions, and under the provisions of the Canada Grain Act, 1925.

### Elevation Charges

On straight grade, tough, damp, or wet grain, receiving, elevating, shipping, storing and insurance against fire for the first fifteen days: Flax, 2 cents per bushel; rye, 1½ cents per bushel; wheat, oats and barley, 1¼ cents per bushel.

All tough, damp, wet, condemned, heating, heated or fireburnt grain may always be refused. If received and stored, it will be only at the owner's risk of deterioration. All damp grain and tough and damp flax will be dried without notice as soon after unloading as facilities will permit.

On mixed grains handled as mixtures, receiving, elevating, shipping, storing and insurance against fire for the first fifteen days, two cents (2c.) per hundred pounds.

On screenings, receiving, elevating, shipping, storing and insurance against fire for the first fifteen days, three cents (3c.) per hundred pounds.

### Storage Charges

On straight grade and tough grain, not otherwise specified, including insurance against fire for each succeeding day or part thereof after the first fifteen days, one-thirtieth of one cent (1/30c.) per bushel.

On mixed grain handled as mixtures, storage, including insurance against fire for each succeeding day or part thereof after the first fifteen days, two-thirtieths of one cent (2/30c.) per hundred pounds.

On screenings, storage, including insurance against fire for each succeeding day or part thereof after the first fifteen days, one-tenth of one cent (1/10c.) per hundred pounds.

### Screenings

On wheat carrying a dockage of three per cent (3%) or more, after deducting one-half of one per cent (½%) of the gross weight of the car for waste, a return will be made for the balance of the screenings.

On oats and barley carrying a dockage of five per cent (5%) or more, after deducting one-half of one per cent (½%) of the gross weight of the car for waste, a return will be made for the balance of the screenings.

On rye and flax carrying a dockage of five per cent (5%) or more, after deducting one per cent (1%) of the gross weight of the car to cover outward dockage and waste in cleaning, a return will be made for the balance of the screenings.

If disposition of screenings covered by outstanding returns is not received within thirty (30) days from the date of unloading, they may be disposed of for account of whom it may concern.

The holder of warehouse receipts or shut-outs covering dockage shall be entitled to receive such average quality of screenings as shall be determined by the Inspection Department in accordance with sample tests which shall be made in such manner and when deemed necessary by said department.

### Cleaning Charges

On wheat, for removal of dockage, other than commercial grain, there will be cleaning charges as follows:—

Dockage under 3 per cent, no charge.
Dockage 3 per cent to 5 per cent inclusive, one-half cent (½c.) per bushel.
Dockage, 5½ per cent to 10 per cent inclusive, one cent (1c.) per bushel.
Dockage, over 10 per cent, one and one-half cents (1½c.) per bushel.

On wheat carrying a return of other grain of commercial value, except flax, computed on gross weight of car, an additional separating charge of one cent (1c.) per bushel.

On wheat carrying a return of flax, an additional separating charge computed on gross weight of car, two cents (2c.) per bushel.

On oats, barley and rye, for removal of dockage, other than commercial grain, there will be cleaning charges as follows:—

On all cars carrying a dockage of:

Less than 5 per cent, no charge.
5 per cent to 10 per cent inclusive, one cent (1c.) per bushel.
Over 10 per cent, one and one-half cents (1½c.) per bushel.

On oats, barley and rye carrying a return of flax computed on gross weight of car, an additional separating charge of two cents (2c.) per bushel.

Flax cleaned from any other grain containing broken particles that cannot be separated, shall be classified as "Flax and Broken Wheat."

On flax, for removal of dockage, other than commercial grain, there will be cleaning charges as follows:—

On flax carrying a dockage of:

Less than 5 per cent, no charge.
5 per cent to 10 per cent inclusive, one and one-half cents (1½c.) per bushel.
Over 10 per cent, two cents (2c.) per bushel.

On flax carrying a return of other grain of commercial value, computed on gross weight of car, an additional separating charge of one cent (1c.) per bushel.

### Drying Charges

On tough grain, three cents (3c.) per bushel.
On damp or wet grain, five cents (5c.) per bushel.

### Allowance for Invisible Loss and Shrinkage on all Cars

| | |
|---|---|
| Wheat | 30 pounds per car |
| Oats | 50 " " |
| Barley | 50 " " |
| Mixed grain | 50 " " |
| Rye | 56 " " |
| Flax | 56 " " |

### All Charges

All charges for cleaning, drying or other treatment will be computed on gross weight of car, for elevation and storage on net weights. All charges accruing after issue of initial completed outturn and expense bill will follow the grain. All charges whatsoever must be paid before shipment.

### Bulkheads

On bulkheads for their removal and other additional expense in handling and unloading car, five dollars ($5) per bulkhead.

### Unloading Sacked Grain

A charge of five cents (5c.) per sack will be made for unloading all sacked grain.

### Preparing Cars for Loading

When paper is used in preparing cars there will be a charge of four dollars ($4) for each car.

### Unspecified Grain

Unspecified grain will only be received, stored and treated subject to special charges to be agreed upon at the time, subject to the approval of the Board of Grain Commissioners

Upon the application to the board of any public terminal elevator, the above tariff may be reduced in so far as that elevator is concerned, but such reduced charges must apply to all grain received at such elevator during the crop year 1926-27

Authorized by Order in Council P.C. 1385.

Dated at Ottawa, September 8, 1926.

Approved by the Board of Grain Commissioners for Canada.

F. J. RATHBONE,
*Secretary.*

## MAXIMUM TARIFF CHARGES—GOVERNMENT INTERIOR TERMINAL ELEVATORS AT SASKATOON, MOOSE JAW, CALGARY AND EDMONTON

For the Year ending August 31, 1927. Effective September 1, 1926.

Subject to the capacity of the elevator and the nature of its equipment, shipments will be received upon the following terms and conditions, and under the provisions of the Canada Grain Act, 1925, and amendments thereto.

### Elevation Charges

On straight grade, tough, damp or wet grain, not otherwise specified, receiving, elevating, shipping, storing and insurace against fire for the first fifteen days, one cent (1 cent) per bushel.

All tough, damp, wet, condemned, heating, heated or fireburnt grain may always be refused. If received and stored, it will be only at the owner's risk of deterioration and under special contract. Except that from November first to April first tough grain will be received and stored under the terms and conditions applying to straight grade grain as provided in sections 130 to 139 Canada Grain Act.

On mixed grains handled as mixtures, receiving, elevating, shipping, storing and insurance against fire for the first fifteen days, one and one-half cents (1½ cents) per hundred pounds.

On screenings, receiving, elevating, shipping, storing and insurance against fire for the first fifteen days, three cents (3 cents) per hundred pounds.

On grain unloaded from waggons, or teams, receiving, elevating, cleaning, shipping, insurance against fire, storage for the first fifteen days, one and one-half cents (1½ cents) per bushel.

### Storage Charges

On straight grade and tough grain, not otherwise specified, including insurance against fire for each succeeding day or part thereof, after the first fifteen days, one-sixtieth of one cent (1/60 cent) per bushel.

On mixed grain handled as mixtures, storage, including insurance against fire for each succeeding day or part thereof, after the first fifteen days, one-thirtieth of one cent (1/30 cent) per hundred pounds.

On screenings, storage, including insurance against fire for each succeeding day or part thereof, after the first fifteen days, one-tenth of one cent (1/10 cent) per hundred pounds.

### Screenings

On wheat carrying a dockage of three per cent (3%) or more, after deducting one-half of one per cent (½%) of the gross weight of the car for waste, a return will be made for the balance of the screenings.

On oats and barley carrying a dockage of five per cent (5%) or more, after deducting one-half of one per cent (½%) of the gross weight of the car for waste, a return will be made for the balance of the screenings.

On rye and flax carrying a dockage of five per cent (5%) or more, after deducting one per cent (1%) of the gross weight of the car to cover outward dockage and waste in cleaning, a return will be made for the balance of the screenings.

If disposition of screenings covered by outstanding returns is not received within thirty (30) days from the date of unloading, they may be disposed of for account of whom it may concern.

The holder of warehouse receipts or shut-outs covering dockage shall be entitled to receive such average quality of screenings as shall be determined by the Inspection Department in accordance with sample tests which shall be made in such manner and when deemed necessary by said department.

### Cleaning Charges

On wheat, when the dockage contains no other grain of commercial value, there will be cleaning charges as follows:—

Dockage under 3 per cent, no charge.
Dockage 3 per cent to 5 per cent inclusive, ½ cent per bushel.
Dockage over 10 per cent, 1½ cents per bushel.
Dockage 5½ per cent to 10 per cent inclusive, 1 cent per bushel.

On wheat carrying a return of other grain of commercial value, except flax, computed on gross weight of car, an additional separating charge of one cent (1 cent) per bushel.

On wheat carrying a return of flax, an additional separation charge computed on gross weight of car, two cents (2 cents) per bushel.

On oats, barley and rye, when the dockage contains no other grain of commercial value, there will be cleaning charges as follows:—

On all cars carrying a dockage of—
Less than 5 per cent, no charge.
Five per cent to 10 per cent inclusive, 1 cent per bushel.
Over 10 per cent, 1½ cents per bushel.

On oats, barley and rye carrying a return of flax, computed on gross weight of car, an additional separating charge of two cents (2 cents) per bushel.

Flax cleaned from any other grain containing broken particles that cannot be separated shall be classified as flax and broken wheat.

On flax, when the dockage contains no other grain of commercial value, there will be the following cleaning charges:—

On flax carrying a dockage of—

Less than 5 per cent, no charge.
From 5 per cent to 10 per cent inclusive, 1½ cents per bushel.
Over 10 per cent, 2 cents per bushel.

On flax carrying a return of other grain of commercial value, computed on gross weight of car, an additional separating charge of one cent (1c.) per bushel.

### Drying Charges

On tough grain, three cents (3c.) per bushel.
On damp or wet grain, five cents (5c.) per bushel.

### Allowance for Invisible Loss and Shrinkage

On all grain received, deductions from the gross weight of each car to cover invisible loss and shrinkage in handling will be made as follows:—

| | |
|---|---|
| Wheat | 30 pounds |
| Oats | 50 " |
| Barley | 50 " |
| Flax | 56 " |
| Rye | 56 " |
| Mixed grain | 50 " |

### All Charges

All charges for cleaning, drying or other treatment will be computed on gross weight, for elevation and storage on net weights, all charges accruing after issue of initial completed outturn and expense bill will follow the grain. All charges whatsoever must be paid before shipment.

### Bulkheads

On bulkheads for their removal and other additional expenses in handling and unloading car, five dollars ($5) for each bulkhead.

### Unloading Sacked Grain

A charge of five cents (5c.) per sack will be made for unloading all sacked grain.

### Sacking Grain

Sacking grain and loading to cars or other vehicles will be subject to rate agreed upon.

### Preparing Cars for Loading

When paper is used in preparing cars there will be a charge of four dollars ($4) for each car.

### Unspecified Grain

Unspecified grain will only be received, stored and treated subject to special charges to be agreed upon at the time subject to the approval of the Board of Grain Commissioners.

Approved by Board of Grain Commissioners for Canada.

(Sgd.) F. J. RATHBONE,
*Secretary.*

Authorized by Order in Council P.C. 1729.
Dated at Ottawa, November 5, 1926.

## COUNTRY ELEVATORS

### Maximum Tariff of Charges for Licensed Country Elevators for the Period ending August 31, 1927. Effective September 1, 1926

Subject to the capacity of the elevator and the nature of the construction, all grain tendered must be taken into store upon following terms and conditions, and under the provisions of the Canada Grain Act, 1925, and amendments thereto.

*Maximum Rates—Special Bin Grain.*—Receiving, elevating, spouting, insurance against fire, storing for the first fifteen (15) days and putting into cars on track; no elevator shall charge more than three cents (3c.) per bushel for flax, two and one half cents (2½c.) per bushel for wheat, barley and rye, and one and three-quarter cents (1¾c.) per bushel for oats.

*Graded Storage and Subject to Grade and Dockage Grain.*—Receiving, elevating, spouting, insurance against fire, storing for the first fifteen days and putting into cars on track; no elevator shall charge more than three cents (3c.) per bushel for flax, two cents (2c.) per bushel for wheat, barley and rye and one and three-quarter cents (1¾c.) per bushel for oats.

Storage not otherwise provided, including insurance against fire, for each succeeding day after the first fifteen (15) days shall not exceed one-thirtieth of one cent (1/30c.) per bushel.

*Cleaning.*—The rate for cleaning grain shall be mutually agreed upon by the elevator operator and the owner of the grain according to the nature of its dockage, but in no case shall the rate exceed a maximum of two cents (2c.) per bushel.

*Shrinkage.*—No elevator shall take more than the allowance for shrinkage, waste in handling, storing and transmitting the grain to a terminal than the weight in pounds set forth in the shrinkage table as authorized by the Governor in Council and declared to form part of the tariff and Rules and Regulations for Country Elevators.

All shrinkage on tough and damp grain shall not be more than double the allowance as set forth in the aforesaid schedule.

Such shrinkage table shall be placed conspicuously in all licensed country elevators for free inspection of the public.

*Dockage on Cash or Stored Grain.*—No elevator shall take a greater dockage than that shown by a proper test over a number ten sieve, except where the grains contain foreign grain or seeds which cannot be taken out by a number ten sieve.

Every elevator must be equipped with the necessary sieves and scales for making proper tests, and the elevator operator must make the test in the presence of the owner of the grain when requested.

*General.*—When tough, damp or wet grain is taken into store it shall be at the owner's risk, and the elevator operator shall have the right to ship it immediately to a terminal elevator for treatment.

All tough, damp or wet grain, containing an excessive amount of snow and ice, may be handled subject to agreement between the owner of the grain and the operator.

## Rules and Regulations for Country Elevators

1. The owner or operator of a country elevator shall post in the elevator in a conspicuous place, a diagram, to a scale of not less than one-half inch to one foot showing the location and numbers of the several bins in such elevator.

2. In shipping or delivering any grain stored in a country elevator, the net weight on the ticket or tickets shall be final, unless an investigation by the Board of Grain Commissioners shows reason for the contrary. The shipper to be paid in case of short shipment up to the amount of his or her ticket or tickets for the full billing capacity of the car, at the same price as the car was disposed of.

3. All shipping bills for grain shipped through an elevator shall be made out by the elevator agent, and he shall advise such parties as the owner may instruct.

4. Where delivery is made into cars on track at the country elevator the bill of lading (if issued) and an affidavit of weight shall upon request be delivered by the country elevator to the owner and thereupon the country elevator shall be relieved from further liability for grades and weights, except in so far as the subject to grade and dockage ticket otherwise provides.

5. Upon receipt of storage tickets and lawful charges the elevator owner shall deliver, whichever may be requested, by the party surrendering the tickets, either the shipping bill in conformity with rule No. 4 of these Regulations, or a terminal warehouse receipt for the full amount of the grain called for by the tickets in carload lots as soon as possible after the transportation company has delivered the grain at a terminal elevator and certificates of grade and weight therefor have been issued.

6. The owner of grain in an elevator wishing such grain shipped to any point other than a terminal point, or where Government weights cannot be obtained, the owner of the grain must then accept the elevator weights at the shipping point as final unless it is proved that the shipping weights are not correct. Provided, moreover, the owner of the grain can always demand an affidavit as to the actual grain shipped and delivered from the elevator operator and receiver of said grain respectively.

7. No owner or operator of a country elevator or warehouse shall sell, assign, mortgage, pledge, or hypothecate any grain stored in such elevator or warehouse, for which storage tickets have been issued, and the owner or operator may be required by the board to produce at any time proper registered warehouse receipts or bills of lading for such grain as has been shipped from the country elevator or warehouse, and for which there is still outstanding storage tickets.

8. No license will be granted for the operation of any country elevator the agent or buyer of which is subject to a shortage bond, and in the event of a shortage bond being entered into after license has been granted, such license will be subject to immediate cancellation.

## Rules and Regulations for Handling Grain for which Special Bin or Subject to Grade and Dockage Tickets have been Issued, or where there is Disagreement as to Grade and Dockage

1. The ticket or tickets issued where there is a disagreement as to grade and dockage or where grain has been received subject to inspector's grade and dockage must have incorporated thereon at the time of issue the grade offered by the elevator owner or operator to the owner of the grain and the following words: "Subject to Inspector's Grade and Dockage."

2. The owner of the grain can only demand the quantity that the storage ticket or tickets call for.

3. In case there is a dispute as to the weighing accuracy of the receiving scales, it shall be incumbent upon the owner of the elevator to prove that the scales are weighing accurately.

4. In the case of special bin or subject to grade and dockage grain a proper sample must be drawn from each load by the elevator operator at the time of delivery, in the presence of the party delivering same, and such sample must be drawn satisfactorily to both the deliverer and the operator, and all such samples must be placed in a suitable receptacle satisfactory to the Board of Grain Commissioners, and must be properly mixed in such receptacle. The receptacle shall be provided by the warehouseman and the sample shall be placed therein in the presence of the owner. The receptacle shall be secured by padlock which the owner of the grain shall provide, and the key of which he shall retain.

The warehouseman shall be the custodian of the receptacle and of the sample.

5. In the case of subject to grade and dockage grain, a fair and proper sample of at least two quarts shall then be drawn in the presence of the owner of the grain from such receptacle, and forwarded in a suitable receptacle properly tied and sealed, and marked "subject to inspector's grade and dockage" to the Chief Inspector of Grain, and shall be accompanied by a request in writing of either or both parties aforesaid that the Chief Inspector will examine the sample and report on the grade and dockage the grain is in his opinion entitled to, and would receive if shipped to a terminal point and subjected to an official inspection.

6. After receiving the inspector's judgment, showing the grade and dockage the elevator operator shall in the case of cash tickets make settlement on the basis of the grade and dockage given by the Chief Inspector, and shall, in the case of subject to grade and dockage tickets, issue graded storage tickets showing the grade and dockage as given by the Chief Inspector for the full amount of grain so taken into store, such graded storage tickets to bear the same date as the original subject to grade and dockage tickets, after which the grain shall be subject to the rules and regulations covering graded stored grain.

7. Notwithstanding any regulation provided in paragraphs five and six of these regulations, if the identity of the grain has been preserved even though Subject to Grade and Dockage tickets may have been issued therefor, if agreeable to the owner, the grain then may be handled in accordance with the provisions of the Canada Grain Act, and Rules and Regulations relating to the special binning of grain in country elevators.

8. At the time of delivery of any grain where a ticket of this kind is being used, and it is agreed upon by the owner of the grain and the elevator operator that the grain is tough, damp or wet, and the elevator operator marks such ticket or tickets: "Out of condition, tough, damp or wet," then whatever grade such sample may receive from the Chief Inspector, it will still grade "tough, damp or wet."

9. If the elevator operator fails at any time to draw and preserve such sample in the manner stated herein, the owner or operator must account to the owner of the grain for the grade designated by the said owner.

10. When submitting samples of grain to the Chief Inspector, elevator operators must have such samples properly marked either "Special Bin" or "Subject to Inspector's Grade and Dockage" as the case may be.

Authorized by Order in Council P.C. 1383.

Dated at Ottawa, September 8, 1926.

Approved by Board of Grain Commissioners for Canada.

F. J. RATHBONE,
*Secretary.*

# MAXIMUM TARIFF OF PUBLIC TERMINAL ELEVATOR CHARGES AT VANCOUVER, BRITISH COLUMBIA

## For the Year ending August 31, 1927

Subject to the capacity of the elevator and the nature of its equipment, shipments will be received upon the following terms and conditions and under the provisions of the Canada Grain Act, 1925, and amendments thereto.

### Maximum Elevation Charges

On straight grade, tough, damp or wet grain, not otherwise specified, receiving, elevating, shipping, storing and insurance against fire, for the first fifteen days, one and one-quarter cents (1¼c.) per bushel.

All tough, damp, wet, condemned, heating, heated or fireburnt grain may always be refused, if received and stored it will be only at the owner's risk of deterioration and under special contract, except that tough grain will be received and stored under the terms and conditions applied to straight grade grain as provided in the Canada Grain Act and provisions included in the special provisions made for the Port of Vancouver. (See Canada Grain Act, 1925, and amendments thereto.)

On mixed grains handled as mixtures, receiving, elevating, shipping, storing and insurance against fire for the first fifteen days, two cents (2c.) per hundred pounds.

On screenings, receiving, elevating, shipping, storing and insurance against fire for the first fifteen days, three cents (3c.) per hundred pounds.

### Storage Charges

On straight grade and tough grain, not otherwise specified, including insurance against fire, for each succeeding day or part thereof, after the first fifteen days, one-thirtieth of one cent (1/30c.) per bushel.

On mixed grain handled as mixtures, storage, including insurance against fire, for each succeeding day or part thereof, after the first fifteen days, two-thirtieths of one cent (2/30c.) per hundred pounds.

On screenings, storage, including insurance against fire, for each succeeding day or part thereof, after the first fifteen days, one-tenth of one cent (1/10c.) per hundred pounds.

### Screenings

On wheat carrying a dockage of three per cent (3%) or more, after deducting one-half of one per cent (½%) of the gross weight of the car for waste, a return will be made for the balance of the screenings.

On oats and barley carrying a dockage of five per cent (5%) or more, after deducting one-half of one per cent (½%) of the gross weight of the car for waste, a return will be made for the balance of the screenings.

On rye and flax carrying a dockage of five per cent (5%) or more, after deducting one per cent (1%) of the gross weight of the car to cover outward dockage and waste in cleaning, a return will be made for the balance of the screenings.

If disposition of screenings covered by outstanding returns is not received within thirty (30) days from the date of unloading, they may be disposed of for account of whom it may concern.

The holder of warehouse receipts or shut-outs covering dockage shall be entitled to receive such average quality of screenings as shall be determined by the Inspection Department in accordance with sample tests which shall be made in such manner and when deemed necessary by said department.

### Cleaning Charges

On wheat, when the dockage contains no other grains of commercial value, there will be cleaning charges as follows:—

Dockage under 3 per cent, no charge.
Dockage 3 per cent to 5 per cent inclusive, one-half cent (½c.) per bushel.
Dockage 5½ per cent to 10 per cent, one cent (1c.) per bushel.
Dockage above 10 per cent, one and one-half cents (1½c.) per bushel.

On wheat carrying a return of other grain of commercial value, except flax, computed on gross weight of car, an additional separating charge of one cent (1c.) per bushel.

On wheat carrying a return of flax, an additional separating charge computed on gross weight of car, two cents (2c.) per bushel.

On oats, barley and rye, when the dockage contains no other grain of commercial value, there will be cleaning charges as follows:—

On all cars carrying a dockage of—

Less than 5 per cent, no charge.
Five per cent to 10 per cent inclusive, one cent (1c.) per bushel.
Over 10 per cent, one and one-half cents (1½c.) per bushel.

On oats, barley and rye carrying a return of flax, computed on gross weight of car, an additional separating charge of two cents (2c.) per bushel.

Flax cleaned from any other grain containing broken particles that cannot be separated, shall be classified as "Flax and Broken Wheat."

On flax when the dockage contains no other grain of commercial value, there will be the following cleaning charges:—

On flax carrying a dockage of—

Less than 5 per cent, no charge.
From 5 per cent to 10 per cent inclusive, one and one-half cents (1½c.) per bushel.
Over 10 per cent, two cents (2c.) per bushel.

On flax carrying a return of other grain of commercial value, computed on gross weight of car, an additional separating charge of one cent (1c.) per bushel.

### Drying Charges

On tough grain, three cents (3c.) per bushel.
On damp or wet grain, five cents (5c.) per bushel.

### Allowance for Invisible Loss and Shrinkage on all Cars

As follows:—

| | | |
|---|---|---|
| Wheat | 30 | pounds per car. |
| Oats | 50 | " |
| Barley | 50 | " |
| Mixed grain | 50 | " |
| Rye | ½ | per cent computed on gross weight of car. |
| Flax | ½ | per cent computed on gross weight of car. |

### All Charges

All charges for cleaning, drying or other treatment will be computed on gross weight of car; for elevating and storage, on net weights. All charges accruing after issue of initial completed outturn and expense bill will follow the grain. All charges, whatsoever, must be paid before shipment.

### Bulkheads

On Bulkheads for their removal or installation and other additional expense in handling and unloading cars, $5 for each bulkhead.

### Unloading Sacked Grain

A charge of five cents (5c.) per sack will be made for unloading all sacked grain.

### Sacking Grain

For sacking grain the following charges will be made:—

1½c. per bushel on sacks not exceeding 125 pounds
2c. per bushel on sacks not exceeding 160 pounds
2½c. per bushel on sacks not exceeding 220 pounds

For double sacking, one cent (1c.) per sack in addition to above.

For sacking screenings a charge of ten cents (10c.) a sack for sacking will be made.

Sacking of screenings will be done only when conditions warrant it, and the superintendents of such terminal elevators will be sole judge as to this.

Sacks and twine to be furnished by shipper or supplied at his expense. In case of machine sewing, one-half cent (½c.) per sack will be charged for twine.

### Stencilling

A charge of one-half cent (½c.) per sack will be made for stencilling.

### Preparing cars for loading

When paper is used in preparing cars, there will be a charge of four dollars ($4) for each car.

### Unspecified Grain

Unspecified grain will only be received, stored and treated subject to special charges to be agreed upon at the time, subject to the approval of the Board of Grain Commissioners.

This Tariff of Rates is published by the Board of Grain Commissioners for Canada in accordance with Section 127 of the Canada Grain Act and shall become effective as from January 17, 1927.

BOARD OF GRAIN COMMISSIONERS FOR CANADA.

F. J. Rathbone,
*Secretary,*

Fort William, Ontario, January 12, 1927.

## MAXIMUM TARIFF OF CHARGES GOVERNING THE OPERATION OF THE CANADIAN GOVERNMENT ELEVATOR AT HALIFAX, N.S. CAPACITY 1,000,000 BUSHELS.

### For the Crop Year ending August 31, 1927

Subject to the capacity of the elevator and the nature of its equipment, shipments will be received upon the following terms and conditions and under the provisions of the Canada Grain Act, 1925, and amendments thereto:—

### Export Grain

Applicable only on traffic consigned through to British and foreign countries, except the United States, Newfoundland and Island of St. Pierre and Miquelon.

### Elevation Charges

Including storage, fire and dust explosion insurance for ten days (10) nineteen-twentieths (19/20) of one cent per bushel.

### Storage

After the expiration of ten days (10) an additional charge to cover storage, fire and dust explosion insurance one twenty-fifth (1/25) of one cent per bushel per day.

### Extra Charges

Turning, ⅛c. per bushel. Cleaning, ½c. per bushel.
Mixing, ¼c. per bushel. Bagging, 2c. per bushel.
The shipper to supply bags and twine.

After May 1 when charges at the regular rate for storage amount to one and one-half cents (1½c.) per bushel, no further charge will be made until the 1st of December.

The above mentioned rate of 1½c. per bushel will cover insurance only up to June 6, after which date, owners of grain will be required to place their own insurance.

### Domestic Grain

Elevation, including storage, fire and dust explosion for ten days (10) one-half cent (½c.) per bushel.

Storage, including fire and dust explosion for each succeeding ten days (10) or part thereof, one quarter cent (¼c.) per bushel.

When at the request of the owner of the grain or the steamship company grain is handled from the elevator to steamship between the hours of 6 p.m. and 7 a.m., also on Sundays and legal holidays, the additional charge for such service will be subject to special arrangement.

### General Conditions

If for any reason it is necessary that grain should be inspected by an official Grain Inspector, his fees will be in addition to the elevating, storage and extra charges as provided herein.

The elevator does not undertake to keep grain separate from other grain of similar kind and grade.

The elevator does not assume any responsibility for loss or damage caused by heating, the acts of Providence, or by any cause whatsoever.

All grain received solely at the risk of the owner, excepting as to loss by fire or dust explosion.

The elevator does not undertake to deliver less than 8,000 bushels at one time.

Orders for shipment must be given in writing accompanied by original bill of lading covering quantity of grain so ordered out.

All storage and other charges must be paid before delivery of shipment.

Consignees and owners must watch the condition of their grain and the probability of same heating, and should they not order it to be turned, the elevator may, in the interests of the consignees and owners, and with or without an order from an official grain inspector, turn the grain to prevent deterioration, in which case, the elevator will make an additional charge, as shown above, to the consignees or owners for this service. The elevator will endeavour to advise consignees or owners when there seems a possibility of their grain heating, but does not undertake any responsibility in connection therewith.

When grain is cleaned, re-elevated or turned, the net quantity only, remaining after this operation, will be delivered.

The elevator reserves the right to refuse to receive into the elevator all tough, damp, wet, condemned, heating, heated or fireburnt grain, or grain which is not accompanied by Government Inspection Certificate, and such grain, if received, will be entirely at owner's risk.

# CHAPTFR VII

## Summary of Annual Weigh-up of Grain in Public Terminal Elevators, 1926

| Elevator Company | Wheat | | Oats | | Barley | | Flaxseed | | Rye | | Mixed Grain | |
|---|---|---|---|---|---|---|---|---|---|---|---|---|
| | Surplus | Deficit | Surplus | Deficit | Surplus | Deficit | Surplus | Deficit | Surplus | Deficit | Surplus | Deficit |

## Sessions Held by the Board During Crop Year 1925-26

| Date | Place | Subject Matter |
|---|---|---|
| 1925 | | |
| Sept. 2 | Winnipeg, Man. | Investigation of complaints and routine matters. |
| " 5 | Montreal, Que. | Investigation regarding handling of grain through Montreal. |
| " 8 | New York, N.Y. | Investigation regarding handling of grain through Montreal. |
| " 18 | Montreal, Que. | Investigation regarding handling of grain through Montreal. |
| " 23 | Winnipeg, Man. | Investigation of claims filed against the McMillan Grain Co., Ltd., of Winnipeg, Man. |
| " 28 | Winnipeg, Man. | Investigation of complaints and routine matters. |
| " 30 | Moose Jaw, Sask., Saskatoon, Sask., Calgary, Alta., Edmonton, Alta. Prince Rupert, B.C., Vancouver, B.C. | General inspection by the Board (accompanied by F. C. T. O'Hara, Esq., Deputy Minister , Department of Trade and Commerce) of the Canadian Government Elevators at Moose Jaw, Saskatoon, Calgary, Edmonton and Prince Rupert, and also elevators situated at the port of Vancouver, B.C. |
| Oct. 20 | Winnipeg, Man. | Investigation of complaints and routine matters. |
| Nov. 4 | Winnipeg, Man. | Rules and Regulations governing the operation of Private Elevators. |
| " 5 | Winnipeg, Man. | Rules and Regulations governing the operation of Private Elevators. |
| " 30 | Winnipeg, Man. | Investigation of complaints and routine matters. |
| Dec. 16-17 | Winnipeg, Man. | Handling of tough and damp grain at Calgary, Edmonton and Vancouver, B.C. |
| 1926 | | |
| Jan. 8 | Pipestone, Sask. | Complaint of Jos. Deremiens of Belleview, Man., vs. Western Canada Flour Mills Co., Ltd. |
| " 14 | Winnipeg, Man. | Investigation of complaints and routine matters. |
| " 15 | Winnipeg, Man. | Investigation of complaints and routine matters. |
| Feb. 1 | Winnipeg, Man. | Investigation of complaints and routine matters. |
| " 5, 11, 12, 16 | Winnipeg, Man. | Handling of tough and damp grain at Fort William and Port Arthur. |
| " 17 | Winnipeg, Man. | Session with Committee appointed by the Northwest Grain Dealers Association in connection with the recording of all seals and leaks on cars arriving at Winnipeg. |
| " 22 | Fort William, Ont. | Handling of tough and damp grain in railway yards at Fort William and Port Arthur. |
| Mar. 3 | Fort William, Ont. | Conference in connection with drying of tough and damp grain at Fort William and Port Arthur. |
| " 31-Ap. 1 | Montreal, Que. | Inspection and grading of United States grain passing through Canadian Ports. |
| May 6-7 | Ottawa, Ont. | Meeting with a Special Committee in connection with suggested amendments to the Canada Grain Act. |
| " 10 | Montreal, Que. | Discussion with representatives of the Board of Trade of Montreal, with reference to the handling of Canadian and United States grain passing through that port. |
| " 14 | New York, N.Y. | Conference with United States Inspecting Officers regarding grading and handling of Canadian grain through American ports. |
| " 25 | Winnipeg, Man. | Investigation of complaints and routine matters. |
| June 1 | Ottawa, Ont. | Amendments to Canada Grain Act. |
| " 17-18 | Winnipeg, Man. | Investigation of complaints and routine matters. |
| July 26 | Winnipeg, Man. | Investigation of claims filed against the McMillan Grain Co., Ltd., of Winnipeg; also complaints and routine matters. |
| Aug. 14 | Edmonton, Alta. | Meeting with Board of Trade of Edmonton, Alberta, and grain trade, for the purpose of appointing a Board of Grain Appeal for the City of Edmonton. |
| " 19 | Vancouver, B.C. | Tariff charges covering the operation of Public Terminal Elevators at Vancouver, B.C., for the crop year 1926-27. |
| " 24 | Winnipeg, Man. | Investigation of complaints and routine matters. |
| " 25 | Winnipeg, Man. | Tariff charges, Public Terminal Elevators and Country Elevators; also Rules and Regulations governing Country Elevators for the crop year 1926-27. |
| " 31 | Goderich, Ont. | Complaint by Parrish & Heimbecker in connection with a cargo of wheat, shipped from Fort William, Ont. per steamer *Maplecourt;* also complaint by James Richardson & Sons, Limited, in connection with cargo of wheat shipped from Fort William, Ont., per steamer *Rahane.* |

# REPORT

## OF THE

# DEPARTMENT OF THE INTERIOR

## 1925 - 26

Hon. CHARLES STEWART,
Minister of the Interior,
Ottawa.

SIR,—I have the honour to submit the fifty-third Annual Report of the Department of the Interior for the fiscal year ended March 31, 1926.

The administrative record of the past year is one of exceptional interest. The pronounced development which has taken place has been largely the result of the broad policy followed for many years by the department in regard to the administration of the resources of the federal domain. A marked advance is noticeable in practically every line of activity carried on by the department: this is in harmony with the improvement in economic conditions throughout the Dominion, and follows closely along the trend indicated in the report of the department for the fiscal year 1924-25. It may fairly be taken as showing that a period of activity in all lines of endeavour lies immediately ahead.

A tangible evidence of this upward swing of conditions within the department is afforded by a comparison of the revenues of the different branches for the present as compared with the past fiscal year. It is to be observed, however, that this is no measure of the actual extent of the progress made, since much of the work done by the department is not reflected in fiscal returns.

The revenue of the department, taken as a whole, was $5,271,132.53 and has increased by over 22 per cent compared with the figures for last year. The increases shown by the statements of the individual branches are as follows: Land Patents Branch, over 13 per cent; School Lands Branch, over 40 per cent; Mining Lands Branch, nearly 24 per cent; Timber and Grazing Lands Branch, over 15 per cent; Forestry Service, over 6·5 per cent, despite the fact that last year's figure showed a 33 per cent increase over the previous year and constituted a record up to that time; Parks Branch, 1·7 per cent (last year's figure was 55 per cent over that of the previous year); and the revenue of the North West Territories and Yukon Branch, collected under the administration of the Northwest Game Act, increased by over 59 per cent.

The department has placed its work respecting tourist business on a much more adequate basis. During the year a broader and stronger program was laid down for building up the volume of this traffic. The registrations of motor cars at Canadian ports of entry showed a substantial increase and Canadian recreational resources now occupy an important position among the revenue-producing activities of the country. The lead given by the department in regard to tourist business has received wide support in the press as well as from provincial, local, and business interests throughout the Dominion.

In regard to forestry work, the increased receipts reported each succeeding year from timber sales and timber permits indicate the important place which the forest reserves occupy in the economic life of Western Canada and point to the wisdom of the policy of setting aside for permanent timber production forest areas contiguous to populated sections of the prairies. The value of the forest reserves as recreational areas is being more widely recognized by tourists and

by the public generally. Another phase of the work is that of encouraging the planting of shelter-belts on prairie farms. The number of broad-leaved trees distributed yearly for this purpose approximates five million, and last year there were also sent out about ninety thousand coniferous transplants. No less than seventy-three per cent of the existing plantations are reported to be quite successful, and only six per cent are failures. It has been found to be quite practicable to grow good fuel wood under prairie conditions in a very reasonable time, although in these prairie plantations the yield is not of such primary importance when one considers the tone of comfort and beauty which those shelter-belts add to the home on the farm. Sylvicultural research, and tree-seed collection and extraction operations were conducted along the lines of former years, the bulk of the seed extracted being shipped to the British Forestry Commission.

The forest fire situation showed a relief from the abnormal conditions of the previous year. The total number of fires on forest reserves and on Dominion lands under the supervision of the Forest Service was 1,165, as compared with 1,487 in 1924; the total area burned over was 524,225 acres, as compared with 1,185,345 acres the previous year. The result was, in the main, due to a less hazardous condition of the forest floor during the seasons of fire danger, but a part of the credit is attributable to the intensive educational and publicity campaign described in last year's report. This publicity was continued during the fiscal year; "Save the Forest Week" was observed from April 19 to April 25, and a National Advisory Committee representative of the press, the wood-using industries, service clubs, and other national organizations, was formed to encourage fire prevention.

Developments in the pulp and paper industry have been very marked. In June, 1925, a contract was completed with the Manitoba Pulp and Paper Company for the establishment of Manitoba's first pulp and paper mill, the capacity of which is to be not less than 100 tons per day. Construction commenced the following August and was well advanced by the end of the fiscal year. The wood supplies are to be obtained by the selection, within certain areas, of limits totalling 1,080 square miles. The selection of these limits is, by the terms of the contract, referred to the Forest Service of the department, which will act in conjunction with the company.

The co-operative agreement entered into during 1925 between the department and the pulp and paper industry provides for an annual money contribution by the latter. This has rendered it possible to extend considerably the scope of the work of the Forest Products Laboratories so as to meet to a greater degree than has yet been practicable the needs of the industry. Already investigations have been commenced on several problems of interest to the pulp and paper industry. Work of general importance to the country which the Government may desire to have carried out will be given precedence over all other investigations.

The Water Power and Reclamation Service is now charged, in addition to its other duties, with the responsibility of securing, compiling, and analysing run-off, and other hydrometric as well as hydraulic data in relation to international waterway matters. This important function has been made more urgent by the increasing frequency of questions concerning boundary waters, and this department keeps closely in touch with all phases of international waterways problems as they arise.

The increase in turbine installation in Canada for the fiscal year reached record figures for any twelve-month period. There was an aggregate of 719,000 horse-power added, compared with about 300,000 last year, making the total to date 4,290,000 horse-power (about 464 horse-power for every thousand of our population). The operations of large industrial concerns which have been

attracted to this country by the facilities which exist for the large scale development of electrical energy cheaply, have accounted for the major part of the increase. The records lately established in the volume of Canadian trade and productive processes are in no small measure due to the high position which water-power holds among the natural resources of Canada. No less important are the advantages which hydraulic developments are offering to the areas more removed from centres of population where industries connected with mining and forestry are being established on a scale previously undreamed of.

In regard to irrigation, no new projects were organized during the fiscal year but a total of 275,000 acres was irrigated on existing projects in the dry areas of southern Alberta and Saskatchewan. A sugar factory with a daily capacity of 1,000 tons of beets was established at Raymond, Alta. There were approximately 80,000 bags of sugar produced during the first season's operations, and it is expected that this undertaking will offer a stimulus to the beet-raising industry on irrigated land in the district.

The increased use of the motor car and the impetus given to the tourist traffic have resulted in a wider popularity of the National parks. There were over 61,000 more registrations than last year and each successive year gives rise to a new record in the number of people taking advantage of these unspoiled virgin tracts, which have been reserved for their benefit. Rocky Mountains park has attracted the largest number of visitors, but Jasper park is increasing in favour and shows an advance of over 50 per cent in the number of visitors registering compared with last year. The present accommodation at Jasper was taxed to capacity and when the park is finally opened up to motor travel the number of tourists who will be attracted thereto will more nearly represent its relative importance.

The highway between Field and Lake Louise has been completed and Yoho park is now open to motor travel. The construction of the Akamina highway link between Waterton Lakes National park and the United States Glacier National park has progressed satisfactorily. Matters affecting the conservation of wild life in the parks and the administration of the Migratory Bird Treaty have been favourable on the whole. The buffalo herd at the National park, Wainwright, Alberta, has continued to increase steadily in numbers until now the annual surplus above the forage capacity of the park is about two thousand animals. In the past fiscal year the experiment was begun of placing this surplus on open range in the Wood Buffalo park on the boundary between Alberta and the Northwest Territories, and over sixteen hundred animals were successfully transferred to the new location.

The fire situation in the Canadian National parks proved most difficult to deal with. The fires which followed on a very dry spring and summer season were more numerous and of greater extent than in any previous year, and had it not been for the prompt action of the fire protective services the losses would have been even more serious than they were. A bad year such as this serves to emphasize the necessity for keen vigilance at all times in the matters of efficient equipment and training of fire-fighting forces.

The investigations commenced last year by the North West Territories and Yukon Branch in relation to the conservation of the caribou and the musk-ox in the Canadian Arctic and sub-Arctic regions, and which aimed at securing information as to the degree in which the natives are dependent upon these animals for food and clothing, were continued throughout the fiscal year.

The "bringing in" of Royalite No. 4 well was the stimulus to increased activity on the part of other interests operating in the oil and gas fields of Western Canada. Flows of gas have been obtained in the Viking and other fields in Alberta, and some oil was tapped in the Northwest Territories, and in the Wainwright, Alta., fields. In the Turner Valley field the Royalite property

has been considerably developed by the expenditure of approximately $660,000 for the more efficient handling of the product of the now famous No. 4 well. Both the oil and gas are now pumped through pipe lines to Calgary.

The mineralized areas under the control of this department, especially in the Yukon and in Manitoba, are undergoing pronounced development. The value of the gold exported from the Yukon, according to the returns furnished, increased by over 40 per cent compared with 1924-25 and the development of the silver-lead ores of the Mayo district has proceeded most favourably.

In Manitoba companies of recognized financial strength, with executive and technical officers of wide experience in mining matters, have, after investigations, exercised their options on several of the most promising metallic properties in the central and northern parts of the province, and are planning to operate on an extensive scale requiring the construction of railways, roads, hydro-electric plants, mills, and smelters, entailing an investment of many millions of dollars.

The Natural Resources Intelligence Service, during the past year, has greatly added to the collection of data respecting Canada's natural resources and recreational attractions. This is gathered from every available reliable source, classified, and distributed on request to motorists, sportsmen, holiday seekers of every class, educationists, manufacturers, and others. Publicity along educational lines was featured by means of lectures illustrated by lantern slides; radio broadcasting programs; specially prepared bulletins and monographs; geographic and economic maps, showing the nature and distribution of the country's resources, and the extent of their development; and many other means.

Effective publicity abroad is being conducted on a scale never before attempted, with the object of leaving in other countries a just impression of the opportunities which Canada offers to capital and enterprise. Investigation of opportunities for intensifying the development of natural resources within the Dominion is engaging the increased attention of this service.

Settlement on Dominion lands showed an improvement; an area of 749,600 acres was granted under homestead entry during the year as compared with 584,480 acres for 1925, an increase of over 28 per cent. The area disposed of under soldier grant was 92,160 acres. Approximately 866 acres of school lands were sold at an average price of nearly $14 per acre.

The survey operations of the department are co-ordinated through the Surveys Bureau and include the work of the Geodetic Survey, the Topographical Survey, and the International Boundary Commission. The duties of the Geodetic Survey in the fields of precise levelling, triangulation, geodetic base lines, and geodetic astronomy have proceeded along the lines of former years. The wireless method of determining longitude has now passed the experimental stage and indications point to its increased use.

Towards the end of the fiscal year 1924-25 an Order in Council was passed placing all aerial photography and aerial surveying operations, except such as those conducted by the Military Survey Section of the Department of National Defence for their own use, in charge of the Topographical Survey. For some time previously the different phases of this work as they affect the interests of the various departments had been growing broader in scope. The other services concerned now co-operate with the Topographical Survey and under this arrangement rapid development is being made in this relatively new science. An interdepartmental aerial survey committee was also authorized, whose duty it is to relate the work of the various branches of the Government interested in aerial surveying.

The Observatories at Ottawa and Victoria have conducted several important pieces of research work. The meeting of the International Astronomical Union at Cambridge, England, in July, 1925, did much to co-ordinate the efforts of the different national groups participating.

The following is a more detailed outline of the work of the various branches of the department.

## Lands Patents

*Letters Patent.*—The number of letters patent issued during the last fiscal year was 5,484, covering an area of 803,733 acres, made up by provinces as follows:—

| Province | Patents | Acres |
|---|---|---|
| Manitoba | 946 | 135,293 |
| Saskatchewan | 2,669 | 401,952 |
| Alberta | 1,617 | 243,616 |
| British Columbia | 223 | 22,382 |
| Yukon Territory | 18 | 473 |
| Northwest Territories | 11 | 17 |
| Totals | 5,484 | 803,733 |

*Homestead Entries.*—Four thousand six hundred and eighty-five homestead entries were granted during the year, aggregating an approximate area of 749,600 acres, being an increase of 1,032 in the number of homestead entries granted as compared with the previous year.

By provinces the entries were made up as follows: Manitoba, 616; Saskatchewan, 2,363; Alberta, 1,556; British Columbia, 150; total, 4,685.

There were 576 soldier grant entries made during the year, aggregating an approximate area of 92,160 acres, made up by provinces as follows:—

| | Number of entries | Acres |
|---|---|---|
| Manitoba | 70 | 11,200 |
| Saskatchewan | 296 | 47,360 |
| Alberta | 183 | 29,280 |
| British Columbia (Railway Belt and Peace River Block) | 27 | 4,320 |
| Totals | 576 | 92,160 |

*Accounts and Revenue.*—During the fiscal year $442,020.52, including $188,913.67 interest on deferred payments, was received on account of purchased homesteads, pre-emptions and ordinary sales, showing an increase of $58,300.27, as compared with the payments received during the previous year.

The sum of $100,876.11 was received for entry fees, improvements and sundries, making a total revenue for the fiscal year of $542,896.63.

Refunds were made amounting to $29,376.56, as follows:—

| | |
|---|---|
| Value of improvements collected on cancelled homesteads | $17,945 27 |
| Overpayments on sales; and of moneys on account of purchased homesteads and pre-emption sales, entries for which had been cancelled | 11,431 29 |
| Total | $29,376 56 |

Out of the $11,431.29 above mentioned, the sum of $5,482.64 was refunded to the Soldier Settlement Board of Canada in connection with pre-emptions and purchased homesteads converted into soldier grant entries, and the sum of $2,815.08 was refunded to entrants in connection with cancelled pre-emptions and purchased homesteads.

## SCHOOL LANDS

During the fiscal year ended March 31, 1926, school lands were disposed of by public auction and private sales in the provinces of Manitoba, Saskatchewan and Alberta, as follows:—

| Province | Area in acres | Value | Average per acre |
|---|---|---|---|
| Manitoba | 32.00 | $ 245 00 | $ 7 66 |
| Saskatchewan | 562.716 | 7,294 80 | 12 96 |
| Alberta | 271.05 | 4,606 03 | 16 99 |

The approximate net areas disposed of down to March 31, 1926, after making deductions for cancelled sales and adjustments in regard to changes in area, were as follows:—

| Province | Area in acres | Value | Average per acre | Value of Town Lots |
|---|---|---|---|---|
| Manitoba | 648,389.97 | $ 6,249,785 80 | $ 9 64 | $ 5,165 00 |
| Saskatchewan | 1,233,466.1248 | 20,144,540 23 | 16 33 | 12,571 00 |
| Alberta | 797,904.653 | 10,998,304 88 | 13 78 | 39,380 00 |

The revenues collected for the fiscal year (less principal moneys and less expenditure) and paid over to the provinces were as follows: Manitoba, $20,689.89; Saskatchewan, $543,286.15; Alberta, $346,466.36.

The amounts of interest paid in the fiscal year on the investments to the three provinces were as follows: Manitoba, $289,275; Saskatchewan, $681,675; Alberta, $360,150.

## MINING LANDS

The cash revenue received by the Mining Lands Branch was $748,787.33 for the fiscal year. This figure marks an increase in cash revenue of $144,255.99, or nearly 24 per cent over that of the previous fiscal year. In addition expenditures amounting to over $361,000, and incurred in the undertaking of certain development works, were accepted, under the regulations, on account of rentals.

Drilling operations for the discovery of oil continued to be active especially in the Turner Valley and Wainwright fields. The number of wells drilled increased from 299 to 335 and the percentage of producers of both natural gas and oil shows a decided increase. There is more natural gas being produced than the present market can consume. Sound indications exist that the perseverance of the private interests engaged in the development of petroleum and natural gas rights will, in due time, overcome many of the practical difficulties which are characteristic of the oil fields of the western provinces, and which have delayed progress and discouraged efforts in the past. Two wells in the Wainwright field show indications of commercial production and in the Turner Valley field, in addition to an increased production obtained from Royalite Well No. 4, other incompleted wells in the same vicinity gave good promise.

The total revenue derived from coal mining lands on account of rentals, royalties and application fees during the fiscal year amounted to $369,038.46.

The concentration mill installed in the Mayo Keno district of the Yukon Territory and completed in January, 1925, has been continuously operated during the fiscal year. The recovery of concentrates from the local silver-lead ores has been attended with marked success.

The production of gold mined in the Yukon Territory increased considerably. The gold export tax amounted to $21,995.50, as compared with $15,636.48 for the previous fiscal year.

Research work directed to the commercial recovery of the hydro-carbons from the tar-sands of Alberta is being continued.

### TIMBER AND GRAZING

The increase in the revenue from timber, grazing and hay lands was $150,876.43, as compared with the previous fiscal year. The total revenue for the year, amounting to $1,109,013.05, is the highest ever recorded in this branch in any one year and shows an increase of 125 per cent as compared with ten years ago.

While the amount of lumber manufactured from licensed berths and under permit shows a decrease of about fifty million feet, board measure, as compared with the previous year, substantial increases are shown in regard to telephone poles, mining timber, piling, etc., to the extent of over twelve million linear feet of timber, which if converted into board measure, would represent approximately thirty-six million feet.

During the past fiscal year 228 new timber berths were granted and 1,628 new grazing leases issued.

### THE CANADIAN NATIONAL PARKS

A record was established in the number of persons who visited Canadian National parks during the season, the increase being more than 22 per cent over the previous year. Statistics show that a large percentage of these visitors were Canadians, again proving that the value of these national playgrounds as recreational and rest areas is fast becoming known to the people of the Dominion. It is important to note that the number of transoceanic visitors was also greatly increased over any former year. This is most encouraging as it shows that interest is being stimulated abroad in these regions and the beauty and charm of the Canadian wilds are becoming more generally appreciated.

Most important among the highway and trail construction work carried out was the completion of that section of the Golden Trail lying between Lake Louise and Field. This important stretch of highway makes Yoho park accessible to the outside world, and opens up to the motor tourist a region wonderfully rich in scenic resources. Good progress was made on the Akamina highway construction, the completion of which will eventually link Waterton Lakes National park with the western portion of the United States Glacier National park.

Added accommodation has been provided by the railway companies and private interests within the parks while all such facilities as motor camp sites, etc., are being increased for the convenience of tourists and alpinists.

Most encouraging is the success which has accompanied the efforts put forth in wild life conservation within the parks. A marked increase has been noted in practically all species of game, and this is particularly so in the case of the buffalo, elk, deer and antelope. The preservation of the latter species is now practically assured, while the increase in the buffalo has been so great that arrangements have to be made yearly for the disposal of the surplus animals (amounting to about 2,000 per year) in order that the range on which the buffalo live may continue adequate for the needs of the herd.

The administration of the Migratory Bird Treaty has progressed favourably, and from all indications the provisions of the treaty are being better observed and much good is resulting. The Department of the Interior was represented at an important conference of game commissioners held at Denver, Colorado, during the late summer of 1925. The main topic was the preservation of water and marsh areas to provide resting and feeding grounds for Canadian water fowl during their migration and during their sojourn on their wintering grounds in the United States. The work accomplished at this conference is considered to have been a substantial contribution to the conservation of bird life on this continent. There has been danger for some years

that much of our water-fowl protection work would be undone by the increasing prevalence of oil on the waters of the sea caused by oil tankers and oil-burning vessels. The department had a delegate attend a conference called in Atlantic City in 1923 to deal with oil pollution, and has since been collecting evidence. As most of the pollution occurs on the high seas the Under-Secretary of State called an interdepartmental conference to advise respecting suitable action for dealing with the oil menace. The committee is studying the many phases of this complicated question.

## FORESTRY

The administrative activities of the Forest Service showed steady progress. The total revenue for the year exceeded that of the fiscal year 1924-25 which was the previous high record. Increased receipts from timber sales and timber permits were especially important. Continued depression in the stock industry accounts for a slight falling-off in revenue from grazing. The number of grazing permits issued was greater than the previous year, but the total number of stock pastured on forest reserves showed a diminution. Indications exist, however, that the stock industry is on the upward grade.

The fire loss during the season was normal except in British Columbia where a rather serious situation developed. The use of aircraft for fire detection in Alberta and for both detection and suppression in Manitoba again proved of considerable value.

Intensive surveys, started the previous year designed to provide the basis for permanent management of certain forest reserves on a sustained yield basis, were completed in 1925.

Recreational use of the forest reserves is growing by leaps and bounds. Whereas in former times visitors were mostly persons residing in the neighbourhood of the reserve, the records now show use by people living at considerable distances. Many of the summer resorts on the forest reserves are proving a strong attraction to Unitd States tourists.

Again in 1925 the Forest Service took the lead in bringing to the attention of the people of Canada the seriousness of the situation with respect to forest fire losses. As in 1924, a " Save-the-Forest " Week (April 19 to 25) was celebrated. A new and successful feature was the formation of a National Advisory Committee representative of the press, wood-using industries, service clubs, and many other national organizations interested in forest conservation. This committee took charge of the organization and development of the fire prevention campaign. Through the good offices of the several provincial forest services, provincial committees were appointed for direct supervision of the campaign in the respective provinces. Publicity work included national advertising in the press, addresses before service clubs, schools and other organizations, and the widespread use of radio. The Prime Minister of Canada and the provincial Premiers, or their representatives, broadcasted from C.N.R.O. and other radio stations throughout the country. The Wembley exhibit of the service was revised and enlarged, and attracted very favourable attention throughout the British Isles. Exhibits were also made at many of the provincial exhibitions and fairs in Western Canada.

The work of the Forest Products Laboratories was increased in scope by the coming into force of a co-operative agreement with the Canadian Pulp and Paper Association for participation in the work of the pulp and paper division in the Montreal laboratories. The branch laboratory at Vancouver was moved into new and enlarged quarters provided by the University of British Columbia. This laboratory has made for itself an important place in the economic life of the timber industry of the British Columbia coast.

The forest research division extended its policy of co-operating with the larger pulp and paper companies in investigation of many of the problems arising with respect to pulpwood lands. Seeding and planting work on the forest reserves was reorganized and many experimental cutting areas were established in connection with timber sales.

### WATER-POWER AND RECLAMATION

*Water-Power.*—During the past year water-power installation in Canada increased by 719,000 horse-power and reached a total of 4,290,000 horse-power. The increase is far in excess of that recorded in any previous year, one-half being provided by a single plant on the Saguenay river in the province of Quebec; other installations in Quebec made the aggregate for that province 439,000 horse-power, whilst Ontario contributed 200,000, British Columbia 59,000, and Manitoba 22,000 horse-power to the total. Throughout Canada the whole water-power field was active and new developments and extensions to existing plants were either under construction or actively in prospect, thus giving assurance that steady growth in the production and utilization of hydro-electric power will continue.

*Irrigation.*—In southern Alberta and Saskatchewan the precipitation during the year was slightly above normal. During September and October heavy precipitation, accompanied by cold weather, was experienced almost uninterruptedly and as a result harvest was greatly delayed and grains suffered through loss of grade.

The establishment of a beet-sugar industry at Raymond, Alta., promises to be of great assistance to irrigation development. The factory, which has a daily capacity of 1,000 tons of beets, operated from October 19 to December 26.

A total area of approximately 275,000 acres was irrigated during the past season. While no new districts were organized or large projects developed during the year the construction of small individual projects is still interesting many farmers and ranchers whose lands can be irrigated by direct diversion from nearby streams. Sixty-three applications for such schemes were received while 185 were investigated in the field.

*Drainage.*—Investigations have again been restricted to inspections and surveys of small drainage projects, of which ninety-two were made during the year. The department has maintained supervision over the McArthur Land Company's project in Manitoba and the Waterhen Lake project in Saskatchewan. In the latter project, the Crown land, except for several marginal fractions, has been leased to various individuals for a period of ten years. Close touch has been maintained with provincial drainage schemes in Alberta and Saskatchewan and reclaimed fractional areas within these districts are now being disposed of in accordance with the drainage regulations.

### NORTHWEST TERRITORIES AND YUKON

*Northwest Territories.*—The revenue collected under the administration of the Northwest Game Act increased from $17,533.51 last year to $27,945.51 for the present fiscal year, thus showing an advance of over 59 per cent. Revenues received on account of licenses issued to hunters and traders, and on account of the sale of wolf pelts show the largest increases.

The new regulations regarding bounty on wolves have been operative now for more than a full year and during the past fiscal year the area over which they became effective was extended to cover the entire Northwest Territories; 576 wolf pelts were surrendered, as compared with 276 the previous year (under both the old and new systems). It is considered that the results achieved fully justify the change in the regulations.

The total value of furs traded in was approximately $1,780,666, as compared with $1,541,678 last year. The chief increases are shown in the numbers of beaver, martin, and white fox skins traded; muskrat shows a heavy decrease.

The shipment of plains buffalo from the Canadian National park at Wainwright to the Wood Buffalo park near Fort Smith was carried out as outlined in last year's report. Indications all point to the ultimate success of the undertaking. The wild wood buffalo continue to thrive. Steps were taken to conserve and protect the caribou and musk-ox of the northern plains.

The annual patrol of the Arctic archipelago was carried out by an expedition in charge of Mr. G. P. Mackenzie, formerly Gold Commissioner of the Yukon Territory. All the posts previously established were visited, supplies were renewed and personnels relieved. An unsuccessful attempt was made to establish a new post at Bache peninsula. The medical officer reported that the health of the natives was found to be better than on the previous year's visit.

The mining, petroleum, and natural gas inspections carried on under the supervision of this branch cover the Prairie Provinces and the Railway Belt of British Columbia as well as the Northwest Territories. A summary of the gas and oil operations in the individual fields of operation is given under the report of the Director, North West Territories and Yukon Branch, at the end of this publication.

*Yukon.**—The season was very favourable for agriculture, the crops being well matured and of excellent quality.

The average health of the people continued to be excellent, although the number of old people applying for assistance is reported to be still increasing and constituted a serious drain on the finances of the territory.

In addition to the public schools previously established at Dawson, Whitehorse, and Mayo and the assisted school at Carcross, two new assisted schools were opened at Selkirk and Keno City.

Ninety-two permits to cut wood and timber were issued, compared with 79 last year; 15 applications for land were received, and 18 patents covering an area of 473 acres were issued.

## SURVEYS BUREAU

The Surveys Bureau comprises three divisions, the Geodetic Survey and the Topographical Survey, each under the supervision of a director, and the International Boundary Commission, Canadian section, the Director General of Surveys being also Boundary Commissioner.

The function of the Geodetic Survey is to determine and furnish accurate geographic positions and precise elevations for selected points throughout the country. This triangulation and level work is being gradually extended across Canada and forms a framework to which all other surveys can be referred. The appropriation was $270,500, and twenty-three parties were in the field.

The chief work of the Topographical Survey is the preparation of detailed topographical maps, the usual field methods being supplemented by the use of aerial photography which in this connection has been developed to a remarkable extent in Canada through close co-operation with the Royal Canadian Air Force. This survey also carries on legal land surveys as required, land classification surveys, exploratory and control surveys and magnetic surveys. It maintains an efficient mapping office with staff and all necessary equipment for drafting, photographing, lithographing and printing, also the Physical Testing Laboratory for the testing and standardization of instruments of precision. The appropriation was $400,000, and twenty-five parties were in the field.

* Mining in the Yukon is dealt with in the report of the Mining Lands Branch.

The Canadian section of the International Boundary Commission collaborates with the United States section under the treaties of 1903, 1906, 1908, 1910, and 1925 in the demarcation of the boundary between Canada and the United States, a total length of 5,500 miles. The greater part of the field operations made necessary by the earlier treaties having been completed by 1925, the treaty of that year provides that the commission shall permanently maintain the boundary in a state of effective demarcation. This necessitates periodic inspection and repair of monuments, setting new monuments where required, reopening the boundary vista through wooded areas, and the revision of the boundary maps. The larger part of the appropriation of $20,000 was spent in preparing joint reports, including the computation of geographic positions of boundary monuments, and in engraving and printing joint maps to accompany these reports, which under the various treaties must be submitted by the commissioners to their respective governments.

At present the three divisions of the bureau are housed in several buildings in widely separated parts of the city. Under these conditions complete co-operation and the most effective and efficient arrangement of the staffs and of their work cannot be expected and in view of the obvious advantages of concentration of staffs, engaged as these are on closely co-related work, it is hoped that suitable accommodation in one building will before long be available.

A brief summary of the work of each of the divisions of the bureau for the fiscal year follows. Detailed reports of the activities of the Geodetic Survey and the Topographical Survey are issued as separate publications.

### *Geodetic Survey of Canada*

The work of the Geodetic Survey of Canada in furnishing geographic positions and precise elevations as a framework or basis of control for surveys of all kinds, progressed very favourably during the fiscal year 1925-26. The activities of the survey are synopsized in this report under the following heads: precise levelling, triangulation, geodetic base lines, and geodetic astronomy.

*Precise Levelling.*—Towards the close of the previous fiscal year a consolidation was effected between the departmental staffs engaged in control levelling and they were placed in one division under the Geodetic Survey. While essentially put in effect for economic reasons this consolidation will result in improved service to the public. In the opening up of the country practically every development project requires levels in some form, and any means whereby the available levelling data can be made more easily accessible is welcomed by the public in general but more particularly by members of the engineering profession. One result of the amalgamation of staffs has been to concentrate in one division the records of all control levelling heretofore carried on in the Department of the Interior. In addition, however, the work of collecting the records of levelling of all grades carried on by federal and provincial departments, railway companies, etc., is being energetically pursued. This information is being co-ordinated with the control system of this division and tabulated in a form suitable for publication.

Originally the demand for precise levelling in Canada arose from the need of an accurate vertical control in certain areas. Lines of levels were accordingly run from the nearest available precise level bench marks, which then meant the nearest United States bench marks, and were carried into the areas and extended as found necessary. Thus the country was gradually covered with precise level lines divided into separate systems based on different initial bench marks. However, the time is now approaching when it will be possible to consolidate these separate units and have one Canadian precise level net extending from the Atlantic to the Pacific. The field operations during the fiscal year were concentrated on strengthening the weak links that still remain before this object can be attained.

Levelling operations were carried on in Quebec, Ontario, Alberta, and British Columbia. In Quebec the precise line from Rivière du Loup to Lévis, originally run in 1915, was relevelled to ascertain if any vertical displacement had been caused by the earthquake of February 28, 1925.

*Triangulation.*—The season of 1925 witnessed the completion of two sections of triangulation which have been in progress for several years. The eastern portion (625) miles of the triangulation along the 49th parallel (International Boundary) was finished at the end of August. This constituted the Canadian share of a co-operative effort by the two countries. The completion of the western portion by the United States Coast and Geodetic Survey was delayed by extensive forest fires in British Columbia and the state of Washington. This arc of triangulation will serve as a basis for all future similar work in Western Canada. The second circuit to be finished was that up the Saguenay river to lake St. John, thence south following the railway to connect with the main net near Three Rivers, P.Q. This net consisted of combined primary and secondary triangulation, and the small closing error indicated a most satisfactory accuracy. The large circuit of Canadian and United States triangulation in Eastern Canada, comprising the St. Lawrence net, the Eastern New Brunswick net and the Bay of Fundy net in Canada, and part of the Eastern Oblique Arc in the United States was almost completed, a partial closure indicating a closing error of only 42 feet in a circuit of over 1,800 miles of triangulation, less than one-third of an inch per mile. In addition to the operations noted above, reconnaissance for the selection of stations was carried on for about 150 miles along the southwest coast of Nova Scota, along the north shore of the gulf of St. Lawrence for about sixty miles east of Harrington, and for over 300 miles northward through Alberta to Edmonton. The Ottawa River triangulation was extended some 150 miles, the reconnaissance at the end of the season finishing just north of Englehart. A line of precise traverse along the Canadian National railway east of Prince Rupert, ended for the season at Pacific, B.C., a distance from Prince Rupert of 118 miles.

*Geodetic Base Lines.*—Two primary base-lines were measured during the year, one on Allumette island, near Pembroke, Ont., in the Ottawa River triangulation net, and one along the Grandes Piles branch of the Canadian Pacific Railway north of Three Rivers in the Northern Quebec net. No unusual difficulties featured these operations. Before and after the measurement of each base-line the invar tapes employed were standardized at the Standards building of the Geodetic Survey.

*Geodetic Astronomy.*—During the season eight Laplace stations were occupied. These are triangulation stations at which astronomical observations for longitude and azimuth are taken. To complete the information for investigations regarding the shape and size of the earth astronomical observations for latitude are also made at Laplace stations. Five of these stations were located in the Canadian section of the 49th parallel triangulation, one in the Ottawa River net, and two in the Northern Quebec net. In the last three cases the wireless method was employed in the longitude determinations. This method has now passed the experimental stage and there is little doubt that its advantages will demand that it be used to an increasing degree in future.

### *Topographical Survey*

Field activities of the Topographical Survey extended from coast to coast, work being carried on in eight of the nine provinces of Canada, in the Northwest Territories and in Yukon territory. Twenty-five parties were employed, several of which were in the field for short periods only, as compared with twenty-nine parties during the previous year.

The staff of the Calgary levelling office and the work formerly carried on there by the Director of Levelling were transferred to the Geodetic Survey of Canada towards the close of the previous fiscal year. Other classes of survey work were continued as usual. Some districts hitherto not mapped in detail were surveyed by the use of aerial photography controlled by rapid traverses along navigable waterways. Aerial photography was also made use of in other classes of work, notably in land classification surveys.

During the fiscal year there were distributed 29,778 maps, 10,862 official plans of townships, townsites, and settlements, and 3,497 other publications, a total of 44,137. Of this number 16,219 were paid for, as compared with 11,125 for last year, an increase of about 46 per cent. In the distribution of these, 6,294 requests were dealt with.

Of the maps issued during the year those for which there was the greatest demand were the revised edition of the map of The Pas mineral area and the new series Banff and Donald sectional sheets. Indications are at hand, also, that there will be a particularly large demand for the map of the area surrounding Red lake in western Ontario which is expected to issue early in April, 1926.

*Topographical and Photo-topographical Surveys.*—A total area of 8,000 square miles of new mapping was completed and a second revision made of 15,000 square miles of the Sectional Map of Canada.

Thirty-two and a half sheets of this map have now been revised in detail. Of these twenty-six have been printed, the others being in various stages of completion. These sheets are printed in a number of colours, usually eight, on the scale of one inch to three miles, each sheet comprising 124 townships of 36 square miles each.

In British Columbia 1,150 square miles in the Revelstoke and Kamloops districts were surveyed by phototopographical methods, the transit and range-finder being used in conjunction with the camera in the wooded and less rugged districts.

In the eastern provinces plane-table surveys for the production of the one-inch-to-the-mile maps were continued. In the province of Quebec the Sorel sheet was completed and the Shawinigan sheet commenced. The two sheets begun the previous season, namely, the Sussex and the New Glasgow sheets in the provinces of New Brunswick and Nova Scotia respectively, were completed and a start made on the Grand Pré sheet in the latter province.

*Aerial Surveys.*—During the year 49,167 square miles were photographed in co-operation with the Royal Canadian Air Force for the use of the Topographical Survey. Of this area 38,354 square miles were by oblique and 10,813 square miles by vertical axis photography. In all there were received 41,716 photographs, 25,142 being for record and mapping, and 16,574 for the construction of mosaics, for surveyors in the field, and for distribution on request to provincial government officials, city engineers, mining and lumbering corporations, and municipalities.

Areas photographed for mapping purposes include the Victoria and Fort Assiniboine sheets of the Sectional Map and the Lac Seul, Pointe du Bois and Carroll Lake sheets of the Topographic Map of Canada. The Red Lake mining area in Ontario takes in portions of the three last-mentioned sheets. Areas photographed for the making of mosaics include the cities of Joliette and St. Johns in Quebec, certain marsh lands in Manitoba, and timbered lands in Alberta, Ontario, Quebec, and New Brunswick.

Photographs covering parts of six other sheets of the Topographic Map of Canada in eastern Manitoba and western Ontario have been taken but the preparation of these map sheets is withheld pending the completion of further aerial surveys in these areas.

*Control Traverse and Exploratory Surveys.*—The control traverse surveys of 1925 were carried on principally for the purpose of providing control for mapping from aerial photographs. In this method of mapping, considering the territory to be covered, the amount of funds at the disposal of the Survey, the objects to be served and the scale of the finished maps, it was found that adequate control could be provided by replacing a continuous survey to a certain extent with astronomical observations and minor isolated surveys. Four survey parties were employed on control traverse work and two surveys engineers spent part of the season taking astronomical observations.

In northwestern Ontario a continuous traverse survey was extended from Hunter and Hudson stations on the Canadian National Railway system, through the Chukuni River and Red Lake areas and northerly through connecting waterways to the eastern end of Island lake. Surveys were also extended through the waters in the neighbourhood of lac Seul and along the rivers flowing westerly into lake Winnipeg.

In northwestern Canada, a control traverse survey was extended down Hay river from the Sixth meridian to Great Slave lake and northerly from the north arm of Great Slave lake through connecting waterways for over one hundred miles. An exploratory trip was made into the country southeast of Great Slave lake and some five hundred miles of unexplored waters mapped.

*Control Surveys in Nova Scotia and Quebec.*—Control surveys as a basis for topographical mapping were carried on in southwestern Nova Scotia and in the Shawinigan area, Quebec. Permanent monuments established at suitable points from four to six miles apart provide marks to which local surveys may be tied.

*Land Surveys.*—Legal surveys in the Railway Belt of British Columbia included the completion of the boundaries of five timber berths, two school sites, a summer resort at Paul lake near Kamloops in the Niskonlith forest reserve, and a number of miscellaneous surveys.

Additions were made to Rae settlement on the north arm of Great Slave lake and further subdivisions of lots were made at Hay River, Resolution, and Fort Smith settlements in the Northwest Territories. Additional lots were laid out at Berens River, Manitoba, and historic sites were surveyed at Fish Creek in Saskatchewan, and at Coulee Grou in Quebec.

Subdivision was extended over accrued lands around Cygnet lake, Whitford lake and marsh in Alberta, and the Great marsh, near Selkirk, Manitoba. Surveys of water areas and retracement surveys were made in many places where needed for purposes of administration, one of the most extensive retracements being in a township in southeastern Manitoba which was originally subdivided fifty years ago. The boundaries of the Mission farm on Salt river in northern Alberta were also defined.

*Land Classification.*—One regular field party was engaged in Alberta throughout the full season in the combined operations of land classification and revision surveys in the area covered by the south half of the Victoria sheet of the Sectional Map. In Saskatchewan two small irregular areas were examined at the request of the Forest Service.

The aggregate area examined totalled 1,303,040 acres, of which 78,720 acres are located within forest reserves.

*North Boundary of Alberta.*—The need for the establishment on the ground of a portion of the parallel of 60 degrees north latitude in the vicinity of Slave river has been urgent for some years for administrative purposes. This line forms the boundary between the provinces of Alberta and the Northwest Territories. A party was, therefore, employed during the summer on a monumented survey of the boundary from Slave river westerly to Little Buffalo river, a

distance of thirty-six miles. The method of survey adopted was similar to that which had previously been employed in the survey of the 49th parallel or International Boundary.

*Mapping.*—Complete facilities for the production of maps are included in the organization of the Topographical Survey, the work of plotting, compiling, photographing, and lithographing being carried out under one roof. Work is also undertaken for other branches and departments, when it can be done without interfering with the work of the survey.

*Magnetic Surveys.*—During the season of 1925, magnetic surveys were continued by all the survey parties whenever opportunities occurred in the course of the regular work. The magnetic measurements take but a few minutes each and are carried out most economically as the necessary astronomical bearings are available from the regular surveys.

Nearly 1,100 magnetic observations were thus obtained throughout the country during 1925, which brings the total number since the beginning of this survey in 1880 to well over 21,000.

Many repeat observations were also made in order to acquire information regarding the "march of the compass," so that lost land boundaries, run by compass many years ago, may readily be retraced and re-established. Before publication the results obtained are compiled with magnetic data secured by other divisions.

*Physical Testing Laboratory.*—During the year, in addition to the regular work, it was found possible to make comparisons between the lengths of precise measuring tapes as determined by the Physical Testing Laboratory and other laboratories. The results show that the lengths obtained by this laboratory agree very closely with those derived elsewhere. A check of this nature is very valuable as the measurement of even the greatest distances is based on the lengths of standard one-metre rules.

There was a considerable increase in the number of occasions on which the Physical Testing Laboratory was consulted by officers of other branches interested in problems relating to physical instruments. At the request of the Department of Customs and Excise the laboratory undertook the work of standardizing the hydrometers used by them; and specifications were prepared for and tests made of a special mountain aneroid barometer for the use of the Mount Logan expedition.

*Record Office.*—In the Record Office are filed the original returns for Dominion lands surveys since their inception in 1869, this collection numbering well over fifty thousand different items in the nature of plans and original survey notes. This office also files the stock of printed plans of townships, settlements, townsites, etc., in the western provinces, as well as the increasing stock of reports and topographic maps.

### *International Boundary Commission*

Only a small amount of field work in connection with the International Boundary had to be undertaken during the fiscal year. This consisted of tying in a number of survey stations established by the commission on Rainy lake and lake Namakan to precise traverse stations established by the United States Coast and Geodetic Survey during the preceding winter. In addition to this two large concrete monuments were set on the Quebec-Maine section of the boundary at the point where it is intersected by the new location of the Kennebec road.

Conferences between the commissioners and between members of the staffs of the two sections of the commission were held in Washington in April and

September and in Ottawa in November. At these conferences details of future work were arranged and the division thereof between the two sections was agreed upon.

Large scale plans of the narrow waterways of the Ontario-Minnesota section of the boundary were prepared and on these the boundary turning points were selected. The geographic positions of these points were computed and computations were also made of the geographic positions of monuments and triangulation stations on those portions of the Ontario-Minnesota section of the boundary surveyed by Canadian parties. Lists of these positions were sent to the engravers of the boundary maps. Of the thirty-six maps of the Ontario-Minnesota section twenty-one were engraved, and the engraving of the remainder is to be completed by July 1, 1926.

At the request of the commission the Department of Lands and Forests of the province of Ontario reserved from sale lands lying within sixty-six feet of the Ontario-Minnesota section at the three points where that boundary is a land boundary.

The provinces of Manitoba, Saskatchewan and Alberta were asked to make the road allowance along the International Boundary a permanent reservation, but up to the present the matter is still pending.

At the request of the commission the federal Department of Indian Affairs has undertaken to forbid in future the erection of buildings within sixty feet of the International Boundary on Indian reserves; and the British Columbia Lands Branch of the Department of the Interior has issued instructions to its land agents that in future a sixty-foot strip is to be reserved from sale along the International Boundary in the Railway Belt of British Columbia.

The provinces of New Brunswick, Quebec, and British Columbia have furnished the commission with maps showing the location of reserved strips along the boundary in these provinces, and the United States Land Office has furnished similar maps showing the location of reserved strips on the United States side of the boundary.

The joint report of the commissioners upon the survey and demarcation of the boundary from the source of the St. Croix river to the Atlantic ocean was completed and put in the printer's hands. The joint report on the survey and demarcation of the boundary from the source of the St. Croix river to the St. Lawrence river was tabled in the Senate and House of Commons during the session of 1926. Copies of this report have been distributed to various government offices and libraries and to a number of university and reference libraries.

Ratifications were exchanged at Washington on July 17, 1925, of the treaty signed on February 24, 1925, providing for the removal of an anomalous situation at the "Northwest Angle" of lake of the Woods, for the better definition of the boundary on the 49th parallel and in Grand Manan channel, and for the permanent maintenance of the boundary in a state of effective demarcation.

## OBSERVATORIES

### *Dominion Observatory, Ottawa*

The outstanding astronomical event of the year was the meeting in July of the International Astronomical Union at Cambridge, England. The activities of the National Committee of Canada in preparation for this meeting were referred to in the last annual report. The Directors of the Dominion Observatory, Ottawa, and the Dominion Astrophysical Observatory, Victoria, attended as official Government delegates, while there were four additional delegates from the National Committee. In all there were 189 delegates in attendance representing 19 countries. Most of the work was done by sub-committees, on eight

of which Canada was represented. Canada presented a proposal for international co-operation in the study of the light-curves of Cepheid variables, which was approved by the union. This work has since been organized by a committee formed at the time on the initiative of the Dominion Observatory. A plan for carrying out a series of observations to establish a world-encircling longitude net, which had been under discussion for a number of years, was adopted. Some 28 countries will co-operate in the plan, which involves the simultaneous establishment of 21 primary and 20 to 30 secondary stations. The observations will be made during the months of October and November, 1926. The Dominion Observatory is to have primary stations at Ottawa and Vancouver.

Observations on the Bachlund and Hough list of fundamental stars were continued with the meridian circle, 3,939 observations having been made. Along with these, observations for clock corrections were made whenever sufficient stars could be observed. There were 114 observations on the sun and 35 on the moon and planets. Steady progress has been made on the computations of the program of fundamental stars and on the previous program of latitude stars.

The time service maintained throughout the Government buildings and sent out by telegraph and telephone has increased and has functioned satisfactorily. This service involves the maintenance and use of 4 primary clocks, 15 secondary master clocks, 2 tower clocks, 600 dials and various relays, chronographs, and seismographic shutters.

Wireless time signals were received from the United States, France and Germany on long waves; and observatory clock signals were sent out through "C.N.R.O." radio broadcasting station. Experimental work was done both in transmitting and receiving on short waves and in a series of time signal tests. The observatory also co-operated with the Bureau of Standards, Washington, in recording radio signal fading at various times of day and night and of the year. A radical departure in receiver design was made in a combination time signal and radio receiver for use in connection with a seismograph; also another, which could be carried in the pocket, for exploration work of the Topographical Survey; these in addition to those supplied for use of the Geodetic Survey and our own gravity survey. Wave-length calibrating of various radio sets and checking from stations in different parts of the world were carried out in the wireless laboratory of the observatory.

Observations to the number of 310 were made with the coelostat and spectrograph of solar limbs, centre, intermediate points and laboratory comparisons. Measurements of the 1909 and 1910 solar rotation plates were completed along with computations of radial velocity, terrestrial components of velocity and heliographic positions. A device for computing components of the earth's orbital velocity to any point on the sun's disc was constructed, and the necessary tables of angle, between ecliptic and solar poles as seen from the earth, were computed. This device greatly facilitates the computations and lessens the chance of error.

The 15-inch equatorial telescope has been employed in investigating Cepheid variables and pseudo-Cepheids, stars of the type of β Canis Majoris, and also triple systems such as λ Andromedae. Sigma Scorpii has been continued on the program, and long series of radial velocity measures have been made of individual spectrum lines to throw light on the pulsation theory. In all 766 spectrograms were obtained. Considerable work has been done in organizing the international co-operative observation of Cepheids so as to secure continuous records, some 18 observatories having undertaken to co-operate.

The equatorial has as usual been available for observation by the public on Saturday nights, with an astronomer in charge to explain the objects shown.

The 6-inch doublet has been used in making over 200 exposures on 144 plates for photometric measurement of comparison stars in the fields of Cepheid variables. There are 60 fields on the program and one or more of the desired

three plates have been photographed in each field. Measures and reductions have been made on plates of nine fields. A careful search was made for all comets announced, but Orkisz' comet was the only one bright enough for guiding with the 5-inch telescope.

The year has been remarkable as regards earthquakes, 361 having been recorded, of which those in the state of Montana and at Santa Barbara, California, were outstanding, while 53 warranted being reported to the press and 22 to Science Service, Washington. The seismographs at the Dominion Observatory and at Dalhousie and Saskatchewan universities were practically in continuous operation. A single component Milne-Shaw was installed in the new station opened at Ste. Anne de la Pocatiere. At the request of one of the large power corporations in the province of Quebec, co-operation is planned in using Wood-Anderson seismographs at two points in Quebec. Monthly bulletins have been distributed to 230 seismologic stations.

Magnetic measurements of declination, inclination and horizontal intensity were made at 32 stations, of which number 25 lie east of 70° W. and south of 51° N. Of the total, 26 are repeat stations for the determination of secular change. Reduction of observations has been made in preparation for publication.

Gravity observations were made at 20 stations in Western Canada, chosen to close the gaps between stations previously established. Computations of the final results of the observations for all the field stations, and also the isostatic reductions for the British Columbia stations have been practically completed in preparation for publication. Satisfactory progress has been made in the computations for the stations in the rest of the country.

Two of the regular series of observatory publications were issued during the year and several more prepared for press. Those issued are as follows:—

Vol. VII, No. 2.—The Location of Epicentres, 1921.

Vol. IX, No. 3.—A Study of Zeta Geminorum.

In addition, there has been the usual co-operation by members of the staff in preparing lectures and papers for various scientific societies and journals, and talks given over the radio.

### *Dominion Astrophysical Observatory*

The number of spectra obtained during the year ended March 31, 1926, was 1,811, as compared with 1,581 for the preceding year and 1,050 for the year 1923-24. The dome was opened and plates secured on 209 nights which is identical with the number of last year. The seeing conditions, however, were on the whole better this year and as the silvered surface of the mirror was always in good condition the increased number of spectrograms was the result. Dividing the workable nights into two classes there were 147 nights, rated fair to good, when 1,666 plates were secured and 62 poor nights when only 145 plates were obtained.

The program of observation of the B-type stars which has been under way for about two years is making satisfactory progress, more than half the spectra required having been obtained. The measurement of these spectra is practically up to date and several accessory results in the line of spectroscopic binaries and peculiar spectra mentioned elsewhere in this report have been completed or are in progress.

In the absolute magnitudes of A-type stars an examination of the spectra revealed four lines suitable for determining the absolute brightnesses. Others were found of lesser value but before publishing any magnitudes based on these it is planned to secure spectra of all the A-type stars on the H.R. program prepared a few years ago. The radial velocities of these will be required for statistical treatment and they are being measured as the plates are secured.

Besides the B- and A-type programs considerable observing time was expended upon spectroscopic binaries and eight orbits were completed during the year. Most of these were based upon observations of both component spectra, thus giving additional data as to the masses of these stars. Then, too, several plates were obtained of three stars of which spectra were found to be variable, and considerable time was spent upon the interpretation of these peculiar cases. The total number of plates measured for radial velocity for all purposes was 1,486. Thus measurement is keeping in fairly close touch with observation.

High dispersion spectra of Vega and the sun were secured to determine the absolute residual intensities of the absorption lines. Some preliminary measures have been made and a modification of the microphotometer, designed for the final accurate measurement has been constructed. Methods of observation have been devised also to eliminate the errors revealed in a critical study of the wedge method.

A revision has been made of the absolute intensities of the lines in the Orion nebula and N.G.C. 7027 and part of a paper on nebular spectra has been prepared.

The usual two-hour period was given, on Saturday evenings, to visitors when they are permitted to view celestial objects through the telescope. Large numbers avail themselves of the privilege, particularly during the tourist season when from 200 to 300 frequently visit the observatory during the period allowed. The completion of a good road to the Observatory seems to have increased its popularity as one of the "sights" of the city. The visitors' register shows entries from all over the world.

There were issued during the year seven publications, being numbers 5 to 11 inclusive of Volume III. Two more are ready for the press. The mailing list for our publications has been thoroughly revised.

## NATURAL RESOURCES INTELLIGENCE SERVICE

The activities of the service were considerably enlarged during the past year, due in a measure to the increased demand for, and the preparation and distribution of, information on Canada's recreational resources. The tourist trade, greatly encouraged by the publicity directed by the service in the various fertile channels of both United States and Canada, showed a marked increase. The number of motor vehicles entering Canada for periods ranging from one day to six months increased approximately 28 per cent.

Maps and recreational literature were compiled, published and distributed to all large organizations interested in the development of tourist traffic and included leading banks and hotels, chambers of commerce, touring bureaus, automobile clubs, golf clubs, daily newspapers and recreational periodicals. Illustrated lectures were supplied to schools and societies. Magazines and periodicals were furnished with articles and photographs illustrating Canada's attractions. Routes of travel were outlined for individual inquiries and every means employed to assist those who might wish to travel, settle or otherwise actively interest themselves in the Dominion.

### *General Information*

The work in connection with information on Canada's natural resources and recreational attractions carried on by this service, may be divided into two main classes: first, the building-up by research and co-operation of all available and accurate data, and second, its wide and systematic distribution in the most effective channels, by means of literature in various forms.

*Assembling of Information on Canada's Resources.*—In order that the service may function most efficiently as a central bureau of information on

Canada's natural resources, it is necessary to have readily available the most complete and up-to-date data that can be assembled. Prompt access to such data is provided by the Natural Resources Index, which is an outstanding feature of the service, and which has been steadily improved, and greatly added to from year to year. It is the only index system that undertakes to collect and incorporate complete information relating to the varied natural resources of the Dominion and to their main development features. This information is obtained from every reliable source, including printed reports of the various provincial and federal departments, corporation records, scientific and technical journals, reports of inquiries made by special commissions, universities, field surveys, etc. It is then consolidated into classes, indexed and recorded in permanent and readily accessible form. A large portion is placed on a very elaborate system of index maps, which indicate at a glance, the location and extent of the development of particular resources, the transportation facilities, and other factors affecting the feasibility of new development. The maintenance, improvement and additions thereto of both the card and map indices required a considerable amount of continuous detailed work during the past year.

Of the natural resources of Canada the land available for agriculture ranks first. While there are large tracts of fertile land in all parts of Canada, the greatest expanse of agricultural land is contained in the great plains of the Prairie Provinces. The public lands in these provinces are under the control of the federal Government and their settlement and development has been a special function of the Department of the Interior. In this work the Natural Resources Intelligence Service has played an important part through the issue of homestead maps indicating lands available for settlement, economic reports, cereal, elevator, physical and climatic and transportation maps. It has also made a survey of the privately-owned idle land situation, not only in the Prairie Provinces but in other parts of Canada, and has collected and published details respecting millions of acres of these lands, such as location, nature of soil, distance from railways, price, terms, etc. The many activities in connection with the land resources have been intended to show the opportunities that Canada offers in this regard and to assist the prospective settler in choosing a location suitable to his means and requirements.

During the year a minute survey was made, from all available sources, of the extent and location of agricultural land in Canada. This will give a general layout of Canada's resources in present and potential productive land and serve as a basis for systematic study of the economic value of this resource and its effect on Canadian development.

Many inquiries were received during the year for special information concerning settlement in Canada which could not be answered through the medium of published maps and reports. In such cases it was necessary to prepare additional material in order to furnish the information required.

Inquiries relative to fur resources and fur-farming have shown a large increase. These come, not only from Canada, but from the United States and countries in Europe as well. The demand for information regarding the various phases of muskrat farming has been particularly noticeable.

In anticipation of the evident interest of the public and the increasing demand for information in regard to Canada's resources of fur-bearing wild life and the raising of fur-bearing animals in captivity, a number of monographs have been prepared on Canadian fur-bearers and their domestication, including beaver, fisher, muskrat, mink, marten, raccoon, chinchilla rabbit, skunk, and blue fox. These bulletins contain data relative to description, habitat, production, trapping methods, breeding, feeding, ranch practice, pelt values, markets, manufacture, and various aspects of the economic and commercial importance of fur-bearers.

*Tourist Information.*—Canada's recreational resources are fast assuming a most important position among the revenue-producing industries of the country. The annual increase in tourist traffic indicates the growing interest which Americans as well as Canadians are taking in the attractions which Canada has to offer. Interest has been greatly stimulated through the efforts of the Department of the Interior in focussing attention on Canada as a tourists' holiday-land by various kinds of publicity. The Natural Resources Intelligence service has, during the past year, in co-operation with a majority of the larger Canadian and American organizations interested in the development of tourist traffic, assembled a very considerable amount of information in regard to the highways, canoe routes, fish and game, hunting, and scenic beauties of many particularly attractive areas of the country.

Motoring in Canada has become one of the chief recreational features and the increased annual registration of motor vehicles at the various Canadian ports of entry bespeaks volumes for Canada's improved highways and other facilities. Diligence in research and in collection and compilation of authentic information enabled the service to publish recreational maps of the Maritime Province areas indicating classified highways, hotel accommodation, camp sites, game and fish resources, deep-sea fishing and ferries, as well as other general information of interest and use to the tourist.

In order to meet the desire on the part of the American motoring public for general information concerning the Canadian highways, a sketch map of Canada and the United States on a scale of 100 miles to an inch was prepared and widely distributed. Upon this map were indicated, the main connecting highways between the two countries, together with the main inter-urban thoroughfares.

In order to comply in a measure at least with suggestions for even greater detail than could be shown on the 100-mile scale, a series of sectional road maps of Canada and the United States is now being prepared on scales varying from 25 to 33 miles to an inch. They will be known as the Atlantic, Great Lakes, Middle West and Pacific Sheets. These maps will not transgress the field of provincial or local organizations, to whom rightly belongs the publication of maps showing very detailed information.

Canoeing in the wilds, provides an attractive pastime for the urban dweller, and Canada with her innumerable lakes and streams offers an unlimited choice of every variety in this form of recreation. In order to comply with the large demand for information concerning canoe trips, the service has prepared detailed progressive descriptions of a number of selected routes, incorporating therein information respecting transportation to starting point, character of portages, distances, fishing and camp sites en route, etc. A map of the route on as large a scale as possible is available with each description. Information is also supplied with respect to customs and game regulations, camp equipment, outfitters, guides, etc.

Up to the present time tourist travel in Canada has largely taken place during the months of July and August. Data are now being assembled for the purpose of illustrating to the tourist, the interesting attractions, which Canada has to offer during the months of June and September, and in that way extending the tourist season considerably.

Winter sports in Canada are attracting increased attention and becoming decidedly popular. In this connection special material is being prepared and made ready for distribution to encourage their greater development.

*Distribution of Information.*—During the year approximately 327,800 copies of maps, reports, and pamphlets were distributed, 84,600 going to residents of the United States, 9,600 to Great Britain, 3,100 to other countries and 230,500 being distributed within the Dominion.

The large comparative Canadian distribution of printed matter was mainly due to requests from federal and provincial departments, and civic organizations for redistribution in other countries. Over 25,000 requests for information concerning the resources and recreational attractions received careful attention. The increase in the number of requests coming from foreign countries is of interest and importance.

Dissemination of information was further accomplished by furnishing specially prepared articles and illustrations to a wide range of publications including leading newspapers, and financial, commercial, technical and recreational periodicals.

The weekly news bulletin, issued in both English and French, and containing up-to-date items, relating to natural resource development and other commercial features was furnished to government offices and other institutions in many countries, including Great Britain, Australia, South Africa, Italy, Holland, Belgium, Norway, Ireland, West Indies, British Guiana, Argentina, Japan, Denmark, and the United States.

Radio broadcasting stations were utilized quite extensively by the service, for the transmission in brief of special commercial and resource data three times weekly.

### *Development Investigations*

The number of inquiries from interested manufacturers and business corporations, soliciting both detailed and general information on problems associated with Canada's raw products increased very appreciably during the past year. Although some of the inquiries may be answered by printed reports, economic maps, or other published material, there are many which cannot be dealt with in that manner, but require particular investigation. During the year over twenty-five hundred such inquiries received the necessary attention.

The result of the continuous demand for this class of information has made it necessary to undertake a definite program of constant investigation for the purpose of effecting a more intensive utilization of domestic raw products within the Dominion.

A basis for carrying on such investigations was developed from a systematic study of the trade of Canada. This survey indicated that approximately 275 different industries provided opportunities for thorough investigations. It was ascertained therefrom, that a number of these industries were capable of greater expansion, while others were not even active in Canada.

The prosecution of these investigations entailed a digest of information, concerning the location and extent of raw materials, transportation, domestic and foreign markets, tariffs, taxes, royalties, patents, processes, machinery, labour and all other such matter of special interest and importance to the industry under review.

Among the results of such investigations instituted and carried on during the past year might be mentioned the completion of a pamphlet on casein and its industrial uses, the preparation of bulletins on insulation in house construction, a complete analysis of the possibility of establishing a binder twine industry in Alberta, the determination of the feasibility of greater domestic production of argol, the publication of a mimeographed report on fish by-products, and a full inquiry into the possibilities of the manufacture of cod-liver oil, fish meal, and fish fertilizer.

Much of the investigatory work pursued by this service is conducted, and in some cases actually initiated, in co-operation with other branches of the public service.

### *Geographic and Economic Mapping*

The year's work of the Chief Geographer's office showed considerable progress in the geographic mapping of Canada. New editions of the Land District maps were issued, one for each of the nine districts. These maps are issued particularly for administrative use and for distribution by the western land offices. Nine sheets of the Standard Geographic map series were also published, as well as the General Map of Canada, on a scale of 60 miles to an inch, which was in course of preparation last year.

During the year considerable work was done in the preparation of several new sheets of the Standard Geographic series, and of one of the sections of the International Map of the World.

The work in economic, as distinct from geographic, mapping uses the latter maps as bases showing the nature and distribution of the country's resources, the extent of their development and a wide range of physical and economic data of aid in throwing light on the character and value of Canadian national property from a development standpoint. The increased demand for accurate and useful tourist information necessitated the preparation of a number of maps showing such information, and to which reference has been made previously in this report.

In addition to the preparation of maps for publication, the mapping facilities of the service were utilized by other branches of the department, by other departments of the federal Government, by many other organizations requiring economic maps. There has been an increasing interest in the study of economic geography, and the service has given every possible assistance to educational publishers, universities, newspapers and others, both in Canada and abroad, by furnishing maps and such other material as would be of use in carrying on these important studies as they relate to Canada.

### *Technical Plant*

The operation of this plant, comprising photographic laboratories, blueprinting, map-mounting, photostat, mimeograph and other technical facilities, continued to give prompt service to the Department of the Interior and to other departments which made use of it from time to time. In addition to being able to meet the departments' needs immediately, the plant continued to effect very substantial savings. While the plant is maintained primarily to meet the department's own requirements, it is used very extensively by other public services, there being very few departments of the federal Government which do not take advantage of these facilities in one form or another.

In this plant is maintained the photographic and lantern slide library. Lantern slides are made up into sets, and these along with lectures or lecture notes are loaned to educational and other institutions or organizations where they will be of assistance in the development of the natural resources of Canada. Specially prepared lectures were furnished on request to an increased number of church, school, and civic organizations. During the year 355 lectures were sent out, and were heard by audiences aggregating 126,400 persons. Photographic prints have been furnished to newspapers and other periodicals in increasing numbers for reproduction purposes. The photographic library now contains over 11,000 negatives and over 15,000 lantern slides.

## DETAILED Statement of Surveyed Areas in Manitoba, Saskatchewan and Alberta, January 1, 1926

| — | Manitoba | Saskatchewan | Alberta | Total |
|---|---|---|---|---|
| | acres | acres | acres | acres |
| Area under homesteads (including military homesteads) | 8,000,600 | 28,545,000 | 18,846 900 | 55,392,500 |
| Area under pre-emptions, purchased homesteads, sales, half-breed scrip, bounty grants, special grants, etc | 4,240,200 | 6,989,500 | 3,660,000 | 14,889,700 |
| Area granted to railway companies | 3,566,997 | 15,177,063 | 13,120,014 | 31,864,074 |
| Area granted to Hudson's Bay Company | 1,266,100 | 3,316,400 | 2,288,000 | 6,870,500 |
| Area of School Land Endowment (1/18 of area surveyed in sections) | 1,637,700 | 3,943,800 | 3,759,800 | 9,341,300 |
| Area sold subject to reclamation by drainage | 89,642 | 50,916 | 37,250 | 177,808 |
| Area sold under irrigation system | ..... | 77,000 | 987,440 | 1,064,440 |
| Area under timber berths (leased) | 1,025,300 | 574,500 | 1,255,900 | 2,855,700 |

## REPORT OF THE CONTROLLER OF THE LAND PATENTS BRANCH AND REGISTRAR OF DOMINION LANDS PATENTS, N. O. COTE

With statements, A to K, in relation thereto

### LETTERS PATENT

During the fiscal year ended March 31, 1926, there were 5,484 letters patent issued, covering a total area of 803,733 acres, divided according to provinces as follows:—

| Province | Patents | Acres |
|---|---|---|
| Manitoba | 946 | 135,293 |
| Saskatchewan | 2,669 | 401,952 |
| Alberta | 1,617 | 243,616 |
| British Columbia | 223 | 22,382 |
| Yukon Territory | 18 | 473 |
| Northwest Territories | 11 | 17 |
| Totals | 5,484 | 803,733 |

The various kinds of grants are summarized below and are later dealt with in detail in statements A to G, inclusive.

| Grants | Patents | Acres |
|---|---|---|
| Homesteads | 1,858 | 284,289 |
| Sales | 774 | 103,674 |
| Pre-emptions | 467 | 73,732 |
| Purchased homesteads | 68 | 9,441 |
| Railways | 59 | 662 |
| Special grants | 672 | 95,771 |
| Military bounty grants | 2 | 320 |
| Northwest halfbreed grants | 4 | 480 |
| Licenses of occupation | 6 | 14 |
| Soldier grants | 385 | 56,228 |
| Hudson's Bay Company grants | 1,189 | 179,122 |
| Totals | 5,484 | 803,733 |

There was an increase of 1,180 letters patent and an increase in the area patented of 180,971 acres, as compared with the previous year.

There are recorded in the Land Patents Branch 468,409 letters patent, aggregating 103,608,793 acres, which have been issued since May, 1873.

### LANDS DISPOSED OF

Four thousand six hundred and eighty-five (4,685) homestead entries were granted, aggregating an approximate area of 749,600 acres, made up by provinces as follows: Manitoba, 616; Saskatchewan, 2,363; Alberta, 1,556; British Columbia 150; total, 4,685.

There was an increase of 1,032 on the number of homestead entries granted, as compared with the previous year.

By land agencies the 4,685 homestead entries are made up as follows:—

*Manitoba.*—Dauphin, 377; Winnipeg, 239; total, 616;

*Saskatchewan.*—Moose Jaw, 855; Prince Albert, 1,508; total, 2,363.

*Alberta.*—Calgary, 176; Edmonton, 1,010; Grande Prairie, 111; Lethbridge, 54; Peace River, 205; total, 1,556.

*British Columbia.*—(Railway Belt and Peace River Block). Grande Prairie, 30; Kamloops, 46; New Westminster, 38; Peace River, 7; Revelstoke, 29; total, 150.

The 4,685 homestead entries represented 10,841 persons, as compiled from information obtained from each entrant. Of these entries 1,381 were made by residents of the several provinces of the Dominion; 696 by persons who had previously obtained homestead entries, which had been cancelled by default or at the request of the entrant in order, in most cases, that he might enter for

other lands; 553 were made by persons from the British Isles; 842 by persons from the United States; 359 by Austrians; 74 by Hungarians; 228 by Russians and Finns; 92 by Norwegians; 93 by Swedes; 72 by Germans; 18 by Frenchmen; 18 by Belgians; and the remaining 259 were made up of citizens of various other countries.

There were 576 soldier grant entries made during the year, aggregating approximately 92,160 acres, made up as follows:—

| | Number of entries | Acres |
|---|---|---|
| Manitoba | 70 | 11,200 |
| Saskatchewan | 296 | 47,360 |
| Alberta | 183 | 29,280 |
| British Columbia (Railway Belt and Peace River Block) | 27 | 4,320 |
| Totals | 576 | 92,160 |

By land agencies the soldier grants were as follows:—

*Manitoba.*—Dauphin, 44; Winnipeg, 26; total, 70.

*Saskatchewan.*—Moose Jaw, 137; Prince Albert, 159; total, 296.

*Alberta.*—Calgary, 30; Edmonton, 95; Grande Prairie, 14; Lethbridge, 14; Peace River, 30; total, 183.

*British Columbia.*—(Railway Belt and Peace River Block).—Grande Prairie, 13; Kamloops, 8; New Westminster, 4; Revelstoke, 2; total, 27.

CANCELLED ENTRIES

There were cancelled 5,511 entries as follows:—

| — | Manitoba | Saskatchewan | Alberta | British Columbia |
|---|---|---|---|---|
| Homesteads | 746 | 1,312 | 1,211 | 131 |
| Soldier grant entries | 111 | 209 | 182 | 8 |
| Pre-emptions | ..... | 863 | 613 | ..... |
| Purchased homesteads | ..... | 56 | 24 | ..... |
| Sales | 3 | 21 | 19 | 2 |
| Totals | 860 | 2,461 | 2,049 | 141 |

SALES

Two hundred and twenty-three sales were made during the fiscal year 1925-1926 for 9,218 acres, with an average for each sale of about 41⅓ acres.

REVENUE

The sum of $442,020.52, including $188,913.67 interest on deferred payments, was received on account of purchased homesteads, pre-emptions and ordinary sales, showing an increase of $58,300.27, as compared with the payments received during the previous year.

The sum of $100,876.11 has also been received for entry fees, improvements and sundries, making a total revenue for the fiscal year of $542,896.63.

REFUNDS

There were 542 refunds, amounting to $29,376.56 as follows:—

| | |
|---|---|
| 309 refunds—Value of improvements collected on cancelled homesteads | $ 17,945 27 |
| 215 refunds—Overpayments on sales; and of moneys on account of purchased homesteads and pre-emption sales, entries for which had been cancelled | 11,431 29 |
| Total | $ 29,376 56 |

Out of the $11,431.29 above mentioned, the sum of $5,482.64 was refunded to the Soldier Settlement Board of Canada in connection with pre-emptions and purchased homesteads converted into soldier grant entries and the sum of $2,815.08 was refunded to entrants in connection with cancelled pre-emptions and purchased homesteads.

NEWLY SURVEYED LANDS THROWN OPEN TO HOMESTEAD ENTRY

Newly surveyed lands comprised in nine townships were made available for homestead entry in the following land agencies:—

*Alberta.*—Edmonton in 5 townships; *Saskatchewan.*—Prince Albert in 4 townships; total, 9.

## REPORT OF THE CONTROLLER OF SCHOOL LANDS, W. T. ROLLINS

During the fiscal year ended March 31, 1926, school lands were disposed of by public auction and private sales in the provinces of Manitoba, Saskatchewan, and Alberta, as follows:—

### MANITOBA

| How disposed of | Area in acres | Value $ cts. | Average per acre $ cts. |
|---|---|---|---|
| School sites | 3·00 | 30 00 | 10 00 |
| Cemetery sites | 4·00 | 40 00 | 10 00 |
| Public auction | 25·00 | 175 00 | 7 00 |
| | 32·00 | 245 00 | 7 66 |

### SASKATCHEWAN

| | | | |
|---|---|---|---|
| Railway companies | 223·824 | 2,752 25 | 12 30 |
| School sites | 19·00 | 220 00 | 11 58 |
| Church sites | 3·00 | 30 00 | 10 00 |
| Cemetery site | 2·00 | 20 00 | 10 00 |
| Reservoir sites | 2·17 | 49 29 | 22 71 |
| Soldier settlement | 159·00 | 3,180 00 | 20 00 |
| Auction sale | 137·323 | 961 26 | 7 00 |
| Dried up areas | 16·40 | 82 00 | 5 00 |
| | 562·716 | 7,294 80 | 12 96 |

### ALBERTA

| | | | |
|---|---|---|---|
| Railway companies | 192·68 | 3,762 53 | 19 53 |
| School sites | 18·71 | 476 00 | 25 44 |
| Cemetery sites | 2·00 | 30 00 | 15 00 |
| Dried up areas | 33·06 | 165 30 | 5 00 |
| Surface of mining rights | 24·60 | 172 20 | 7 00 |
| | 271·05 | 4,606 03 | 16 99 |

After making the necessary deductions for cancelled sales and adjustments in regard to alterations in areas, the approximate net areas and values of school lands and town lots disposed of to March 31, 1926, were as follows:—

| Province | Area in acres | Value | Average per acre | Value of town lots |
|---|---|---|---|---|
| | | $ cts. | $ cts. | $ cts. |
| Manitoba | 648,389·97 | 6,249,785 80 | 9 64 | 5,165 00 |
| Saskatchewan | 1,233,466·1248 | 20,144,540 23 | 16 33 | 12,571 00 |
| Alberta | 797,904·653 | 10,998,304 88 | 13 78 | 39,380 00 |

The number of permits and leases issued, the number of leases in good standing, and the combined revenue derived therefrom for the provinces of Manitoba, Saskatchewan, and Alberta for the fiscal year were as follows:—

| — | Permits issued | Leases issued | Leases in good standing | Revenue derived |
|---|---|---|---|---|
| | | | | $ cts. |
| Grazing | 6,250 | ..... | ..... | 118,471 21 |
| Coal | ..... | 3 | 88 | 24,657 42 |
| Petroleum and gas | ..... | 343 | 593 | 31,495 53 |
| Hay | 2,171 | 3 | 9 | 5,382 83 |
| Cultivation | 1,355 | ..... | ..... | 75,575 44 |
| Timber | 258 | ..... | ..... | 4,186 85 |
| Special | ..... | 4 | 43 | 1,703 99 |

*Registration Fees.*—During the fiscal year 303 assignments of sales and leases were registered, comprising lands in the provinces of Manitoba, Saskatchewan, and Alberta. The registration fees amounted to $972.44.

REVENUE AND EXPENDITURE STATEMENTS

The total net revenue collected for the fiscal year was as follows:—

| | $ cts. |
|---|---|
| Manitoba | 74,034 77 |
| Saskatchewan | 1,286,514 08 |
| Alberta | 681,721 42 |
| Total | 2,042,270 27 |

The revenues collected for the fiscal year, (less principal moneys and less expenditure) and paid over to the provinces of Manitoba, Saskatchewan, and Alberta, were as follows:—

| Province | Revenue other than principal moneys | Expenditure | Amount paid to province |
|---|---|---|---|
| | $ cts. | $ cts. | $ cts. |
| Manitoba | 34,622 36 | 13,932 47 | 20,689 89 |
| Saskatchewan | 582,902 31 | 39,616 16 | 543,286 15 |
| Alberta | 372,478 93 | 26,012 57 | 346,466 36 |

The balance standing to the credit of the School Lands Fund for each province as on March 31, 1926, and the interest paid on the investments for the fiscal year 1925-1926 were as follows:—

| Province | Total amount at credit of fund | Amount invested in debenture stock | Interest paid on investments |
|---|---|---|---|
| | $ cts. | $ cts. | $ cts. |
| Manitoba | 5,820,540 17 | 5,820,000 00 | 289,275 00 |
| Saskatchewan | 14,307,495 34 | 14,307,000 00 | 681,675 00 |
| Alberta | 7,489,475 58 | 7,489,000 00 | 360,150 00 |

Statements herewith lettered A, B, and C respectively, show the revenue collected from each of the provinces of Manitoba, Saskatchewan and Alberta for the fiscal year, duly classified.

Statements herewith lettered D, E, and F respectively, show the balance standing to the credit of the School Lands Fund for each province as on March 31, 1926, after deducting amounts invested in debenture stock as provided for by Order in Council.

## REPORT OF THE SUPERINTENDENT, MINING LANDS BRANCH, H. H. ROWATT

The revenue of the Mining Lands Branch, during the fiscal year 1925-26 shows an increase of $144,255.99 and amounted to $748,787.33. The sources from which it was derived were fees, rentals and royalties collected for mining rights, the property of the Crown, disposed of under lease or other form of terminable grant.

Expenditures incurred in the actual development of petroleum and natural gas rights, acquired under lease, may, under the regulations, be accepted on account of rental, and under this provision rentals due the Crown, and which should otherwise have been paid in cash, amounting to $361,018.12, were satisfied by such expenditures, and so reduced the revenue of the branch to that extent.

The total revenue in cash, together with the expenditures accepted by the Department of the Interior in lieu of rental on petroleum and natural gas, coal and tar-sand leases, amounted to $1,127,628.40 during the year.

Statements lettered A and B, showing in different forms how the mining revenue is made up, follow this report. The statement lettered A shows the total revenue, and the statement lettered B shows the revenue collected at each agency in the western provinces and territories including the Yukon.

That portion of the revenue of the Yukon Territory derived from mining rights only, including the export tax on gold, amounted to $60,448.14 for the fiscal year.

The report for the fiscal year from the Gold Commissioner of the Yukon Territory, dealing with mining in that territory, is submitted and follows this report.

*Petroleum and Natural Gas.*—There are now in force 6,409 petroleum and natural gas leases affecting Dominion lands, and embracing a total area of 942,771.60 acres, distributed as follows: In Manitoba, 151 leases, comprising 40,924.95 acres; in Saskatchewan, 59 leases, comprising 14,597.20 acres; in Alberta, 5,816 leases, comprising 819,154.69 acres; in British Columbia, 369 leases, comprising 57,982.13 acres; and in the Northwest Territories, 12 leases, comprising 9,312.63 acres, and 2 permits comprising 800 acres. The total area under permit and lease in the Northwest Territories is 10,112.63 acres.

The total number of petroleum and natural gas leases issued during the fiscal year was 2,665, comprising 215,828.35 acres, and the total revenue derived from petroleum lands during the same period amounted to $251,536.81.

The total number of leases on Dominion lands which have been issued under the provisions of the Petroleum and Natural Gas Regulations is 31,065, and the total revenue derived from this source since the beginning was $4,285,-325.90. The total expenditure applied in lieu of rental during the same period was $2,483,994.63.

Wells to the number of 335 have been drilled, on lands acquired under the regulations, for the discovery of petroleum and natural gas, of which number 113 have produced natural gas, and in 51 of these oil in limited quantities has been obtained. Owing to the absence of a market within reasonable piping distance, it has not been found possible to utilize all of the natural gas which is at present being produced. A number of the cities and towns in the province of Alberta, including Calgary, Edmonton, Lethbridge and Medicine Hat, have been furnished with adequate supplies of gas for domestic and industrial purposes.

Operations for the discovery of oil are being actively prosecuted in the Turner Valley field, about forty miles southwest of Calgary; in the Wainwright field, lying southeast of Edmonton; and in other parts of Alberta, as well as in Saskatchewan and Manitoba. An increased production of oil is being obtained from the Royalite Well No. 4, in the Turner Valley field, and other incompleted wells in the same vicinity show indications of being commercial producers.

In the Wainwright field eighteen wells have been drilled, nine of which are producing gas in considerable quantity, and in eight of these oil in limited quantity has been obtained. Two of these wells show indications of commercial production.

*Coal.*—The regulations for the sale of coal mining lands were withdrawn a number of years ago, and all former sales made under the provisions of those regulations have now been completed. The total revenue collected from the sale of coal mining lands was $1,565,748.74.

*Coal Leases.*—The total number of coal mining leases in force at the close of the fiscal year was 586, comprising a total area of 229,641.37 acres, distributed as follows: In Alberta, 490 leases, comprising 207,935.37 acres; in Saskatchewan, 83 leases, comprising 2,836 acres; in British Columbia, 11 leases, comprising 18,730 acres; in the Yukon Territory, 1 lease, comprising 40 acres; and in the Northwest Territories 1 lease, comprising 100 acres.

The total number of coal mining leases issued during the year was 76, comprising 29,068.30 acres. The total revenue collected during the year for rental of coal mining rights was $175,548.58.

*Royalty on Coal.*—Under the regulations governing the issue of leases to mine coal, the royalty is fixed at five cents per ton of 2,000 pounds and is calculated on the merchantable output of the mine.

The following is a statement showing the amount collected on account of royalty on coal mined from lands in the western provinces, the Northwest Territories and the Yukon Territory, respectively, during each year since the royalty provisions of the regulations became effective:—

| Year | Alberta | Saskatchewan | British Columbia | Yukon | Northwest Territories |
|---|---|---|---|---|---|
| | $ cts. | $ cts. | $ cts. | $ cts. | $ cts. |
| 1903–04 | 56 90 | Nil | Nil | 22 40 | Nil |

| 1920–21 | 190,545 80 | 2,703 41 | " | " | " |
| 1921–22 | 185,436 88 | 3,309 86 | " | " | " |
| 1922–23 | 171,723 83 | 3,035 18 | " | " | " |
| 1923–24 | 210,389 53 | 1,689 45 | " | " | " |
| 1924–25 | 148,979 10 | 2,421 11 | 7 50 | " | 1 50 |
| 1925–26 | 188,277 94 | 3,024 94 | Nil | " | 2 00 |

The total revenue derived from coal mining lands on account of rentals, royalties and application fees, during the fiscal year, amounted to $369,038.46.

*Quartz and Placer Mining.*—During the fiscal year 1,297 entries for quartz and 28 entries for placer mining claims were granted by the mining recorders in Manitoba, Saskatchewan and Alberta. In the Yukon Territory, during the fiscal year, 181 quartz mining claims were granted, and 943 renewals were issued; the revenue derived therefrom amounted to $6,523.74. During the same period 36 entries for placer mining claims, 108 relocations and 2,482 renewals were recorded in that territory, the revenue from which amounted to $26,260.

Final leases have been granted for 638 quartz mining claims, comprising a total area of 37,486.48 acres. The total number of quartz mining leases issued during the fiscal year was 170, comprising 6,876.15 acres, and the total revenue derived from rentals during the year was $7,552.65.

The concentration mill installed in the Mayo-Keno district of the Yukon Territory, and which was completed in January, 1925, has since been continuously operated with marked success. The mill has a capacity of 120 tons of ore daily, with a recovery in concentrates of about eight tons, carrying high values in silver and lead.

The development of lode mining in central and northern Manitoba is progressing favourably. Companies of recognized financial standing have secured options on groups of claims in that part of the province, and are engaged in making comprehensive tests with a view of undertaking large scale mining operations.

*Quarrying and Clay.*—The number of leases now in force, issued under the provisions of the Quarrying Regulations, is 183, comprising a total area of 6,261.25 acres, distributed as follows: In Manitoba, 60 leases, comprising 1,587.98 acres; in Saskatchewan, 19 leases, comprising 604.47 acres; in Alberta, 59 leases, comprising 2,699.68 acres; and in British Columbia, 45 leases, comprising 1,173.97 acres.

The total revenue collected during the fiscal year on account of quarrying and clay leases, including application fees, amounted to $7,087.50.

*Alkali.*—The Alkali Regulations apply to natural accumulations of soluble mineral salts, comprising for the most part sodium and magnesium sulphates found in a comparatively pure condition in certain of the sloughs and shallow lakes of southern Saskatchewan. Under the provisions of these regulations 14 leases have been granted, comprising a total area of 7,472 acres, and the revenue derived from this source during the fiscal year amounted to $935.40, which includes the sum of $176.61, received for royalty.

*Royalty on Gold mined in the Yukon Territory.*—The total amount collected up to March 31, 1926, for royalty on gold, the output of placer mining claims in the Yukon Territory, after deducting the exemption at one time allowed under the regulations, was $4,908,707.52, of which amount $21,995.50 was collected during the last fiscal year. For the purpose of estimating royalty the gold is valued at $15 an ounce, which is below its real value.

Assuming that gold on which royalty has been paid has an average value of $20 an ounce, the value of gold produced from placer mining operations in the Yukon Territory up to March 31 last might be placed at $164,900,083.

*Dredging.*—Three leases to dredge for minerals in the beds of rivers in the Yukon Territory are now in force, covering a total river stretch of 14.43 miles. The total revenue derived from this source up to March 31, 1926, amounted to $201,964.32, of which amount $144.30 was collected during the fiscal year just closed. These dredging leases comprise portions of the bed of the Klondike river.

For the purpose of gold recovery there are at present three dredges engaged in mining in the Yukon Territory, all of which are being operated by hydro-electric motive power.

Thirteen leases to dredge for minerals in the submerged beds of rivers in the provinces of Saskatchewan and Alberta are now in force, covering a total frontage of 62 miles. Of these leases, 12 are in Alberta and cover 55 miles, and one is in Saskatchewan, covering the remaining 7 miles. The total revenue derived from this source up to March 31, 1926, amounted to $53,499.37, of which amount $620 was collected during the past fiscal year.

*Hydraulic Mining.*—The regulations for the disposal of hydraulic mining locations in the Yukon Territory were withdrawn by an Order in Council dated February 4, 1904. The leases then in force were not affected by such withdrawal. There are still 5 hydraulic mining locations held under lease, comprising a total area of 15.03 square miles. Rentals, amounting to $167,662.82, have been collected on account of such locations, and the amount paid on this account during the fiscal year was $2,265.

*Water Rights.*—There are now in force in the Yukon Territory 486 grants to divert water for mining purposes under the provisions of the Yukon Placer Mining Act. These grants aggregate a total of 115,682 miners' inches.

*Tar-Sands.*—The total revenue derived from the disposal of tar-sand rights amounted to $40,492.91. There are 3 leases in force, comprising a total area of 3,643.20 acres, in the province of Alberta. Research work is still being conducted for the discovery of the most efficient method for the commercial recovery of oil and other hydro-carbons from these sands. The revenue for the current year derived from this source amounted to $143.84, which includes the sum of $19.46 received for royalty.

REPORT OF THE GOLD COMMISSIONER, DAWSON, YUKON TERRITORY, REGARDING MINING

*Placer Gold Mining.*—The amount of placer gold mined during the year on which royalty export tax was paid was 58,654.60 ounces, which was in excess of the previous year, export tax having been paid on 41,697.33 ounces in 1924-25.

*Yukon Gold Company.*—This company operated seven hydraulic mines at the following points: Adams Hill, King Solomon, Oro Fino Hill, Trail Gulch, Lovett Right Limit, Gold Hill and Monte Cristo, and a total of 367,700 cubic yards of material was handled, using 163,290 miners' inches of water. The daily averages of men employed during the mining season (April to October) were as follows: hydraulic mines, 45; ditches, 20; otherwise employed, 20; total, 85.

*Burrall and Baird, Limited.*—This company operated Dredge *Canadian No. 2* in the Klondike valley on Hydraulic Mining Lease No. 18, approximately three miles below Bear Creek Camp. Dredging was discontinued on December 22, and during the season 1,842,553 cubic yards of gravel and bedrock were dredged.

Renewal fees for Hydraulic Lease No. 18, and Dredging Leases Nos. 23, 24 and 25 were paid. Renewal grants for 136 placer mining claims, the property of the company, or its subsidiaries, the Dago Hill Mining Company, Limited, and The Deepvale Mining Company, Limited, were taken out.

Auxiliary to the field operations of this company are the machine shop, electric and oxy-acetylene welding shop, electric repair shop, mess house and stable at Bear Creek. From April 1 to November 30, an average of 50 men was employed.

*The New North West Corporation, Limited.*—This company and its subsidiaries, the Dominion Mining Company, Limited; the Big Creek Mining Company, Limited; the Calder Mining Company, Limited; and the Sulphur Mining Company, Limited, took out renewal grants for 956 mining claims during the year. Two dredges were operated by the company. Dredge *North West No. 1* commenced digging on August 12 on Creek Claim No. 1, below Lower Discovery, Dominion Creek, and was shut down on October 22 on No. 3, above Lower Discovery, having dredged 232,767 cubic feet of gravel and bedrock. Seventy per cent of the ground dredged was frozen and was thawed by artificial methods.

Dredge *North West No. 2* commenced digging on May 31 on Creek Claim No. 236, below Lower Discovery, on Dominion Creek; 412,082 cubic yards of gravel and bedrock were treated and the dredge closed down on October 26 on Creek Claim No. 240, below Lower Discovery. The ground worked was frozen throughout and was thawed by the water process. The ditches constructed under Grants Nos. 9024 and 9025 were maintained in good repair and furnished water for thawing the ground ahead of the dredge.

This company operated the hydro-electric power plant at the North Fork of the Klondike river continuously throughout the year, and generated a total of 6,080,600 K.W.H. Power was furnished to Burrall and Baird, Limited, to operate its dredge and various enterprises; to the subsidiaries for all their varied operations; to The Dawson Electric Light and Power Company, Limited, for lighting the city of Dawson; and to the Dawson City Water and Power Company, Limited, to heat and pump the water furnished to the city. The sixty miles of transmission lines connecting the power plant with the substations were maintained in good condition. An average of one hundred men was employed by this company from May 1 to October 31.

*Other Placer Operations.*—In addition to what may be termed the large scale operations referred to above, many individuals and miners working in partnership, were engaged in placer mining throughout the various parts of the Territory, and on the whole had a successful season.

*Lode Mining*—Dawson District.—There have been no new developments in this district during the year, except that the Lone Star Mine on Victoria gulch after some years of idleness recommenced operations during last summer, and

uncovered a rich vein of gold quartz. It is the intention of this company to do a considerable amount of work next summer and if possible resume shipments of ore.

A few claims have been Crown granted on Williams creek, and a large number of claims on the Indian River conglomerate and on the Twelve Mile are being held, though but little development work has been done.

Mayo District.—Keno Hill still continues to be the principal producer, and it has been proved that ore values continue with depth. The Treadwell Yukon Company, Limited, is the largest producer and will ship some 3,000 tons this season, of which about 2,500 tons are concentrates representing about 40,000 tons mined. The mill which was completed last summer has been working to full capacity and has treated ore for other mines in addition to the company's own. This has been of great assistance to the smaller operators who have thus been enabled to continue development work with the proceeds. In addition to this company, a number of smaller operators are also shipping considerable high grade ore.

Development continues on Galena hill, particularly on the properties of Settlemier and Bermingham, the largest producers on the hill, and it is expected that about 2,000 tons will be shipped.

An important discovery of high grade ore has also been made on Sourdough hill.

A representative of the Consolidated Mining and Smelting Company of Canada, Limited, of Trail, B.C., visited the Mayo district last summer. He returned again this spring and has been making an examination of the Beaver River area, and a crew of men will be employed this summer in prospecting and drilling.

The territorial assayer at Keno has made over 1,600 assays from various localities in the territory, the majority of which show very high values amounting in one selected sample to upwards of $11,000 per ton.

On the whole the outlook for lode mining in Yukon presents a most encouraging prospect.

*Coal.*—The Five Fingers Coal Company operated their mine at Tantalus Butte during the year, and shipped a considerable tonnage to Dawson.

STATEMENT A—Statement of Receipts on account of Coal and Minerals in the Western Provinces and Territories for the fiscal year

| | |
|---|---|
| Gold export tax | $ 21,995 50 |
| Free certificates, export of gold | 9 00 |

| Total | $ 748,787 33 |

## REPORT OF THE CONTROLLER, TIMBER AND GRAZING LANDS BRANCH, B. L. YORK

The revenue derived from timber, grazing, and hay lands during the fiscal year which ended March 31, 1926, amounted to $1,109,013.05. This is an increase of $150,876.43 over the revenue derived during the previous fiscal year.

The largest amount received on account of timber was from the New Westminister agency, the revenue including approximately $47,000 from bonuses, $246,000 from royalty, and $60,000 from rental and permit dues. The timber revenue of the Edmonton agency was over $172,000, due in a large measure to the numerous fire-killed permit berths granted, by means of which not only has the Government derived considerable revenue, but large areas of burnt-over lands are being cleaned up. In the Prince Albert agency there was an increase of $20,000. This is a similar case where the granting of numerous fire-killed and other small berths has produced revenue, and been the means of cleaning up tracts of small areas of timbered lands. These remarks also apply to the Winnipeg and Calgary agencies, where the increases were approximately $20,000 and $10,000 respectively.

There was collected on account of fire-guarding dues an increase of some $10,000.

As to grazing and hay accounts, the revenue for the past year showed an increase of some $20,000, the largest collections being made at the Moose Jaw and Lethbridge agencies. The issue of new grazing leases exceed by 300 those issued during the previous fiscal year.

In regard to the quantity of timber manufactured, there were increases of 1,260,000 lineal feet of telegraph and telephone poles; 750,000 lineal feet of mining timber; and 23,000 cords of shingle bolts.

It will be seen from the statement below that the total revenue of the branch in the fiscal year ending March 31, 1916, was $493,971.12, and that it has steadily increased to $1,109,013.05. This shows an increase of about 125 per cent for the past ten years.

## REVENUE

| Year ending March 31 | Revenue |
|---|---|
| 1916 | $ 493,971 12 |
| 1917 | 534,381 75 |
| 1918 | 569,607 39 |
| 1919 | 516,938 53 |
| 1920 | 687,401 83 |
| 1921 | 807,119 23 |
| 1922 | 723,322 81 |
| 1923 | 886,064 37 |
| 1924 | 883,726 90 |
| 1925 | 958,136 62 |
| 1926 | 1,109,013 05 |

### *DETAILS FOR FISCAL YEAR 1925–1926*

| | | |
|---|---|---|
| *Timber—* | | |
| Bonus under license | $ 78,535 11 | |
| Rent under license | 66,531 28 | |
| Royalty under license | 475,177 76 | |
| Permit fees, dues and rental | 269,690 12 | |
| Seizure dues | 10,624 79 | |
| License fees | 1,176 00 | |
| Scaling fees | 14,177 70 | |
| Scale books | 33 00 | |
| Total for timber | | $ 915,945 76 |
| *Fire tax* | | 28,805 15 |
| *Grazing, Hay, etc.—* | | |
| Grazing | $ 141,112 90 | |
| Hay | 11,008 01 | |
| Registration fees | 1,320 01 | |
| Improvements | 10,821 22 | |
| Total for grazing and hay | | $ 164,262 14 |
| Total revenue | | $ 1,109,013 05 |

The following statement shows the revenue from the Crown timber agencies, and the number of berths operated:—

| — | Revenue | Number of berths under license | Number of berths under permit |
|---|---|---|---|
| | $ cts. | | |
| Calgary | 77,267 22 | 12 | 13 |
| Edmonton | 177,129 39 | 43 | 189 |
| Prince Albert | 116,058 25 | 42 | 73 |
| Winnipeg | 121,784 31 | 24 | 71 |
| Kamloops | 63,242 54 | 21 | 7 |
| New Westminster | 377,185 82 | 70 | 7 |
| Revelstoke | 41,426 97 | 14 | 16 |

## TIMBER

The returns of operations show the quantities of lumber and other material manufactured and marketed, under license and permit to be as follows:—

| Material | Under license | | Under permit | |
|---|---|---|---|---|
| | Manufactured | Marketed | Manufactured | Marketed |
| Lumber (feet b.m.) | 358,216,494 | 318,952,155 | 44,537 616 | 47,884,741 |
| Laths (pieces) | 35,699,238 | 33,970,111 | 882,598 | 907,848 |
| Railway ties (number) | 288,788 | 279,566 | 670,955 | 1,835,836 |
| Telephone poles (lin. ft.) | 2,913,310 | 2,848,821 | 69,557 | 69,557 |
| Mining timber (lin. ft.) | 751,127 | 772,474 | 254,027 | 229,061 |
| Piling (lin. ft.) | 266,644 | 256,594 | 33,419 | 38,187 |
| Cordwood (cords) | 9,303 | 8,686 | 7,842 | 8,605 |
| Slabs (cords) | 13,677 | 15,679 | 16 | 16 |
| Pulpwood (cords) | 581 | 588 | 1,951 | 1,778 |
| Shingles (pieces) | 59,000 | 59,000 | 549,000 | 235,500 |
| Shingles Bolts (cords) | 26,884 | 27,381 | 1,642 | 1,642 |
| Fence posts (number) | 170,187 | 187,667 | 110,815 | 103,828 |
| Fence rails (number) | 3,825 | 3,825 | 200 | 200 |
| Boxwood (cords) | 47 | 47 | | |
| Lath bolts (cords) | ..... | ..... | 3,390 | 3,390 |

Where the sales product is in excess of the quantity shown as manufactured, such excess has to be considered as being part of the material which had been manufactured in the previous fiscal year, and had remained on hand at the expiration of that year and carried over to the fiscal year 1925-26.

The areas of lands held under license and permit in the provinces of Manitoba, Saskatchewan, Alberta, and British Columbia, are as follows:—

| Province | Square miles under license | Square miles under permit |
|---|---|---|
| Manitoba | 1,003 34 | 1,316 67 |
| Saskatchewan | 795 90 | 101 79 |
| Alberta | 1,634 42 | 327 86 |
| British Columbia | 1,625 77 | 26 24 |
| Totals | 5,059 43 | 1,772 56 |

During the year there were 228 berths granted, as follows: 13 license berths, 33 portable sawmill berths, 82 cordwood berths, 87 fire-killed berths, and 13 permit berths.

### GRAZING

The number of grazing leases in force during the year was 7,974, comprising an area of 6,048,116 acres made up as follows: Manitoba, 44,593 acres; Saskatchewan, 2,899,680 acres; Alberta, 2,777,615 acres; British Columbia, 326,228 acres.

During the year there were 1,628 new leases issued.

## REPORT OF THE SUPERINTENDENT, ORDNANCE, ADMIRALTY, AND RAILWAY LANDS BRANCH, JOS. P. DUNNE

The work of the branch in respect to Ordnance and Admiralty lands as well as to Railway lands and also in respect to the recording of Orders in Council relating to the Department of the Interior has been greater this year than formerly.

*Ordnance and Admiralty Lands.*—The policy of the branch in respect to Ordnance and Admiralty lands has been to bring as many of the properties of the branch as possible to a state of revenue production.

The number of leases placed on the books in the last fiscal year was 75. The total value of the properties now under lease, estimated on the basis of the rental being 6 per cent of the valuation, is $80,344 of which the valuation added during the year was about $23,300.

Every effort is made to have properties placed under lease rather than to dispose of them outright. The price realized for land sold however was $15,095.90 during the year.

The combined acreage of Ordnance Lands under the direct administration of this branch is not large but nevertheless many of the parcels are very valuable. These parcels are being examined and surveyed one by one and as each report of the examiner or surveyor is received, action is taken to place the parcel under rental, or if already rented, to adjust the rental where possible to the greater advantage of the Department.

Surveys and investigations were carried out in Ontario at Turkey Point, Barbet Point and Mohawk bay on lake Erie, and St. Joseph island in the St. Mary river. In Quebec certain surveys were made in Quebec city and at Farnham. Initial survey operations were instituted in the Maritime Provinces at St. John, New Brunswick; and Shelburne, Nova Scotia.

Investigations and negotiations were also made along the Rideau canal, and at Hamilton and Port Maitland, Ontario; at Levis, Quebec; at Grand Falls, New Brunswick; and at Halifax, Nova Scotia.

Many records have been searched in tracing the titles to the Ordnance Lands in British Columbia, which have been transferred to this Department. As a result of this a considerable amount of negotiation and correspondence has developed between this office and those of other departments in Ottawa as well as with the Provincial and Imperial Government officials. Action has also been instituted which it is expected will result in clearing the titles to certain properties which had been unlawfully appropriated before the lands were placed under the control of this Department.

*Railway Lands.*—During the year the work in respect to Railway lands was carried on as usual under the various divisions of subsidy lands, right of way, and government townsites.

Besides the negotiations with the railway companies in reference to lands required for right of way for new branch lines, the chief business has been in respect to the balancing of the land subsidy accounts in which work considerable progress has been made.

Some lands formerly reserved for railway subsidy purposes which are not now required by the railway companies, have been thrown open for settlement.

*Orders in Council.*—The number of Orders in Council passed pertaining to the Department of the Interior in the year was 555.

The following statements, A, B, C and D, cover the activities of the branch in respect to lands.

STATEMENT A—Number of lots and part lots sold or redeemed, the amounts for which such lots were originally disposed of and the sum received as instalment or balance of purchase money during the fiscal year.

| Locality | Plot sold or redeemed | Purchase price | Received on account | — |

II

# FORESTRY

## REPORT OF THE DIRECTOR OF FORESTRY, E. H. FINLAYSON

This report covers the operations of the Forest Service for the fiscal year ended March 31, 1926.

### FOREST FIRES

The situation as to fires during the 1925 season was, on the whole, satisfactory. Manitoba and Saskatchewan experienced a normal season, and conditions in Alberta were good, especially in the southern half of the province. In British Columbia, however, a rather serious situation obtained. Spring in that province set in early, the snow soon disappeared, and the weather continued dry throughout April and May. Again from the middle of June to the middle of August the weather was very hot and rainfall scanty or altogether lacking; many dry electrical storms, with high winds, occurred. In the interior the weather improved about the middle of August, but on the coast the hazard continued until the end of September.

The total number of forest fires on Dominion lands was 1,165, of which 473 (40 per cent of the total) were large fires. The total area burned over was 524,225 acres, of which the merchantable timber area was 126,970 acres, and the area covered with young growth, 157,135 acres.

FIRES WITHIN FOREST RESERVES

| Cause | 1925 | | 1924 | | 1923 | |
|---|---|---|---|---|---|---|

| Totals | 1,165 | 100 | 1,487 | 100 | 1,258 | 100 |

### AIR PATROL

Patrol of the forested districts by aircraft was continued in parts of Alberta and Manitoba. In the former province two patrols were maintained, with the High River station as a base, covering the Rocky Mountains reserve from the International Boundary northward, including the Crowsnest, Bow River, and part of the Clearwater forests. In Manitoba air patrol was provided in the territory east of lake Winnipeg and in the northern part of the province.

### IMPROVEMENTS

A large amount of improvement work was carried out in all the districts except British Columbia; in the latter province the fire situation demanded almost exclusive attention. A noticeable feature in connection with the improvement work is that of late years it tends to be put chiefly on maintenance of existing improvements. The following statement shows the improvements made during the year:—

| | Number | | Miles |
|---|---|---|---|
| Ranger station house | 1 | Telephone lines | 275 |
| Cabins | 13 | Roads | 234 |
| Stables (8) and barns (2) | 10 | Trails | 412 |
| Other buildings | 8 | Fireguards (cleared) | 524 |
| Seed-extraction plant | 1 | Fireguards (ploughed) | 212 |
| Bridges | 4 | | |
| Lookout towers | 11 | | |

### GRAZING

Grazing use in the forest reserves was about the same as for some years past. The live stock industry has been at a low ebb, and this has been reflected in a somewhat lessened use of the reserves. Alberta reports a slight increase in the number of grazing permits—the first since 1920—but in other provinces the number of such permits remained about the same. In British Columbia there was a greater interest shown in the grazing facilities of the forest-reserve range, and a number of ranchers were thus enabled to combat successfully a very dry season.

The classes and numbers of stock pastured on the forest reserves were: cattle, 40,722; horses, 10,822; sheep and hogs, 4,923.

### MANITOBA PULP SALE

The outstanding item in reference to the disposal of timber with which this service had to deal was the granting of a pulpwood concession in Manitoba to the Manitoba Paper Company. While the timber is to be selected from areas on Dominion lands outside the forest reserves, the administrative responsibility for the sale has been delegated to the Forest Service.

### TIMBER SALES AND PERMITS

The number of timber sales operating on the forest reserves shows an increase of eight over the previous year. Two sales were put through in Saskatchewan, and nine in Alberta, although a very mild winter in the latter province hindered cutting operations. In British Columbia timber sales were spread over a much wider territory than previously. It is gratifying to note from the reports of the field officers that the regulations of the service with respect to brush disposal, cutting procedure, etc., are, as a rule, being faithfully carried out.

### REVENUE

The total revenue of the Forest Service for the year shows a slight increase over that for the fiscal year 1924-5, which was the highest recorded up to that time. This increase was due to wider use of forest-reserve timber under timber sale or permit. The revenue from the timber sales showed an increase of 10 per cent, and the increased number of timber permits issued provided additional revenue from this source of almost 30 per cent.

The grazing business, on the other hand, shows a slight falling off. The number of permits issued was greater than the previous year, but the total number of stock pastured on forest reserves under these permits showed diminution.

### PLANTING AND SEEDING ON FOREST RESERVES

Experimental planting and seeding was further extended. During the year approximately 54 acres were planted on the various reserves. Nearly 135,000 trees, including 80,893 Scotch pine, 17,940 white spruce, 14,639 Douglas fir, 13,729 jack pine, and 6,573 lodgepole pine, were used for this purpose. In addition about 220 acres were sown with 213 pounds of tree seed, including jack pine, lodgepole pine, red pine, Scotch pine, white spruce, and yellow birch.

### SEED COLLECTION AND EXTRACTION

The Forest Service has now four seed-extracting plants in operation, namely those at Indian Head, Saskatchewan; Vancouver, British Columbia; Rocky Mountain House, Alberta; and Prince Albert, Saskatchewan. The combined output of these plants during the season of 1925-6 made up a total of about one and a quarter tons of the seed of the various coniferous tree species. Several hundred pounds of the seed of broadleaved species were also collected. A quantity of unextracted cones also remained on hand.

### TREE PLANTING ON PRAIRIE FARMS

The season of 1925 was favourable for tree-planting operations. There was no damage reported from winter-killing, but limited damage occurred from rabbits and insects—especially cutworms, tent-caterpillars (chiefly on poplar), and aphids. Most of the existing plantations continue to receive care, only six and a half per cent being reported as failures, while seventy three per cent are quite successful; the remaining twenty per cent offer prospects of success provided past neglect be atoned for by special attention for a time.

Unfortunately, the Indian Head nursery suffered from drought during the summer; no serious diminution in the number of the stock on hand for distribution is anticipated, but some of the material will be smaller than usual. The drought also provided favourable conditions for development of insect pests. The number of broad-leaved trees distributed was about the usual number, i.e., approximately five million. Conifers sent out showed an increase from 73,290 in 1924 to 90,000 in 1925. An interesting feature of the work at the Indian Head nursery station was the thinning of the permanent plantations. From six plots planted in 1905 and 1906 and aggregating slightly over four and a half acres, the thinnings amounted to seventeen and three-quarter cords of fuel-wood. The stands left are, of course, in better condition than ever.

### SURVEYS

As a result of working-plan surveys, advances were made in placing several of the reserves under working plans. The survey of the Sandilands forest reserve, in Manitoba, was completed during the summer of 1925, and type and improvement maps compiled from the data secured. In Saskatchewan a survey of forty square miles of the Nisbet forest reserve was completed, and a type map prepared which will serve as the basis of a working plan for the reserve. In Alberta 360 square miles of the Brazeau forest and 40 square miles of the Clearwater forest were similarly mapped, as a preliminary step to the formulation of working plans.

### RECREATIONAL USE OF FOREST RESERVES

One of the most striking features in the development of the use of forest reserves as recreational areas has been the eager manner in which the public have grasped the possibilities for holidaying and recreation which are afforded therein. This is true not only of people living in the neighbourhood, but of visitors from outside points. On one of the reserves in Manitoba an inn has been erected for the accommodation of visitors. Improvement of camping facilities in the Saskatchewan reserves has also resulted in their being patronized to an increasing extent. In British Columbia an addition to the Paul Lake resort was laid out; attention is also being given to locating suitable camping sites along motor roads.

### FOREST PRODUCTS LABORATORIES

The co-operative arrangement between the Forest Service and the pulp and paper industry, as represented by the Canadian Pulp and Paper Association, came into effect at the beginning of the fiscal year, and considerable expansion in the work of the pulp and paper division has thus been brought about. A standard instrument and procedure for the " freeness " test of pulp were designed, and a number of the instruments were distributed to pulp manufacturers. Enlarged accommodation and increased equipment for the study of pulp and paper problems were acquired. Work in kiln-drying received increased attention, especially in the direction of work in co-operation with manufacturers and lumber dealers operating kilns. Study of red rot and red stain in jack pine was continued, and at least one of the causal organisms of the decay was determined. The work of determining the spike-holding power of jack pine ties so infected was concluded, and the results communicated to the railways. Further study of this form of decay was carried on with the object of determining the life of ties so affected, several hundred ties being placed in position on railway lines, to be kept under observation for an extended time. Tests of a new method of injecting a wood preservative, zinc chloride, into wood were made with favourable results.

The Vancouver Forest Products Laboratory was moved during the year to new buildings erected by the University of British Columbia at Point Grey. Some 9,000 additional strength tests on British Columbia and Alberta woods were made, and a series of comparative strength tests was conducted on two shipments of lodgepole pine ties from Alberta and British Columbia respectively. Comparative tests of green-cut and fire-killed cedar poles were made in order to ascertain if any loss in strength had been incurred as the result of fire-killing. Many tests were conducted also for wood-working industries. Considerable attention was given to kiln-drying, and a representative of the laboratory gave a series of six lectures on " the seasoning of wood " to lumbermen from Vancouver, Victoria, and the surrounding districts. An experimental dry-kiln is being installed, and a pathological laboratory equipped. Accommodation is also being provided at the laboratory for a representative of the Entomological Branch of the Department of Agriculture who is engaged in studying insect infestations.

### FOREST RESEARCH WORK

At the Petawawa (Ontario) forest experiment station a working-plan survey was made of a section of the reserve with the object of conducting operations on a sustained-yield basis. The Royal Canadian Air Force and the Topographical Survey, Department of the Interior, lent material assistance in providing an aerial photographic map of the section, which was used as a basis for the survey.

A timber sale of mature jack pine was commenced on a section of the surveyed area, under the direct supervision of a technical officer. Permanent sample plots were also established on this area for the purpose of studying the effect of the cutting on the remaining stand and on reproduction. A comprehensive investigation was conducted on methods of estimating timber, and a report with important findings has been prepared. An experimental nursery for propagation of exotics has been established, by means of which it is proposed to build up an arboretum at this station.

Extensive yield studies of jack pine and taper studies of red pine were made in northern Ontario.

At the Lake Edward (Quebec) experiment station a regeneration survey covering some ten square miles was made by line-plot system, and preliminary growth data for cut-over pulpwood lands were obtained. Extensive studies in the pulpwood operations of several industrial concerns were conducted to investigate the solid-wood content per stacked cord of pulpwood, and to prepare a volume table based on cord unit instead of cubic-foot or board-foot unit.

In New Brunswick the investigation of the effect of various cutting methods upon reproduction, rate of growth, and mortality in slow-growing black spruce types was extended to areas at Cains river. Cutting was done under the direction of the research division, and a complete series of permanent sample plots was established on the cut-over area. Private companies co-operated with this service in several investigations. The extensive experiments in reseeding burned areas in New Brunswick, conducted in co-operation with the Honorary Advisory Council for Scientific and Industrial Research and the New Brunswick Forest Service, were completed during the year. Some tentative and apparently favourable results have been obtained from the earlier work.

Forest research on the western forest reserves has increased in scope. Experiments with methods of seeding and planting were reorganized. Several experimental cutting areas were established in connection with timber sales, and the work in connection with the three working-plan surveys was continued. In all of these activities the research division acts in an advisory capacity.

The form-class volume tables for many species prepared by this division are in great demand and are becoming standard.

### PUBLICATIONS

The most important publication of the year was Bulletin No. 77, "Statistical Methods in Forest-investigative Work," which deals with the application of statistical methods, now so widely used in the scientific and commercial worlds, to the problems of research in forestry. Circular No. 18, "The Kiln-drying of British Columbia Softwoods," was also published this year; it treats in a non-technical way of a problem of much importance to the timber interests of that province; the demand for this has necessitated a new edition within the year. Circular No. 19, "Canadian Softwoods," was prepared mainly for the Wembley exposition, and gives a short account of the properties and uses of Canadian softwood timbers. Two new Tree Pamphlets, Nos. 9, "Balsam Fir," and 10, "(Eastern) Cedar" were brought out. Bulletin No. 1, "Tree Planting on the Prairies," was again reprinted; the total number of copies of this publication printed up to date is ninety thousand. The pamphlet "Talking Trees" was also reprinted.

### PUBLICITY

Efforts in the direction of publicity, particularly with respect to forest-fire prevention, were renewed in the spring of 1925 by a repetition of Save-the-Forest Week, which was fixed, by proclamation, as the fourth week of April, from the 19th to the 25th of that month. A new and successful feature of the celebration this year was the formation of a National Advisory Committee, representative of the press, wood-using industries, service clubs, and many other national organizations interested in forest conservation. Through the good offices of the several provincial forest services, provincial committees were appointed for direct supervision of the campaign in the respective provinces.

The program, as in the previous year, included addresses before schools, service clubs, Boy Scouts, Girl Guides, and other organizations. A total of 213,250 pieces of publicity material was distributed, comprising blotters, booklets, school programs, charts, etc. The radio was also brought into service, speeches being broadcast by the Prime Minister, Right Hon. W. L. M. King, and the provincial premiers or their representatives. Large advertisements were placed in many of the leading newspapers of the Dominion, calling attention to the destruction of the forests by fire and the need of care in dealing with the country's forest resources.

This campaign naturally took much of the attention of the publicity division for a considerable period of the year. In addition this division prepared a great deal of publicity material for use by the field officers of the service. A very important part of the work of the division consisted of a series of visits to summer-vacation camps for boys and girls. A member of the staff and two temporary assistants were employed in this work during the summer season. Their work consisted in supervising "hikes" for the campers through the adjoining woods, instructing them in tree-identification, and in promoting the idea of forest-fire prevention by talks around the camp-fires at night. Twenty-one camps were visited in this way, and some 1,400 " 'teen-aged" boys and girls were reached.

### FOREST SERVICE REVENUE FOR THE FISCAL YEAR 1925-26

The statement of revenue follows on page 89. Under "Timber Permits", the kinds, and total quantities of timber authorized to be cut from all reserves were as follows:—

| | |
|---|---|
| Fuel-wood (cords) | 32,236 |
| Fence-posts, rails and piling (number) | 373,742 |
| Fence-posts, rails and piling (linear ft.) | 36,922 |
| Telephone poles (linear ft.) | 7,679 |
| Railway ties (number) | 12,694 |
| Saw-timber (ft. B. M.) | 8,424,338 |
| Mining timber (linear ft.) | 2,170,962 |
| Mining timber (cords) | 80 |
| Mining timber (ties) | 9,606 |
| Building logs (number) | 30,083 |
| Building logs (linear ft.) | 368,116 |
| Miscellaneous (linear ft.) | 968 |
| Miscellaneous (cords) | 2,503 |
| Miscellaneous (number) | 287 |

## THE TREE-PLANTING DIVISION

*Norman M. Ross, Chief*

With the exception of a few comparatively small localized areas the season of 1925 was a very favourable one for tree-planting work and agricultural operations over the Prairie Provinces generally. The spring opened about two weeks earlier than last year, and precipitation and growing conditions generally induced a good growth in the older plantings and gave the newly planted belts

a good start. Generally speaking, no damage was done from winter-killing, but certain districts reported much damage again from rabbits and a few from insect infestations, principally the red-backed cutworm and forest tent-caterpillar. The cutworm appeared very generally over large areas in central and southern Saskatchewan and materially affected farm crops, particularly barley, oats, and sweet clover. In the newly set out plantations in the infested areas they destroyed a number of the poplar and willow cuttings just as they were rooting and also defoliated the freshly planted caragana seedlings. The latter mostly recovered later in the season. The tent-caterpillar was confined principally to the native poplar, and while found on some of the cultivated willows and ash did not actually cause the death of any of these trees. An insect which is doing more harm than is generally realized is a small dark-coloured aphid which seems to be increasing in numbers of late years and attacks willows and poplars in the plantations. Willows appear to suffer most, and many belts, particularly on higher soils, have been very badly set back and in some cases killed as a result. The insects are not conspicuous but crowd very numerously on the young growth and suck out the sap. When noticed in time they can be readily controlled by spraying with "Nicotine Sulphate" or "Black Leaf 40." Unfortunately their presence is not usually noticed until after the trees have been considerably weakened.

Some 5,700 reports made after inspection of the older plantations this season indicate only 6½ per cent failures with 73½ per cent in thriving condition and the remaining 20 per cent in fair shape and capable of being brought into good condition with a little more care and attention. Of the newly set out stock, reports show that of the seedlings 93 per cent were growing and of the cuttings 90 per cent took root.

*Nursery Work.*—The nursery at Indian Head was this season in a very localized area which suffered from lack of precipitation, receiving probably not more than five inches of rain during the growing period. This dry condition greatly increased injury from cutworms, which did much damage in the newly sown plots of ash and caragana, reducing the stand almost 50 per cent. An estimated loss of 25 per cent in the newly set out evergreen transplants was due to drought. The evergreen seed-beds, for which watering facilities are available, produced excellent stands. In spite of the drought the broad-leaved stock developed fairly satisfactorily, although reduced in numbers. The growth of the pine transplants was much retarded—so much so, in fact, that the four-year-old plants, which should have been ready to send out this spring (1926), must be carried over for another season's growth. The cutworms proved very injurious to the seedlings of ash and caragana in the freshly sown plots both at the Indian Head and Sutherland nurseries. Although measures to control the insects by using poisoned bait were employed as soon as their presence was realized, the loss from this source was very considerable. A new pest, a small snout beetle about 3/16 of an inch long, was discovered in the caragana plots. Owing to its minute size and neutral colour it was very difficult to find, but the damage was very severe. One plot of two acres was completely destroyed before it could be determined what was causing the damage. The remaining plots were then promptly sprayed and the damage controlled. These small beetles work from the time the seedlings germinate until they are up to one inch high. They do no serious injury to older plants. In the older plantations at Indian Head considerable spraying had to be done to control the forest tent-caterpillar, the larch saw-fly, the willow and poplar aphis, and the small white-pine scale which is apparently likely to be a serious pest, if not controlled, particularly on white spruce.

*Distribution of Stock.*—Shipping commenced on April 14 at Indian Head and April 17 at Sutherland, at least ten days earlier than in 1924. Approximately

5,000,000 seedlings and cuttings were sent out to 5,585 applicants. The stock consisted of two-year-old seedling ash, one-year-old maple, one-year-old caragana, and unrooted cuttings of Russian poplar and Russian willows. Of the evergreens, 90,400 transplants of Scotch pine, jack pine, lodgepole pine, and white spruce were distributed amongst 510 applicants; 2,700 were shipped to the Sutherland nursery for permanent planting, and 120,615 seedlings and transplants were sent to various forest reserves. There was thus a total evergreen distribution of 213,715. Material shipped to the reserves was as follows: To Spruce Woods reserve, 70,615; Dundurn reserve, 20,000; Elbow reserve, 10,000; Pines reserve, 10,000; Nisbet reserve, 10,000.

*Seed Collection.*—Owing to late spring frosts it was impossible to secure collections of either maple or ash seed in any of the western provinces. About 250 pounds of caragana seed were picked at Indian Head and 580 pounds at Sutherland. About four bags of birch seed were collected at Sutherland and about thirty bushels of white spruce cones at the Indian Head nursery station.

*Visitors.*—Each season sees a great increase in the number of visitors at both the Indian Head and the Sutherland nursery stations. Parties came from long distances to picnic in the various groves and showed a keen interest in the development of the nurseries and the work being carried on.

*Permanent Plots: Development, Thinnings, etc.*—The permanent plantation plots at Indian Head are making splendid development. Some of the older ones are now at a stage where thinning operations are becoming necessary and regular cuttings in all the older plots will now be in order. Thinnings were made this winter as follows:—

Plantation No. 1—Tamarack; planted in 1905; area, $\frac{1}{3}$ acre; yield, $1\frac{3}{4}$ cords.

Plantation No. 2—Scotch pine and spruce; planted 1906; area, $\frac{3}{4}$ acre; yield, $4\frac{1}{2}$ cords.

Plantation No. 3—Scotch pine, tamarack, and spruce; planted 1906; area, 1 acre; yield, 1 cord Scotch pine, $1\frac{3}{4}$ cords tamarack.

Plantation No. 4—Scotch pine; planted 1906; area, 1 acre; yield, $4\frac{1}{2}$ cords.

Plantation No. 6—Cottonwood; planted 1906; area, 1 acre; yield, 2 cords.

Plantation No. 13—Mixed Scotch pine and spruce; area, $\frac{1}{2}$ acre; yield, $2\frac{1}{4}$ cords.

All this wood is of good fuel size. The original spacing in these plots was all 4 feet by 3 feet 6 inches. After thinning the average spacing of the remaining trees is about $5\frac{1}{2}$ feet each way. An inspection of the permanent plantations indicates very decidedly that it is quite practical to produce good fuel-wood under prairie conditions in a very reasonable time.

A considerable amount of pruning of dead limbs in older plantations of tamarack, Siberian larch, and pine was done, greatly improving the general appearance of the plantations and leaving them more accessible for obtaining measurements. Material of post size is now available of such species as poplar, cottonwood, willow, maple, tamarack, Siberian larch, European larch, and Scotch pine. A number of posts have been cut from these species and are being prepared with a view to carrying on experiments in treating with wood preservatives.

*Exhibits.*—An exhibit was prepared and shown at the summer fairs at Saskatoon and Regina in conjunction with a forest reserve exhibit prepared by the Prince Albert office. The whole exhibit occupied a space of approximately 60 feet in length, the tree-planting portion consisting of scale models showing planted and unplanted farmsteads, seeds, leaves, sections of wood, etc., of the ordinary cultivated species and photographs of plantations and improved farm homes. The exhibit as a whole had a very attractive appearance and undoubtedly created very considerable interest. Hundreds of farmers availed themselves of the opportunity to discuss their tree-planting problems.

## Dominion Forests in Manitoba

*H. I. Stevenson, District Forest Inspector*

The fiscal year 1925-26 was marked by one event of outstanding interest in reference to the forests of Manitoba, namely, the agreement entered into between the Government and the Manitoba Paper Company.

The new industry thus provided will prove of great economic benefit to the province, opening up as it does a wider market for its pulpwood. An increasing quantity of pulpwood has been cut in late years from settlers' lands, the bulk of which has been exported. The mill now being erected will doubtless absorb much of this, in addition to large quantities from Crown lands adjoining settlements, all of which will be manufactured locally. The company will also be drawing supplies from territory previously unexploited for pulpwood, which has to date been producing little or no forest revenue.

*Fire Protection.*—Weather conditions were such during the past summer that fire hazards were, except during the month of May, either normal or subnormal. During the month of May (particularly the last two weeks), a critical period occurred, occasioned by a combination of strong winds, high temperatures, and low relative humidity. Up to this time there had been no growth, so that the dead vegetation of the previous year was quite inflammable. There were 106 fires reported during this two-weeks period which was a little over 66 per cent of the total reported for the season. There was a total of 160 fires reported which burned approximately 40,200 acres. Of this area there were 6,937 acres which carried merchantable timber and 6,119 acres of young growth; the remainder was chiefly old burn and grass land. The burned area of 40,200 acres represents approximately eighty-five one-thousandths of one per cent of the area under protection.

The causes of fire are reported as follows: Settlers, 34 per cent; camp-fires, 19 per cent; incendiary, 7.5 per cent; lightning, 7.5 per cent; smokers, 6 per cent; railways, 5 per cent; other causes, 1 per cent; unknown, 20 per cent.

*Air Patrol.*—Aircraft used in fire protection gave very satisfactory service. Nine machines were assigned to this work. These planes operated from three bases, namely, Victoria Beach, Norway House, and Cormorant Lake (near The Pas). They made 256 patrols, occupying 836 hours, and covered approximately 54,439 miles. In all this flying there were only two or three accidents, and these were of a minor nature.

Requests for fire patrols were made daily from the office of the district forest inspector to the Royal Canadian Air Force, and this latter organization carried out the patrol.
